## **Evolving Order Critical Path To Human Survival:**

**Evolving Order** George A. Richter, 1996 This book examines the outlook for the survival of humanity in the burgeoning threats to our species by our species The subject is addressed from many perspectives including the basic nature of the human psyche evolutionary theory quantum physics neuroscience the evolvement of order as this process relates to the life forces of individual organisms their species Richter develops the brief that an optimistic prognosis for human survival is justified only if human beings can do more than pay lip service to the concept of free will Presented here is a strong scientific argument in support of the existence of free will as a valid human attribute The book is written to be understood not only by scientists but by interested non scientists as well Richter is a physical chemist who a few years ago began to wonder whether the human species can escape self extinction by its own clever devices Yin Yang Books 1479 Grasshopper Road Huntingdon Valley PA 19006 Phone 215 947 3240      *Forthcoming Books* Rose Arny, 1995      *Closing Human Evolution: Life in the Ultimate Age* Ladislav Kováč, 2015-08-05 This volume analyses the evolution of humankind by combining approaches from science and the arts It offers a novel perspective on the evolution of life on Earth based on a recent reformulation of the second law of thermodynamics in terms of the maximum entropy production principle In essence the Earth is but one of many white holes in the universe where life functions as a specific arrangement for the rapid dissipation of energy gradients by generating self organized structures Evolution of life in the universe is a creative process of increasing complexity as a Bayesian ratchet of knowledge accumulation advancing in an evolutionary maze characterized by myriad blind alleys On Earth the human species has progressed more than any other by creating artefacts that have become both agents and products of in our cumulative cultural evolution Culture has dramatically enhanced the rate of dissipation of energy gradients Extrapolating from the acceleration of cultural evolution suggests that humanity will reach the Civilization Singularity in the middle of the 21st century a point in time at which the rate of changes and hence their unpredictability and uncontrollability will converge to infinity Humankind has now entered the ultimate age in which the exuberance and splendour of human feats may be metaphorically likened to fireworks The author highlights a new role of scientists as intellectuals who can create music for the fireworks by analysing the consequences of the astounding dynamics in order to make the closing phase of human evolution a sublime one marked by minimal political and social tensions      *Fiscal Year 1990 Authorization Request and Budget Estimates for the National Aeronautics and Space Administration* United States. Congress. House. Committee on Science, Space, and Technology. Subcommittee on Space Science and Applications, 1989      [The Artist of Evolution — Sun Tzu](#) David R. Wood, 2025-03-19 The Artist of Evolution is an evolutionary reframing of the text The Art of War Revealing Sun Tzu as a naturalist in the mold of Charles Darwin As his faith Taoism looked to the divine patterns in nature for wisdom Enabling him to intuitively understand that human warfare was just another competitive pattern in what Charles Darwin termed the war of nature So he systematically studied the competitive patterns in nature to gain advantage in war This book

proceeds chapter by chapter line by line evolutionary reframing Sun Tzu's text Identifying the hidden conceptual pattern cutting across Sun Tzu's theory Clarifying concepts and correcting mistranslations in the original ancient text Thereby providing new insights and competitive value to strategists and leaders across human activity Made possible by adopting the integrated perspective of the greatest minds of history Charles Darwin Laozi Parmenides Socrates Plato Aristotle Machiavelli etc The Artist of Evolution is a methodical and comprehensive reframing of Sun Tzu's text that makes his competitive advantages accessible and comprehensible to every competitive field business sports politics warfare etc And it will digitally disrupt and revolutionize the academic fields of military science political science business management sports management digital transformation and so many more It is intended to be a leadership and strategic thinking primer for leaders in any field of human activity And renew interest in ancient texts and authors As a source of timeless wisdom yet unmatched by modern science Produced primarily by the power of human imagination

**Oxygen and the Evolution of Life** Heinz Decker, Kensal E van Holde, 2010-12-03 This book describes the interlaced histories of life and oxygen It opens with the generation of oxygen in ancient stars and its distribution to newly formed planets like the Earth Free O<sub>2</sub> was not available on the early Earth so the first life forms had to be anaerobic Life introduced free O<sub>2</sub> into the environment through the evolution of photosynthesis which must have been a disaster for many anaerobes Others found ways to deal with the toxic reactive oxygen species and even developed a much more efficient oxygen based metabolism The authors vividly describe how the introduction of O<sub>2</sub> allowed the burst of evolution that created today's biota They also discuss the interplay of O<sub>2</sub> and CO<sub>2</sub> with consequences such as worldwide glaciations and global warming On the physiological level they present an overview of oxidative metabolism and O<sub>2</sub> transport and the importance of O<sub>2</sub> in human life and medicine emphasizing that while oxygen is essential it is also related to aging and many disease states

