Face To Face With Levinas:

Face to Face with Levinas Richard A. Cohen, 2012-02-01 Face to Face with Levinas makes available to American readers the best of recent thought on Emmanuel Levinas. The contributors to this volume are some of the most significant and best known Levinas scholars in the United States and Europe: Maurice Blanchot, Luce Irigaray, Theodore De Boer, Adriaan Peperzak, Jan de Greef, Alphonso Lingis. Most notably, it features an interview with Levinas by Richard Kearney. This elaborate interview provides a succinct introduction to the themes developed within the book and allows Levinas to restate his philosophy in light of the criticisms that follow. The contributions range from the imaginative to the academic. Together, they provide a well-focused introduction to the ethical and ontological import of Levinas's philosophy.

Emmanuel Levinas's Face to Face Ethics Hwa Shin Lee, 2004 *Face to Face with Animals* Peter Atterton, Tamra Wright, 2019-05-01 Explores Levinas's approach to animal ethics from a range of perspectives. This is the first volume of primary and secondary source material dedicated solely to the animal question in Levinas. Drawing on previously unpublished material, including the recent discovery and digitization of the original French recording of an interview with Levinas that took place in 1986, it seeks to give fresh impetus to the debate surrounding the moral status of animals in Levinas's work. The book offers ten essays by leading scholars along with a general introduction that places Levinas's philosophy in the context of the growing field of animal ethics. The aim of the volume is to encourage dialogue on how we can extend Levinas's ethics beyond its traditional human confines and to spur further research on the opportunities and challenges it raises. Face to Face with Animals is an extraordinarily important and timely contribution. Although the question of the animal has weighed heavily upon Levinas scholars for more than two decades, it has not until now formed the subject of a book-length study. This volume rectifies that absence and proves to have been well worth the wait. It is more than scholarly; it is also in its own way a rousing call to thinking and acting otherwise in the face of the unsettling gazes of animal others and in the shadow of their useless suffering. Reading Levinas both with and against the grain, Face to Face with Animals makes clearer than ever that injustice is irreducible to inhumanity. David L. Clark, coeditor of *Intersections: Nineteenth Century Philosophy and Contemporary Theory*. This book contributes the most sustained and multifaceted engagement with Levinas on animals and animality to date. In particular, it makes an important and unique contribution to the interdisciplinary field of animal studies in which Levinas has long been a figure of great interest in light of the promise his ethics of alterity would seem to hold for developing an ethics that encompasses nonhuman animals. Karalyn Kendall, Morwick Washburn University.

The Face of Things Silvia Benso, 2000-06-01 Engages Levinas and Heidegger on the provocative issue of an ethics of things.

Psychotherapy for the Other George G. Sayre, George Kunz, Kevin C. Krycka, 2015 14 essays by a wide range of scholars and practitioners examine the interface between Emmanuel Levinas's philosophical thought and psychotherapy, highlighting a variety of issues such as the nature of language, the therapist-client relationship, domestic violence, post-traumatic stress disorder, motherhood.

