Fact and Relevance M. M. Postan, 1971 **Fact and Relevance** M. M. Postan, 1971 *The Palgrave Companion to Cambridge Economics* Robert A. Cord, 2017-02-20 Cambridge University has and continues to be one of the most important centres for economics With nine chapters on themes in Cambridge economics and over 40 chapters on the lives and work of Cambridge economists this volume shows how economics became established at the university how it produced some of the world's best known economists including John Maynard Keynes and Alfred Marshall plus Nobel Prize winners such as Richard Stone and James Mirrlees and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast this volume provides economists especially those interested in macroeconomics and the history of economic thought with the first in depth analysis of Cambridge economics **Storia della storiografia**, 2008 **Methodology and Method in History (RLE Accounting)** Lee Parker, Finley Graves, 2013-12-04 This bibliography provides the reader with a comprehensive reference tool that will enhance understanding of methodological issues and enable the user to employ research methods appropriate to their subject of study It also provides accounting historians a comprehensive data base for the development of papers addressing methodological issues in an accounting history context Access to this type of resource is particularly crucial to the development of accounting history research since the number of papers dealing with methodological issues published in accounting history literature is very small Hence the references in this bibliography are drawn from the literature of general history economic and business history legal and social history and philosophy The scope and range of its contents are broad references are taken from texts as well as papers published in over 450 journals **Deconstructing Sport History** Murray G. Phillips, 2012-02-01 This groundbreaking collection challenges the accepted principles and practices of sport history and encourages sport historians to be more adventurous in their representations of the sporting past in the present Encompassing a wide range of critical approaches leading international sport historians reflect on theory practice and the future of sport history They survey the field of sport history since its inception examine the principles that have governed the production of knowledge in sport history and address the central concerns raised by the postmodern challenge to history Sharing a common desire to critique contemporary practices in sport history the contributors raise the level of critical analysis of the production of historical knowledge provide examples of approaches by those who have struggled with or adapted to the postmodern challenge and open up new avenues for future sport historians to follow **A Marginal Economy?** Mark Bailey, 1989-06-29 A theory of the margin has long featured in the work of medieval historians Marginal regions are taken to be those of poor soil or geographical remoteness where farmers experienced particular difficulties in grain production It is argued that such regions were cultivated only when demographic pressure intensified in the thirteenth century but that a combination of soil exhaustion and demographic decline resulted in severe economic contraction by the

end of the fourteenth century Marginal regions are seen not just as sensitive barometers of economic change but as important catalysts in that change Despite the importance placed by historians on the general theory of the margin this book represents the first detailed study of a marginal region It focuses upon East Anglian Breckland whose blowing sands are among the most barren soils in lowland England Drawing upon a wide range of sources this study reconstructs Breckland s late medieval economy and shows it to be more diversified and resilient than the stereotype depicted in marginal theory

Love, Hate, and the Law in Tudor England L. R. Poos, 2022 Love Hate and the Law in Tudor England reconstructs the life of Ralph Rishton a member of the sixteenth century Lancashire gentry who was a child bridegroom and a serial wife discarder who bribed church officials to obtain a forged annulment defrauded a kinsman out of his inheritance and adroitly manipulated his own and other people s land The dozens of lawsuits in which the Rishtons were involved in many different courts elucidate one family s engagement with law in Tudor England how they used and misused law how it shaped their perceptions of rights and mutual obligations and how it framed litigants and witnesses language Drawing upon trial and estate records the core of this study is the central narrative of Ralph Rishton s three wives of litigiousness and violence marriage and property and the pursuit of equitable resolutions to disputes along with countless smaller narratives that vividly capture a culture in its time and place Alongside that central narrative L R Poos uses the Rishton stories as a starting point to analyse child marriage the construction of memory and the development of local historical identity through antiquarians and the Victorian and Edwardian local press demonstrating how from the time of the Rishtons into the twentieth century historical narratives were continually reshaped and repurposed

The Idea of History in Constructing Economics Michael H. Turk, 2015-08-11 How scientific is economics This question has often been framed by analogies and correspondences made between economics and other seemingly more well established scientific disciplines starting with classical mechanics At the same time economics is likely to be seen in opposition to or in contrast with history where the reliance upon generalizing rules thought experiments and model construction in economics is set against the amassing of particular facts intended to create narratives in history In this new volume Turk explores the relationship between economics and history including the often fraught one between economics and economic history making the case that economics does in fact require the proper grounding in history that has so often been ignored This work challenges the attempt to link economics with other more clearly scientific disciplines as flawed and fundamentally wrongheaded A key element of this book is its examination of the gaps and associations that exist in or are seen through linkages with thermodynamics classical mechanics biology literature mathematics philosophy and sociology This exploration is frequently undertaken through study of the work of one or more major figures in the history of economic thought ranging from Quesnay and Smith through Walras and Max Weber to Robinson Krugman David and Arthur Through the possibility of an alternative to the gaps noted in each such comparison the underlying necessary connection between economics and