The Tree R. A. Brown, 2010-12 This book of fiction raises one likely possibility for the immediate future given recent history It also considers the idea that at some point everyone wonders what is the meaning of all this stuff surrounding us the earth the solar system the universe and time Is it all meant just for Homo sapiens This author explores the best answer that science and or faith can deliver at this moment It is the answer that you most likely would have arrived at if you had decided to become a scientist as an occupation and a novelist philosopher as a preoccupation It starts with what we know about this planet its flora and fauna including that special species Homo sapiens where the metaphor of the vanity of Don Quixote versus the humility and reality of Sancho Panza is used In this context we can examine ways to enjoy life given a healthy respect for our limitations It helps explain our cultural successes failures and helps us come to terms with what we are It is a thriller novel designed to make the philosophy palatable As such it should be entertaining and intellectually satisfying This 2nd edition is condensed for easy reading In a word this book is provocative I think it s ideal reading for book clubs because it forces you to think about man s role in the universe s and so much of the middle portion is an ideal source for discussion topics If you like science read it If you dislike science read it twice N Johnson Seattle WA USA The author insightfully contemplates the essential meaning of human life from a scientist s point of view while rehearsing the progress of mankind through the historical record by telling the life story of one individual He points to an inevitable conclusion that is eerily

**The Druze and their Faith in Tawhid** Anis Obeid, 2006-07-06 As a small sect that emerged from Islam over a thousand years ago the Druze religion and society has long been cloaked in a tradition of secrecy Veiled from the outside world the religious tenets have been vulnerable to distortion misunderstanding and misrepresentation In this book Dr Anis Obeid a Druze layman provides a penetrating analysis of Druze scriptures and beliefs Tawhid Presenting a chronological narrative of the foundation and development of the faith he explains the historical conditions and religious rationale behind this closed religion The Druze faith is the product of Abrahamic monotheism as it coalesced with other philosophies belief systems and political structures of the West and the East and as Obeid maintains should be recognized for its core monotheism and not fundamentally different from Judaism Christianity or Islam He argues convincingly with examples and translations from the Druze scriptures only now accessible to a non initiate public that Tawhid is a progressive and dynamic spiritual process based on freedom of choice This rich exploration of their faith the author's appeal for a sincere cultural dialogue will resonate with a wide audience in the West and in the Middle East

Kansas City Missouri **Wordsworth and Evolution in Victorian Literature** Trenton B. Olsen, 2018-12-07 The influences of William Wordsworth's writing and evolutionary theory the nineteenth century's two defining visions of nature conflicted in the Victorian period For Victorians Wordsworthian nature was a caring source of inspiration and moral guidance signaling humanity's divine origins and potential Darwin's nature by contrast appeared as an indifferent and amoral reminder of an evolutionary past that demanded participation in a brutal struggle for existence Victorian authors like Matthew Arnold George Eliot Robert Louis Stevenson and Thomas Hardy grappled with these competing representations in their work They turned to Wordsworth as an alternative or antidote to evolution criticized and altered his poetry in response to Darwinism and synthesized elements of each to propose their own modified theories Darwin's account of a material evolutionary nature both threatened the Wordsworthian belief in nature's transcendent value and made spiritual elevation seem more urgently necessary Victorian authors used Wordsworth and Darwin to explore what form of transcendence if any could survive an evolutionary age and reevaluated the purpose of literature in the process **Accelerating Human Evolution by**

**Theosophical Initiation** Yves Mühlematter, 2022-12-19 The main subjects of analysis in the present book are the stages of initiation in the grand scheme of Theosophical evolution These initiatory steps are connected to an idea of evolutionary self development by means of a set of virtues that are relative to the individual's position on the path of evolution The central thesis is that these stages were translated from the Hindu tradition to the Theosophical tradition through multifaceted hybridization processes in which several Indian members of the Theosophical Society partook Starting with Annie Besant's early Theosophy the stages of initiation are traced through Blavatsky's work to Manilal Dvivedi and T Subba Row both Indian members of the Theosophical Society and then on to the San tana Dharma Text Books In 1898 the English Theosophist Annie Besant and the Indian Theosophist Bhagavan Das together founded the Central Hindu College Benares which became the nucleus around which the Benares Hindu University was instituted in 1915 In this context the San tana Dharma Text Books were published M hlematter shows that the stages of initiation were the blueprint for Annie Besant's pedagogy which she implemented in the Central Hindu College in Benares In doing so he succeeds in making intelligible how esoteric knowledge was transferred to public institutions and how a broader public could be reached as a result The dissertation has been awarded the ESSWE PhD Thesis prize 2022 by the European Society for the Study of Western Esotericism **The Future of Life: Meta-Evolution** David Hunter Tow, 2006-10 The Future of Life Meta Evolution represents the first comprehensive

