Facilitating Interpersonal Relationships In The Classroom The Relational Literacy Curriculum:

Facilitating Interpersonal Relationships in the Classroom Diane Salmon, Ruth Ann Freedman, 2002 This volume is a guide to using the Relational Literacy Curriculum with children in grades 2-5. Based on developmental and social constructivist principles, this curriculum presents a conceptual framework and a method for enhancing children's understanding of interpersonal relationships in the classroom. The Relational Literacy Curriculum offers a powerful method for children to reflect on challenging interpersonal episodes and to discern constructive patterns of relating through discussion and role play. It provides a process that can serve as both a prevention tool and a vehicle for managing immediate conflict, gives teachers a strong theoretical framework from which they can make principled decisions, and a flexible format for implementing it that they can adapt to meet the particular social needs of their classroom context and promotes teacher reflection and learning through the use of various observational tools. This book addresses the question of why it is important to study relationships in the elementary classroom, reviews the research and literature that inform the relational literacy curriculum, lays out the process of the curriculum, explains how the curriculum can be used to address real conflicts within the classroom community, and provides guiding principles for practice. It is a useful resource for classroom teachers, school psychologists, school counselors, and social workers, and a valuable text for a range of courses including classroom management, psycho-social interventions, child development, and early childhood education.

The Relational Leader Yi-Hwa Liou, Alan J. Daly, 2023-11-16

Highlighting leadership from a social and relational perspective, this book has a particular emphasis on the innovative role that social networks play in systems change. The social systems engaged in this volume cut across a wide array of stakeholder groups ranging from student learners, pre-service in-service teachers, administrators, community leaders, and out to organizations and communities that reflect well beyond the education sector, showcasing diverse perspectives from multiple areas and international settings. Bringing together 32 distinguished scholars from Australia, Canada, Germany, Hong Kong, New Zealand, Norway, Spain, Taiwan, the UK, and the USA, this book explores the use of social networks in education across different contexts and settings, connecting it with leadership practice that works at these settings for change. The contributors also examine online and virtual social behaviors and their connections to face-to-face networks. Ultimately, the volume showcases that leadership is social influence through examining a variety of social systems through social relationships. In addition to the breadth of studies connecting innovative leadership research to practice in this volume, the contributors also explore a new area of social networks and leadership by examining online and virtual social behaviors and their connections to face-to-face networks. Ultimately, the selected chapters in this volume make the point that leadership is social influence through examining a variety of social systems through social relationships.

International Perspectives on Knowledge Integration Thomas Lehmann,2020-05-18 Interest in knowledge integration grew considerably in recent years particularly within the realm of pre service teacher education However studies on the topic conceptualize knowledge integration in diverse ways For example it may be conceived as a specific coherence building learning process which involves not only acquiring but interrelating knowledge of different types e g theoretical and practical or from different domains which together constitute a teacher s or educational specialist s professional knowledge base e g content knowledge pedagogical knowledge pedagogical content knowledge knowledge about using technologies for learning and instruction etc Furthermore knowledge integration also refers to the meaningful application of knowledge of different types and from various domains in order to act professionally and to teach successfully In many countries however future teachers and educational specialists often struggle with knowledge integration because the task of integrating knowledge across domains from various courses and from practical training is left largely to the individuals Thus the efficacy and quality of higher education programs particularly in pre service teacher education could be improved through careful attention to knowledge integration International Perspectives on Knowledge Integration aims at facilitating the consideration of knowledge integration in teacher training and higher education in both research and practice Specifically it explores theoretical conceptions and methods and reports on original research and good practices for fostering knowledge integration It is thus of interest to researchers faculty board members and lecturers concerned with teacher training and higher education as well as to student teachers and students of pedagogy education and educational psychology
