Facing Up Paying Our Nations Debt And Saving Our Childrens Future:

Payment Due Timothy J Penny, 2018-02-12 The generational wars are about to begin competing for entitlements wrestling over taxes dancing around the deficit Today s children and grandchildren are tomorrow s taxpayers and social fabric The authors of *Payment Due* contend that our current policies of federal overspending are setting those children up for economic disaster Former Representative Tim Penny D MN knows how volatile the politics of the situation are he retired because he couldn t locate in Congress at large the institutional will or stomach to deal with the issues squarely Political scientist Steven Schier understands the way in which the politics work against economics to solve the problem Together they take us inside the Capitol corridors to show us the lobbying arm twisting and pork barrel politicking that goes on to derail policies designed to reduce the federal deficit We get to play the Washington Monument game along with the worst of the offenders and to see firsthand how three schools of deficit thought the wolves pussycats and termites approach the prospect of cutting back federal outlays and weaning the great middle class from its own welfare dependency A hallmark of the book is its three tiered set of long term entitlement reform proposals complete with careful documentation of the contribution each recommended item makes toward reducing the federal deficit or at least slowing its increase Along with suggested short term plans these proposals give students the opportunity to try to solve both short and long term problems Students will appreciate the timeliness and relevance of the book s argument to their generation s future plight and all readers will benefit from the clear presentation of complex economic concepts and arguments essential to understanding the federal deficit debate and to confronting the political social and moral payments now coming due *The State of the Nation* Derek Curtis Bok, 1998 The author shows that although Americans are better off today in most areas than they were in 1960 they have performed poorly compared with other leading industrial nations *Unretirement* Chris Farrell, 2014-09-02 The budget battles of recent years have amplified the warnings of demographic doomsayers who predicted that a wave of baby boomers would bleed America dry bankrupting Social Security and Medicare as they faded into an impoverished old age On the contrary argues award winning journalist Chris Farrell we are instead on the verge of a broad positive transformation of our economy and society The old idea of retirement a word that means withdrawal describing a time when people gave up productive employment and shrank their activities was a short lived historical anomaly Humans have always found meaning and motivation in work and community Farrell notes and the boomer generation poised to live longer in better health than any before is already discovering unretirement extending their working lives with new careers entrepreneurial ventures and volunteer service Their experience wisdom and importantly their continued earnings will enrich the American workplace treasury and our whole society in the decades to come *Unretirement* not only explains this seismic change now in its early stages it provides key insights and practical advice for boomers about to navigate this exciting but unsettled new frontier drawing on Chris Farrell s decades of covering personal finance and economics for Bloomberg Businessweek and

Marketplace Money This will be an indispensable guide to the landscape of unretirement from one of America's most trusted experts

Building a Win-Win World Hazel Henderson, 1997-10 In *Building a Win Win World* world renowned futurist Hazel Henderson extends her twenty five years of work in economics to examine the havoc the current economic system is creating at the global level Markets are now spreading worldwide a spread which is often equated with the hope of democracy spreading along with it But markets still run on old textbook models that ignore social and environmental costs leading to a new kind of warfare global economic warfare *Building a Win Win World* demonstrates how the global economy is unsustainable because of its negative effects on employees families communities and the ecosystem Henderson shows that win win strategies can become the norm at every level when people see the true current and future costs of short sighted narrow economic policies Henderson shows how humans are encountering the endgames of the competition conflict paradigm and identifies the signs of transition Using warfare as a metaphor for the dark side of today's world economic system she shows how both are destructive inhumane wasteful irrational inefficient competitive and crisis driven Both create more new problems than they solve She describes how the globalization of the war system technology and industrialization brought the Cold War to a dead end By the mid 1980s the global warfare paradigm had given ground to a global economic warfare which many economists politicians and business leaders hailed as a victory of capitalism and competitive free markets Yet this new type of warfare proved little better than the military warfare it was advertised to replace By the mid 1990s global economic warfare had already reached crisis points of its own *Building a Win Win World* examines how jobs education health care human rights democratic participation socially responsible business and environmental protection are all sacrificed to global competitiveness Henderson shows many ways out of the dilemmas faced by all countries New agreements are described to tame the global economic casino regulate multi national corporations and levy fees for commercial use of global common resources oceans atmosphere space etc and tax their abuse These revenues can then be invested in civilian needs and sectors worldwide She also describes a trend toward grassroots globalism citizens movements that are addressing poverty social inequities pollution resource depletion violence and wars Grassroots globalism she says is about thinking and acting globally and locally It is pragmatic problem solving implementing local solutions that keep the planet in mind Such social innovations can raise the ethical floor under the global playing field so that the most ethical companies and countries can win

The Trouble with Government Derek Curtis Bok, 2001 The author of *State of the Nation* seeks to determine the main reasons for the failings and frustrations associated with government and offers concrete steps that Americans can take to become politically engaged and to help the United States to improve its performance