history can be brought out The book concludes by exploring the basis for the positive construction of a historical economics This book is suited for those who study history of economic thought and philosophy of economics A History of Financial Accounting (RLE Accounting) J. Edwards,2013-12-04 This volume deals with the evolution of accounting from earliest times and gives particular attention to corporate accounting developments since the Industrial Revolution The author identifies the various sources of accounting practices employed by British companies to demonstrate the main changes which have taken place when they occurred and why The author emphasises the need to understand the legal social and economic context in which accountancy changes take place and also studies the conflicts which arise between suppliers and users of accounting statements The study concludes with an examination of the duties performed by the professional accountant the extent to which these have changed in the course of time and how his position in society is reinforced by the activities of professional institutions England 1175-1425 Edmund King,2025-05-01 During the years 1175 1425 English society developed in many ways First published in 1979 England 1175 1425 offers an ideal introduction to the period presenting as it does a view of a whole society that is derived from a study of economic social political and administrative history It argues that the later Middle Ages in England saw the creation of a single integrated society with a national economy and a national political consciousness and it shows how this integration came about The foundations of a unified community are seen in chapters on settlement on lordship and on the world of ideas while the development of this community is seen in chapters on political and social themes The author describes how parliament became the political focus of the nation and stresses the importance of warfare and war taxation in this development Original features of the book are the integration into a general survey of work on medieval archaeology and a chapter on ideas which uses a wide range of material to present a picture of the attitudes which governed men s lives The Peasants Revolt of 1381 demonstrates especially clearly the argument that all classes of society shared similar ideas and the episode is examined in detail There is an emphasis throughout on quotations from original sources and these together with the illustrative matter provide a clear picture of a society in a period of change

Town and Countryside in Western Berkshire, C.1327-c.1600 Margaret Yates,2007 A fresh examination of how society and economy changed at the end of the middle ages comparing urban and rural experience The traditional boundary between the medieval and early modern periods is challenged in this new study of social and economic change that bridges the fifteenth and sixteenth centuries It addresses the large historical questions what changed when and why through a detailed case study of western Berkshire and Newbury integrating the experiences of both town and countryside Newbury is of particular interest being a rising cloth manufacturing centre that had contacts with London and overseas due to its specialist production of kerseys The evidence comes from original documentary research and the data are clearly presented in tables and graphs It is a book alive with the actions of people famous men such as the clothier John Winchcombe known as Jack of Newbury but more notably by the hundreds of individuals such as William Eyston or Isabella Bullford who acquired

property cultivated their lands or in the case of Isabella managed the mill complex after her husband's death MARGARET YATES is Lecturer in History at the University of Reading

Methods of Social Study Sidney Webb, Beatrice Webb, 1975-10-23 In this book Sidney and Beatrice Webb describe in detail how they conducted their investigations into social history and institutions

The Institutional Framework of Russian Serfdom Tracy Dennison, 2011-04-28 Russian rural history has long been based on a Peasant Myth originating with nineteenth century Romantics and still accepted by many historians today In this book Tracy Dennison shows how Russian society looked from below and finds nothing like the collective redistributive and market averse behaviour often attributed to Russian peasants On the contrary the Russian rural population was as integrated into regional and even national markets as many of its west European counterparts Serfdom was a loose garment that enabled different landlords to shape economic institutions especially property rights in widely diverse ways Highly coercive and backward regimes on some landlords estates existed side by side with surprisingly liberal approximations to a rule of law This book paints a vivid and colourful picture of the everyday reality of rural Russia before the 1861 abolition of serfdom

Poverty, Gender and Life-Cycle Under the English Poor Law, 1760-1834 Samantha Williams, 2013 Examination of welfare during the last years of the Poor Law bringing out the impact of poverty on particular sections of society the lone mother and the elderly Social welfare increasingly extensive during the seventeenth and eighteenth centuries was by the first third of the nineteenth under considerable and growing pressure during a crisis period when levels of poverty soared This book examines the poor and their families during these final decades of the old Poor Law It takes as a case study the lived experience of poor families in two Bedfordshire communities Campton and Shefford and contrasts it with the perspectives of other participants in parish politics from the magistracy to the vestry and from overseers to village ratepayers It explores the problem of rising unemployment the provision of parish make work schemes charitable provision and the wider makeshift economy together with the attitudes of the ratepayers That gender and life cycle were crucial features of poverty is demonstrated the lone mother and her dependent children and the elderly dominated the relief rolls Poor relief might have been relatively generous but it was not pervasive child allowances in particular were restricted in duration and value and it by no means approximated to the income of other labouring families Poor families must either have had access to additional resources or led meagre lives Samantha Williams is a university lecturer in local and regional history at the Institute of Continuing Education Cambridge and a Bye Fellow in History Girton College Cambridge

Custom and Commercialisation in English Rural Society J. Bowen, A. Brown, 2016-03-01 English rural society underwent fundamental changes between the thirteenth and eighteenth centuries with urbanization commercialization and industrialization producing new challenges and opportunities for inhabitants of rural communities However our understanding of this period has been shaped by the compartmentalization of history into medieval and early modern specialisms and by the debates surrounding the transition from feudalism to capitalism and landlord tenant relations Inspired by the classic works of Tawney

and Postan this collection of essays examines their relevance to historians today distinguishing between their contrasting approaches to the pre industrial economy and exploring the development of agriculture and rural industry changes in land and property rights and competition over resources in the English countryside