social justice among others Provided by publisher **Managing Modernity** Matt Matravers,2013-09-13 In the last thirty years the USA and the UK have witnessed a profound change in the way in which we think about and respond to crime and social control Crime has become part of everyday life as for many citizens has imprisonment Managing Modernity brings together criminologists social theorists and philosophers to consider what explains these changes and what they tell us about ourselves and the way in which we live The authors consider the pervasive the obvious and the covert ways in which crime and social order have come to structure social discourses and social life from mass imprisonment to zero tolerance to on the spot fines This volume was previously published as a special issue of the Critical Review of International Social and Political Philosophy CRISPP René Girard and Creative Reconciliation Vern Neufeld Redekop,Thomas Ryba,2014-01-09 The contribution of this book to the field of reconciliation is both theoretical and practical recognizing that good theory guides effective practice and practice is the ground for compelling theory Using a Girardian hermeneutic as a starting point a new conceptual Gestalt emerges in these essays one not fully integrated in a formal way but showing a clear understanding of some of the challenges and possibilities for dealing with the deep divisions enmity hatred and other effects of violence By situating discourse about reconciliation within the context of Girardian thought it becomes clear that like Peter who vowed he would never deny Jesus but ended up doing it three times any of us is susceptible to the siren call of angry resentment and retaliation It is with a profound awareness of the power of violence that the emergence of mimetic discourse around reconciliation takes on particular urgency *The Care of Life* Miguel de Beistegui,Giuseppe Bianco,Marjorie Gracieuse,2014-12-22 This interdisciplinary collection of essays demonstrates how the ethical and political problems we are confronted with today have come to focus largely on life The contributors to this volume define and assess the specific meaning of life itself It is only by doing so that we can understand why life has become an all encompassing problem why all questions especially ethical and political have become vital questions We have reached a moment in history where every distinction and opposition is no longer in relation to life but within it and where life is at once a theoretical and practical problem This book throws light on this nexus of problems at the heart of contemporary debates in bioethics and biopolitics It helps us understand why and how life is understood valued cared for and framed today Taking a genuinely transdisciplinary approach these essays demonstrate how life is a multifaceted problem and how diverse the origins foundations and also consequences of bioethics and biopolitics therefore are **A Reasonable Belief** William Greenway,2015-09-11 Insofar as the essence of this philosophical spirituality is continuous with the essence of Christian spirituality I am able to specify how we can be utterly confident that it is wholly reasonable and good to affirm give thanks for life and testify to faith in God from the preface While it is clear that a lot of people believe in God whether they should is a matter of loud debate Since the Enlightenment and especially in the last 150 years a consensus has been building in Western philosophy that belief in a transcendent order and especially in a supreme being is unreasonable and should be abandoned The result of this trend has

been to delegitimize religious belief to claim that those who believe do so against scientific evidence and rational thought In this confident and sensitive book William Greenway carefully guides the reader through the developments in Western intellectual life that have led us to assume that belief is irrational He starts by demonstrating that along with belief in God modern definitions of human rationality have also rejected free will and moral agency He then questions the Cartesian assumption that it is our ability to think that makes us most human and most real Instead Greenway explains it is our capacity to be grasped by the lives and needs of others that forms the heart of who we are From that vantage point we can see that faith is not a choice we make in spite of evidence to the contrary it is rather wholly rational and in keeping with that which makes us most human Every person who either has faith or is contemplating faith can be assured that belief in God is both reasonable and good Greenway embraces both contemporary philosophy and science inviting readers into a more confident experience of their faith

Worldviews, Ethics and Organizational Life Michel Dion, 2021-11-24 This book provides an innovative way to revisit the depth and scope of our moral post moral worldviews while undertaking an ontic reflection about organizational life The ontic dimension of life refers to existing entities lived experiences It has nothing to do with psychological and relational processes The ontic level of analysis mirrors a philosophical outlook on organizational life Unlike moral worldviews post moral worldviews oppose the existence of Truth itself Post moral worldviews rather imply that dialogical relationships allow people to express their own truth claims and welcome others truth claims The purpose of this book is to explain the philosophical implications of moral and post moral worldviews and the way to move from a moral to a post moral worldview Moreover this book explores the possibility to transcend the moral post moral dualism through moral deliberation processes and a reinterpretation of the Presence of the Infinite in all dimensions of human life This book could eventually help to better grasp the basic philosophical challenges behind ethical reflection about organizational issues

Showdown in the Sonoran Desert Ananda Rose, 2012-05-01 This book offers reflections on a daunting and controversial ethical question How should we treat the strangers who enter this country illegally To understand the experience of those directly confronted by this problem Ananda Rose traveled to the Sonoran desert at the border between the U S and Mexico There she gathered opinions from Minutemen Border Patrol agents Catholic nuns humanitarian air workers left wing protestors ranchers and other ordinary citizens in southern Arizona She depicts the results of these interviews as two starkly opposed ideological perspectives that of religious activists who embrace a biblically inspired model of hospitality that stresses love of strangers and a borderless compassion and that of law enforcement which is concerned with safety security and strict respect for international borders

