Gordon R. Willey and American Archaeology Jeremy A. Sabloff, William Leonard Fash, 2007 Gauging the impact of one scholar's contributions to modern archaeology Archaeological Investigations of the Northern Maya Highlands, Guatemala Robert James Sharer, David W. Sedat, 1987-01-29 Final report of the 1970-1974 research conducted in the Salama Valley, Baja Verapaz and adjacent areas of the highlands of Guatemala. The volume presents the results of the first comprehensive study of northern highland preclassic occupation and cultural development in light of the question of highland-lowland interaction and its role in the growth of Maya civilization. Understanding Early Large-Scale Collectives Justin Jennings, 2025-06-30 This volume brings together perspectives from different parts of the world that showcase the wide variety of practices, institutions, and ideologies that allowed for shared identities and coordinated actions across broad collectives. It shows that there are many ways that people can work together. How did the world's first large-scale collectives come into being? For much of our discipline's history, the answer was the state. People learned how to be part of a larger community via political, economic, and social scaffolding that tended to build from earlier ways of living in a region. This scaffolding was often wobbly and always under construction; its flexibility often a design strength rather than a flaw. This book demonstrates that violence and rulers often played pivotal roles in large-scale collectives, but so did gender complementarity, markets, ritual centers, fictive kinship, and egalitarianism. Earlier evolutionary approaches tended to obscure both the variability and malleability of earlier political forms in a desire to find ideal types hidden beneath cross-cultural noise. This volume's authors argue that this noise was politics in action and that there was no state or other kind of polity that was above the fray and divorced from the daily practices that brought people, animals, and other things together. A better understanding of early collective action strategies provides a richer understanding of past politics and, just as importantly, demonstrates governance alternatives for our contemporary society that struggles to address climate change, pandemics, and other pressing challenges. This book will interest archaeologists and historians as well as anyone who is curious about other ways that we can work together to solve common problems. The Ceramics of Tikal--Vessels from the Burials, Caches and Problematical Deposits T. Patrick Culbert, 1993-01-29 This monograph contains the illustrations and descriptions of ceramics from special deposits: the burials, caches, and problematical deposits from the central area of Tikal. These include the best-preserved whole vessels and elaborate polychrome-painted and stuccoed cylinders, urns, and tripod vessels with appliquéd and painted ornament and figural representations. Glyphs painted on some of these ceramics provide insights into the potentially royal lineage of the individuals. The ceramic sequence includes ten complexes dating between 800 B.C. (Middle Preclassic) and ca. A.D. 1200 (Postclassic). University Museum Monograph 81. **The Adorned Body** Nicholas Carter, Stephen D. Houston, Franco D. Rossi, 2020-09-01 How we dress our bodies through clothing, footwear, headgear, jewelry, haircuts, and more is key to the expression of status and identity. This idea was as true for ancient Maya civilization as it is today, yet few studies have

centered on what ancient Maya peoples wore and why In *The Adorned Body* Nicholas Carter Stephen Houston and Franco Rossi bring together contributions from a wide range of scholars leading to the first in depth study of Maya dress in pre Columbian times Incorporating artistic hieroglyphic and archaeological sources this book explores the clothing and ornaments of ancient Maya peoples systematically examining who wore what deducing the varied purposes and meanings of dress items and larger ensembles and determining the methods and materials with which such items were created Each essay investigates a category of dress including headgear pendants and necklaces body painting footwear and facial ornaments and considers the variations within each of these categories as well as popular styles and trends through time The final chapters reveal broader views and comparisons about costume ensembles and their social roles Shedding new light on the art and archaeology of the ancient Americas *The Adorned Body* offers a thorough map of Maya dress that will be of interest to scholars and fashion enthusiasts alike

**Ancient Maya** Arthur Demarest, 2004-12-09 In this new archaeological study Arthur Demarest brings the lost pre Columbian civilization of the Maya to life In applying a holistic perspective to the most recent evidence from archaeology paleoecology and epigraphy this theoretical interpretation emphasises both the brilliant rain forest adaptations of the ancient Maya and the Native American spirituality that permeated all aspects of their daily life Demarest draws on his own discoveries and the findings of colleagues to reconstruct the complex lifeways and volatile political history of the Classic Maya states of the first to eighth centuries He provides a new explanation of the long standing mystery of the ninth century abandonment of most of the great rain forest cities Finally he draws lessons from the history of the Classic Maya cities for contemporary society and for the ongoing struggles and resurgence of the modern Maya peoples who are now re emerging from six centuries of oppression

