importance of the national content either IL RELEP's national key point reviews are a succinct compression of tested national principles and practices that comprise the national portion of state license exams from coast to coast. Our content is drawn from our own national textbook *Principles of Real Estate Practice*, one of the most widely used principles textbooks in the country. Finally, our national content as well as our question selection is further tailored to the state testing outline promulgated by PSI for Illinois. Thus, the breadth and depth of the law reviews and test questions reflect the topic emphasis of your state's testing service and your Illinois license exam.

A word about the test questions: IL RELEP's testing practice section consists of ten national practice tests, three state practice tests, and one state exam sample test. The practice tests are roughly 50 questions in length, and the sample test is 100 questions. The test questions are designed to cover the content covered by the law reviews, which reinforces your learning of the total body of information tested by your state exam. The questions are direct to the point and designed to test your understanding. When you have completed a given test, you can check your answers against the answer key in the appendix. You may also note that each question's answer is accompanied by a brief explanation or rationale to further reinforce your understanding. In the end, as you know, it's all up to you. Unlike other publications, we are not going to tell you that using this book will guarantee that you pass your state exam. It still takes hard work and study to pass. But we have done our best here to get you ready. Following that, the most we can do is wish you the best of success in taking and passing your Illinois real estate exam. So good luck!

Solaris 10 System Administration Part II Exam CX 310 202 Bill Calkins

In this book, you will learn Advanced Topics in Solaris 10 System Administration for SPARC and x86 based systems, including:

- Administering the network environment in Solaris 10
- Setting up RAID metadevices using SVM
- Configuring ZFS storage pools and file systems
- Configuring and administering Solaris zones and containers
- Administering virtual file systems and swap space
- Creating and administering user and Role Based access accounts (RBAC)
- Using advanced installation tools to install, clone, and upgrade the operating system.

Bill's original Cert Prep guides were used throughout Sun's service organization as the SEs studied for Certification. This was not mandated by Sun management but happened through word of mouth by those software engineers who had successfully passed the exam. In this new edition, Bill adds a chapter for ZFS. It includes Live Upgrade conversion to a ZFS root filesystem and Zone ZFS interoperation. Plus, all chapters have been updated to reflect the Solaris 10 10.08 enhancements. This new guide remains the best source of preparation for the Solaris 10 Cert exam.
