Carchemish in Context Edgar Peltenburg,T. J. Wilkinson,Eleanor Barbanes Wilkinson,2016-05-31 The city of Carchemish in the valley of the Euphrates river can be regarded as one of the iconic sites in the Middle East a mound complex known both for its own intrinsic qualities as the seat of later Hittite power and Neo Hittite kings but also because its history of excavations included well known historical figures such as Leonard Woolley and T E Lawrence However because of its location within the military zone of the Turkish Syrian border the site itself has been inaccessible to archaeologists for more than 90 years Carchemish in Context summarises the results of regional investigations conducted within the Land of Carchemish Project in Syria as well as other archaeological surveys in the region in order to provide a regional historical and archaeological context for the development of the city A synthesis of the history of Carchemish is presented and a regional overview of the Land of Carchemish as it is defined by archaeological features and key historical references through to the early Iron Age Insightful snapshots of the dynamics of an ancient state are revealed which can now be seen to have fluctuated dramatically in size throughout 700 800 years in part depending upon the power of the king of Carchemish or the aggressions of external powers The results from the Project provide an overview of the main trends of settlement in the region over 8000 years using a combination of survey databases to both north and south of the Syrian Turkish border and with a focus on the earlier phases of settlement from the Neolithic until the end of the Bronze Age when Carchemish became an outpost of the Hittite empire The Iron Age is a period blessed by numerous historical records some of which can be traced in the modern landscape Further chapters explore site specific aspects of the regional archaeology including a series of important sites on the Sajur river some of which were positioned along the main campaign routes of the Assyrian kings The close relationship between the nearby Early Bronze Age site of Tell Jerablus Tahtani and Carchemish are examined and the results from the 40 ha Carchemish Outer Town survey described providing important new data sources regarding the layout defenses and dates of occupation of this significant part of the city The Classical Roman Byzantine and Early Islamic occupations are also discussed in relation to what is known of occupation in the surrounding region

Excavations at Tepe Yahya, Iran 1967-1975 Peter Magee,Peter Grave,2004 Tepe

Yahya provides a stratigraphic sequence that stretches some 6 000 years from the Neolithic period to the early centuries AD. As a result the site is critical for understanding cultural processes in southeastern Iran. In this volume of results of the excavations at Tepe Yahya Peter Magee presents evidence from the Iron Age occupation of the site. Looking beyond the epigraphic and historical data and examining the insights provided by the artifactual record Magee describes how a small settlement located some distance from the main centers of power came into being and was affected by the emergence of the Achaemenid imperial system which stretched from Pakistan to Libya.

Palace Ware Across the Neo-Assyrian Imperial Landscape Alice M.W. Hunt, 2015-07-28. In *Palace Ware Across the Neo Assyrian Imperial Landscape* Alice Hunt investigates the social and symbolic meaning of Palace Ware by its cultural audience in the Neo Assyrian central and annexed provinces and the unincorporated territories including buffer zones and vassal states. Traditionally Palace Ware has been equated with imperial identity. By understanding these vessels as a vehicle through which interregional and intercultural relationships were negotiated and maintained she reveals their complexity gaining a more nuanced view of imperial dynamics. *Palace Ware Across the Neo Assyrian Imperial Landscape* is the first work of its kind providing in depth analysis of the formal and fabric characteristic production technology and raw material provenance of Palace Ware and locating these data within the larger narratives of power presentation symbol and meaning that shaped the Neo Assyrian imperial landscape.