American Antiquity, 1977 Classic Maya Political History T. Patrick Culbert, 1996-03-29 This volume is the first to present in detail the results of recent decipherment of Maya hieroglyphic writing and to consider the implications of a Classic Maya written history Contributors examine the way in which the Maya elite created the kinship alliance warfare and ceremonial networks on which the civilization was founded

*Ocmulgee Archaeology, 1936-1986* David J. Hally, 2009-11-01 From 1933 to 1941 Macon was the site of the largest archaeological excavation ever undertaken in Georgia and one of the most significant archaeological projects to be initiated by the federal government during the depression The project was administered by the National Park Service and funded at times by such government programs as the Works Progress Administration Civilian Conservation Corps and Civil Works Administration At its peak in 1955 more than eight hundred laborers were employed in more than a dozen separate excavations of prehistoric mounds and villages The best known excavations were conducted at the Macon Plateau site the area President Franklin D Roosevelt proclaimed as the Ocmulgee National Monument in 1936 Although a wealth of material was recovered from the site in the 1930s little provision was made for analyzing and reporting it Consequently much information is still unpublished The sixteen essays in this volume were presented at a symposium to commemorate the fiftieth

anniversary of the founding of the Ocmulgee National Monument The symposium provided archaeologists with an opportunity to update the work begun a half century before and to bring it into the larger context of southeastern history and general advances in archaeological research and methodology Among the topics discussed are platform mounds settlement patterns agronomic practices earth lodges human skeletal remains Macon Plateau culture origins relations of site inhabitants with other aboriginal societies and Europeans and the challenges of administering excavations and park development

**Pulltrouser Swamp** B. L. Turner, Peter D. Harrison, 2014-09-10 Among Mesoamericanists the agricultural basis of the ancient Maya civilization of the Yucatan Peninsula has been an important topic of research and controversy Interest in the agricultural system of the Maya greatly increased as new discoveries showed that the lowland Maya were not limited to slash and burn technology as had been previously believed but used a variety of more sophisticated agricultural techniques and practices including terracing raised fields and perhaps irrigation Because of the nature of the data and because this form of agricultural technology had been key to explanations of state formation elsewhere in Mesoamerica raised field agriculture became a particular focus of investigation Pulltrouser Swamp conclusively demonstrates the existence of hydraulic raised field agriculture in the Maya lowlands between 150 B C and A D 850 It presents the findings of the University of Oklahoma s Pulltrouser Swamp Project an NSF supported interdisciplinary study that combined the talents of archaeologists anthropologists geographers paleobotanists biologists and zoologists to investigate the remains of the Maya agricultural system in the swampy region of northern Belize By examining soils fossil pollen and other plant remains gastropods relic settlements ceramics lithics and other important evidence the Pulltrouser Swamp team has clearly demonstrated that the features under investigation are relics of Maya made raised and channelized fields and associated canals Other data suggest the nature of the swamps in which the fields were constructed the tools used for construction and cultivation the possible crops cultivated and at least one type of settlement near the fields with its chronology This verification of raised fields provides dramatic evidence of a large and probably organized workforce engaged in sophisticated and complex agricultural technology As record of this evidence Pulltrouser Swamp is a work of seminal importance for all students and scholars of New World prehistory Classic Maya Polychrome Stucco Sculptures from Louisville, Belize Astrid Runggaldier, 2004 This work presents archaeological data assembled at the ancient Maya site of Louisville in northern Belize In addition to survey and mapping the project focused on two main goals to conduct salvage work in order to provide a chronology of the site through surface collection and testpit excavations and to recontextualize the finds from previous work at the site in particular by determining through excavation the original location of Thomas Gann s trenches and the source of the stucco heads now held at the British Museum and at Tulane University It describes the geographical location of Louisville and its environs introduces the history of research at the site describes the collections of stucco material from the British Museum and Tulane University in an annotated and illustrated catalog and combines this data with that recovered from the archaeological
