Facial Diagno:

Facial Diagnosis for Everyone David Card, 2025-03-15 Facial diagnosis is the art of looking at a person's face to discover what organ system is not functioning properly or what disease process may be at work. Our face reflects the health of our body and when unwanted blemishes, lines, colors, etc. are present, these may be signs of disfunction. The health of the body is dependent upon our organs, which reflects in our face. All things are connected inside and out; each part of our body, organs, tissues, is connected with our emotional state as well. So emotions are also revealed in the face. It's like anything else we just have to look closer to see what's there. As a society, we tend to be over concerned with appearance. Using modern technology, doctors can remove superficial blemishes through laser treatments, creams, injections, and even surgeries. Often people are dissatisfied with these treatments as the problem tends to resurface in the same spot. It's important to remove the cause of the facial signs naturally through good nutrition and using natural supplements for support. Improving overall health and well-being reduces the cause of our facial signs, the internal disfunctions, and will negate the need for facial surgeries or treatments except in the case of injuries. While diet is important, the natural supplements indicated in this book are quite effective in supporting organ function as well as mental/emotional health. They include herbs, homeopathic medicines, and cell salts for mineral deficiency. The cell salt explanations will add a different perspective on physical, emotional, or mental symptoms as well. Using these and other personal care tools will help balance and support organ function for better overall health. The Chinese diagnosing perspective of the face is a tool they have used for thousands of years. Their concept of the associated organs is somewhat different than the western point of view. However, they do not rely upon facial diagnosis alone for the final assessment of a disease. There are other body diagnostic tools available from several other cultures and masters' experiences. Some of the facial or body signs may or may not equate to a medical diagnosis. The Facial Diagnosis Book facial renderings are the extremes and don't represent a normal face. An average face may present several layers of organ weakness. This perspective of the face provides hints that must be taken with other signs and symptoms to determine the course to follow.

Facial Diagnosis of Cell Salt Deficiencies David Card, 2020-05-15 The condition of facial skin is a primary indicator of overall bodily health. Deficiencies in diet and metabolism, together with disease conditions, are easily observed in the face if one knows what to look for. This book is about how to read the face to determine which essential cell salts, also known as tissue salts, are lacking in the body. When a diagnosis is determined, the patient can then remedy that condition by supplementing with the proper cell salt. Cell salts/tissue salts exist in every human body. These are the inorganic biochemical elements found in the blood and tissues. They are the builders and the catalysts for many essential processes. For example, most people may have heard of potassium chloride, but few realize that it is a tissue salt, cell salt, essential to the digestive process. This salt unites with hydrogen to form HCL (hydrochloric acid), which aids in the production of bile, serves as an alkalizer, and helps in digestive enzyme formation. Therefore, it is a dynamic component of health. Twelve cell salts were

identified in the 1850s by European scientists and this knowledge was soon added to the materia medica of physicians and practitioners throughout Europe Today homeopathic practitioners and naturopathic doctors in the United States and other countries are beginning to revive the use of cell salt supplementation in successfully treating a spectrum of disease conditions This book instructs the practitioner or the patient in How to Read the Face This book complete with illustrations guides the practitioner in what to look for in the face Such cues as skin color condition of eyebrows size and color of lips musculature of the face blemishes and inflammations the circles around or under the eyes and many other characteristics betray the excesses and deficiencies at work in the body How to Use Cell Salts Detailed explanations are given to each of the twelve cell salts which interestingly correspond to the twelve signs of the zodiac Extensive lists are supplied of various disease or imbalance conditions that can be helped by cell salt supplementation **Clinical Facial Analysis** Fabio Meneghini, Paolo Biondi, 2012-04-12 This richly illustrated book presents a straightforward non instrumental method of clinical facial analysis in preparation for aesthetic surgery orthognathic surgery and orthodontic treatments After discussion of various practical aspects of facial examination and photography analysis of different regions of the face and dentofacial deformities is discussed in a series of detailed chapters At the end of each of these chapters multiple choice checklists are included that will help the reader to perform step by step regional analysis Important features of the book are its multidisciplinary approach and the emphasis placed on the relationship between different parts of the face This second edition has been thoroughly updated and includes a new chapter on recording and documentation relating specifically to aesthetic facial surgery *Facial Nerve Disorders and Diseases: Diagnosis and Management* Orlando Guntinas-Lichius, Barry M. of facial shape **The End of Medicine** Kaare Bursell,2009-01-29 At the tender age of 15 the author set out to discover the answers to two questions What is disease and What does disease signify His quest began in 1966 when he enrolled in the School of Veterinary Medicine and Science at the University of Liverpool After 5 years of study he then worked as a Veterinary Clinician and Surgeon in large animal practice for 8 years This experience did not answer the questions In 1975 he began living thinking and eating according to macrobiotic principles and philosophy and as he did the answers to these questions began to become clearer In 1982 he discovered the work of Rudolf Steiner and as he began to study his lecture cycles and books the answers became revealed The End of Medicine is the result of over 40 years of study experience and learning working with thousands of sick individuals from all walks of life The contents of the book describe how and why illnesses develop what illness signifies and makes a distinction between illness disease and health The crucial significance of the digestive processes of assimilation and elimination in the onset of illnesses and recovery of health are described in detail The book thus fulfils the indication given by Rudolf Steiner in a lecture given in 1923 where he says a modern system of medicine must always take the metabolic system that is to say the normal processes of digestion as its point of departure and starting from there it must deduce how internal illnesses in the widest possible sense can arise from the metabolism In addition the book contains instruction on how to do self diagnosis and then gives the reader speaking imaginatively a pair of new legs a compass and a map The reader who is sufficiently inspired can then learn to use the new pair of legs comprising a change to a macrobiotic way of eating and doing the ginger compress regimen described learning how to use the compass yin and yang theory and use the map contained in the latter chapters to explore the new territory which opens up before us as we do so **Innovations in Plastic and Aesthetic Surgery** Marita Eisenmann-Klein,Constance
