Rust, 2006 Roman small towns were an important link between the urban civitas capitals and the rural population and offer an ideal case study for examining the extent of Roman influence permeating into the rural provinces Thomas Rust's study looks at 67 Romano British sites including Alcester Bath Cambridge Dragonby Ilchester Richborough Rochester and Whitchurch exploring the extent to which they adopted and adapted to Roman cultural influences In particular Rust traces this Romanisation through changes in building traditions especially the shift from timber to masonry from the mid 2nd to early 3rd century The study includes a gazetteer of sites and lots of useful tables and illustrations The Archaeology of York: fasc. 1. Evans, 2009-08-27 Between 1989 and 1991 excavations in the parish of Flixborough North Lincolnshire unearthed remains of an Anglo Saxon settlement associated with one of the largest collections of artefacts and animal bones yet found on such a site In an unprecedented occupation sequence from an Anglo Saxon rural settlement six main periods of occupation have been identified dating from the seventh to the early eleventh centuries with a further period

of activity between the twelfth and fifteenth centuries AD The remains of approximately forty buildings and other structures were uncovered and due to the survival of large refuse deposits huge quantities of artefacts and faunal remains were encountered compared with most other rural settlements of the period Volume 2 contains detailed presentation of some 10 000 recorded finds over 6 000 sherds of pottery and many other residues and bulk finds illustrated with 213 blocks of figures and 67 plates together with discussion of their significance It presents the most comprehensive and currently unique picture of daily life on a rural settlement of this period in eastern England and is an assemblage of Europe wide significance to Anglo Saxon and early medieval archaeologists
