Restructuring Post-Communist Russia Yitzhak Brudny, Jonathan Frankel, Stefani Hoffman, 2004-06-21 Since the fall of the Soviet Union in 1991 the question of whether Russia has been the source of ceaseless speculation both at home and abroad In search of answers twelve highly qualified scholars examine the complex interplay between continuity and change that has marked developments in Russia under the leadership first of Boris Yeltsin and now of Vladimir Putin Analysing the recent past they also peer into the country's future In his introduction to the volume Peter Rutland asks whether we are witnessing the gradual entrenchment of parliamentary democracy the slow return to autocracy or mere political stagnation Restructuring Post Communist Russia poses the fundamental questions while providing the information and analysis needed to give the at least preliminary answers

Blackledge, G. Kirkpatrick, 2002-09-06

Historical Materialism and Social Evolution brings together a collection of essays which investigate the relationship between Marxist thought and Darwin's theory of evolution by natural selection Each of the contributors emphasize the idea that the distinctive character of progressive social thought is derived from creative ideas drawn from the study of natural evolutionary processes **Dawn of the International Socialist Revolution** Stefan Engel, 2016-03-03

By unleashing the international productive forces the reorganization of international production has ushered in the G tterd mmerung of international finance capital At the beginning of its crusade around the globe international finance capital still reveled in fantasies of omnipotence and dreams of eternity Today their mood is one of general hangover the crisis proneness of the social system proves irreversible But the turn of a new era already looms on the horizon the dawning of the international socialist revolution becomes visible And yet the old masters will not make way voluntarily even if they drag the whole of humanity with them into capitalist barbarism The decision for the international revolution must be made by the workers and the masses themselves To help them make this decision and together with them sweep every obstacle out of the way so that they can fulfill their historical mission that in a nutshell sums up the tasks of the Marxist Leninists in the whole world today

Toye, 2003-01-01 The essays are of high quality and full of interesting details which is not a surprise given the distinguished group of scholars that contributed this is an impressive collection of essays that adds significantly to the discussion of policies for developing countries in the context of globalization I would strongly recommend it to academics and students interested in development as well as policymakers in developing countries Ricardo A L pez *Journal of International Development* This book questions what enduring lessons have been learnt about the interdependence of international trade and economic development during the last 50 years Since the end of the Cold War and the advent of the WTO developing countries have been forced to face the choice of whether and to what extent to integrate economically

with the rest of the world The key issue of international political economy is emphasized The authors argue that while integration through trade has become increasingly necessary for successful development it rapidly encounters a series of problems that remain to be resolved These range from increasing inequality and instability the vagaries of WTO rules persistent agricultural protection in developed countries through to inadequate finance and new waves of technological innovation Underlying all these concerns however is the deeper question of how much the developing countries can influence the setting of the rules of the international system Trade and Development examines all the major topics in the area of trade and development along with proposals for new directions for UNCTAD The book will be of great interest to academics researchers NGOs and policymakers involved in international and development economics *The Problem of Order in the Global Age* A. Pickel,2006-08-06 This important contribution to the study of the problem of order which figures prominently in today's globalization debate focuses on the role of sovereignty It advances arguments based on psychocultural perspectives and looks at postcommunist transformations and changes in political economic and cultural orders at all levels of social life **Evolutionary Theory in the Social Sciences: Early foundations and later contributions** William M.