Accounting and Business Ethics Ken McPhail, Diane Walters, 2009-06-02 Despite the enormous impact of various accounting scandals on the accounting profession the general malaise amongst the profession more broadly and the significant legislative and institutional reforms that have taken place as a result there are still surprisingly few textbooks on accounting ethics This concise introductory text takes a broad view of ethics and accounting taking into account contemporary social trends such as globalization and terrorism Rather than delineating codes of professional conduct this text pushes the reader towards an understanding of the nature of ethical dilemmas and the factors that influence the ways in which accountants frame ethical questions The book is divided into two parts The first part focuses on developing thinking about the different kinds of ethical questions that could be posed in relation to accounting The second part focuses more explicitly on accounting practice exploring the ethical function of accounting in relation to the market economy ethics in relation to the accounting profession and the ethics of the international accounting harmonization project Accounting and Business Ethics is a compact introduction aimed at both students and practitioners who want to understand more about the ethics of accounting

Philosophy of Mind and Phenomenology Daniel O. Dahlstrom, Andreas Elpidorou, Walter Hopp, 2015-08-11 This volume identifies and develops how philosophy of mind and phenomenology interact in both conceptual and empirically informed ways The objective is to

demonstrate that phenomenology as the first personal study of the contents and structures of our mentality can provide us with insights into the understanding of the mind and can complement strictly analytical or empirically informed approaches to the study of the mind. Insofar as phenomenology as the study or science of phenomena allows the mind to appear, this collection shows how the mind can reappear through a constructive dialogue between different ways of understanding mentality.

In Search of Creative Commons: Crisis, Catastrophe, and Responsive Literature in India Dhritiman Chakraborty, Sanchayita Paul Chakraborty, Mukunda Mishra, 2024-12-18 This book contains selected papers presented at the international conference titled In Search of Creative Commons Crisis Catastrophe and Responsive Literature in India held at the Abid Ali Khan Centre for Digital Archive and Translation of Cultures, Gour Mahavidyalaya College from 31 August to 2 September 2023 in collaboration with the Department of English, Dr. Meghnad Saha College. The conference was funded by the Indian Council of Social Science Research (ICSSR). In this book, three basic questions are considered: First, as humans try to live in and through catastrophes and exceptional situations in the contemporary world, what new perspective can literature as a creative form offer for healing and restorative purposes? Second, what new idioms and narrative styles massive crises such as famine, partition, migration, the decimation of forests, rivers, and the disappearance of villages held up in creative articulations in colonial and postcolonial times in India. Can these representations be called responsive literature? Further, and this is the third major contention of this book, how can responsive literature be thought of as a conceptual category? What new transdisciplinary optic should be adopted to go beyond the limits of the literary and eventually include the non-literary? The objective of these discussions was to contribute to the larger discursive literature on disaster studies, which we believe has been excessively hegemonized by concepts from the West. By bringing in indigenous ideas from Bhasa, Sahitya, language and literature, the images of samaj, society, samata, equity, and ahimsa, non-violence, the existing literature on catastrophe and crisis studies can finally be decolonized.

Social Epistemology and Technology Frank Scalabrino, 2015-12-16 How has technology changed what it means to be human and to be a member of a human society? How has technology changed the way we acquire knowledge of the world we inhabit? In light of these changes and the direction we are moving, how should the pursuit of knowledge be organized? Social Epistemology and Technology provides insights into such questions relating to public self-awareness regarding technology. The concerns addressed in this book apply to a large and diverse audience, including but not limited to those interested in social epistemology, technology, cultural studies, trans-humanism, augmented subjectivity, futurology, human sciences, social sciences, political sciences, communication, psychology, science and technology studies, and philosophy. This is the first book of its kind to focus solely on technology and its socially specific epistemological themes. It offers insight into public self-awareness regarding technology by providing an understanding of persons in relation to the technological changes that have occurred and continue to occur across the societies they people.

Otherness in Literary and Intercultural Communication Cândido Oliveira Martins, Carmen Ramos Villar, Michela Graziani, 2024-10-15 Looking at both Lusophone literature and literatures from around the globe from the perspective of intercultural communication, this book addresses post-colonial literature, intercultural negotiations, and how multicultural debates are reflected in literary production. Topics addressed include mobility and its effects, be it through work, business, leisure, travel, or study; contact between countries, even within the boundaries of the country itself; migration or exile, be it by choice or by force. As a whole, the volume provides a comparative study of representations of intercultural communication in literature. The volume conceives literature broadly to include both traditional fictional and non-fictional prose and more recent genres like social media posts.