formulation of the hypothesis that evolution is the unifying force underlying the dynamics of all processes in the universe both organic and inorganic These include all facets of human existence and civilisation the sciences technology arts humanities and religion In essence by applying quantum information network and decision theory it is demonstrated that an overarching evolutionary process shapes the spectrum of life and phenomena in the universe as a generic paradigm beyond Darwin's original biology based theory The Theory of Evolution is undoubtedly the most powerful paradigm ever conceived by humans to explain their own existence Since Darwin's epoch making treatise *Origin of Species* published in 1859 evolution has been centre stage universally recognised as the driving force in the emergence of modern humans from the genesis of life on this planet almost 4 billion years ago However despite its ubiquitous brilliance as the jewel in the crown of human intellectual achievement the notion of evolution has never been developed to its full potential It remains instead constrained within its biological cradle often reduced in everyday connotation to its lowest common denominator of survival of the fittest The intention of this book to re evaluate and expand the Darwinian model of evolution to demonstrate that its current application is only the tip of the intellectual iceberg and that by combining its formidable biological principles with those of decision complexity network quantum and information theory it emerges as an incalculably deeper and richer model than previously contemplated It will be demonstrated that the evolutionary engine which drives biological development also drives all other dynamic adaptive processes the physical social cognitive economic political and technological and is in fact the major dynamic governing the Universe past present and future It is further proposed to demonstrate that recent developments in artificial intelligence and ubiquitous computing through the Internet mark the next crucial stage in life's evolution involving the inevitable symbiosis of vast computational intelligence with the human mind The major hypothesis developed in this book of a global all encompassing Theory of Evolution coupled with its potential for realising the emancipation of human intelligence and potential provides a vastly more powerful paradigm for exploring the Future of Life than current scientific scenarios The resulting Omega state of infinite knowledge and wisdom which is proposed has been actively championed by a number of eminent 19th and 20th century philosophers such as Teilhard de Chardin Henri Bergson Schelling Alfred Whitehead Samuel Alexander and more recently by the leading physicist and futurist Professor Frank Tipler However to date no equivalent scientific framework for supporting such a hypothesis has been provided In conclusion The Future of Life Meta Evolution has been written not as an academic text but as primarily a non technical review of the evidence to support such a hypothesis in much the same vein as other recent publications in the popular science philosophy genre It is hoped that this approach will therefore provide a window into the wider evolutionary debate for the general reader interested in one of the most critical emerging paradigm shifts of the 21st century

**Intelligent Evolution** Michael A. Flannery, Alfred Russel Wallace, 2020-08-12 Alfred Russel Wallace 1823 1913 co discoverer of natural selection was second only to Charles Darwin as the 19th century s most noted English naturalist Yet his belief in spiritualism caused him to be ridiculed and dismissed by many leaving him a comparatively obscure and misunderstood figure In this volume Wallace is finally allowed to speak in his own defense through his grand evolutionary synthesis *The World of Life* published over a century ago in 1910 More than just a reprinting of a near forgotten work Michael A Flannery places Wallace in historical context and includes the very latest historiography relating to both Darwin and Wallace in his detailed introduction Flannery exposes Charles Darwin s now famous theory of evolution as little more than a naturalistic cover for an extreme philosophical materialism borrowed as a youth from Edinburgh radicals This is juxtaposed by his sympathetic account of what he calls Wallace s intelligent evolution a thoroughly teleological alternative to Darwin s stochastic processes Though based upon very different formulations of natural selection the Wallace Darwin dispute as presented by Flannery shows a metaphysical clash of worldviews coextensive with modern evolutionary theory itself design and purpose versus randomness and chance This book is for anyone seeking to understand the historical and philosophical roots of a controversy that still rages today This book contains an abridgement of Alfred Russel Wallace s *The World of Life* and Reverend John Mogens Mello s essay *The Mystery of Life and Mind* Michael A Flannery is Professor Emeritus UAB Libraries University of Alabama at Birmingham Professor Flannery has published extensively in medical history and bioethics winning the prestigious Edward Kremers Award in 2001 for distinguished writing by an American from the American Institute of the History of Pharmacy the Murray Gottlieb Prize in history by the Medical
