Factories In The Field The Story Of Migratory Farm Labor In California:

Factories in the Field Carey McWilliams, 2000-04-15 This book was the first broad exposé of the social and environmental damage inflicted by the growth of corporate agriculture in California. *Factories in the Field* together with the work of Dorothea Lange, Paul Taylor, and John Steinbeck dramatizes the misery of the dust bowl migrants hoping to find work in California agriculture. McWilliams starts with the scandals of the Spanish land grant purchases and continues on to examine the experience of the various ethnic groups that have provided labor for California's agricultural industry: Chinese, Japanese, Mexicans, Filipinos, Armenians, the strikes, and the efforts to organize labor unions. *Factories in the Field* Carey

Taylor, Diane Charlton, 2018-11-29 *The Farm Labor Problem: A Global Perspective* explores the unique character of agricultural labor markets and the implications for food production, farm worker welfare, and advocacy and immigration policy. Agricultural labor markets differ from other labor markets in fundamental ways related to seasonality and uncertainty, and they evolve differently than other labor markets as economies develop. We weave economic analysis with the history of agricultural labor markets using data and real world events. The farm labor history of California and the United States is particularly rich, so it plays a central role in the book, but the book has a global perspective ensuring its relevance to Europe and high income Asian countries. The chapters in this book provide readers with the basics for understanding how farm labor markets work: labor in agricultural households, models of farm labor supply and demand, spatial market equilibria, farm labor and immigration policy, farm labor organizing, farm employment, and rural poverty, unionization, and the United Farm Workers movement, the Fair Food Program as a new approach to collective bargaining, the declining immigrant farm labor supply, and what economic development in relatively low income countries portends for the future of agriculture in the United States and other high income countries. The book concludes with a chapter called *Robots in the Fields* which extrapolates current trends to a perhaps not so distant future. *The Farm Labor Problem* serves as both a guide to policy makers, farmworker advocates, and international development organizations, and as a textbook for students of agricultural economics and economics.

Describes the unique character of agricultural labor markets, providing consequential insights. Contextualizes the economics of agricultural labor with a global perspective. Examines the history of farm labor, immigration policy, and collective bargaining with a view to the future. *California Exposures: Envisioning Myth and History* Richard White, 2020-03-17

Winner of the 2021 California Book Award, Californiana category. A brilliant California history in word and image from an award-winning historian and a documentary photographer. This is the West, sir. When the legend becomes fact, print the legend. This indelible quote from *The Man Who Shot Liberty Bells* applies especially well to California, where legend has so

thoroughly become fact that it is visible in everyday landscapes. Our foremost historian of the West, Richard White, never

content to print the legend collaborates here with his son a talented photographer in excavating the layers of legend built into California's landscapes Together they expose the bedrock of the past and the history they uncover is astonishing Jesse White's evocative photographs illustrate the sites of Richard's historical investigations A vista of Drakes Estero conjures the darkly amusing story of the Drake Navigators Guild and its dubious efforts to establish an Anglo Saxon heritage for California The restored Spanish missions of Los Angeles frame another origin story in which California's native inhabitants civilized through contact with friars gift their territories to white settlers But the history is not so placid A quiet riverside park in the Tulare Lake Basin belies scenes of horror from when settlers in the 1850s transformed native homelands into American property Near the lake bed stands a small marker commemorating the Mussel Slough massacre the culmination of a violent struggle over land titles between local farmers and the Southern Pacific Railroad in the 1870s Tulare is today a fertile agricultural county but its population is poor and unhealthy The California Dream lives elsewhere The lake itself disappeared when tributary rivers were rerouted to deliver government subsidized water to big agriculture and cities But climate change ensures that it will be back the only question is when

Beasts of the Field Richard Steven Street, 2004 Written by one of America's preeminent labor historians this book is the definitive account of one of the most spectacular captivating complex and strangely neglected stories in Western history the emergence of migratory farmworkers and the development of California agriculture Street has systematically worked his way through a mountain of archival materials more than 500 manuscript collections scattered in 22 states including Spain and Mexico to follow the farmworker story from its beginnings on Spanish missions into the second decade of the twentieth century The result is a comprehensive tour de force Scene by scene the epic narrative clarifies and breathes new life into a controversial and instructive saga long surrounded by myth conjecture and scholarly neglect With its panoramic view spanning 144 years and moving from the US Mexico border to Oregon **Beasts of the Field** reveals diverse patterns of life and labor in the fields that varied among different crops regions time periods and racial and ethnic groups Enormous in scope packed with surprising twists and turns and devastating in impact this compelling revelatory work of American social history will inform generations to come of the history of California and the nation

Agrarian Crisis in the United States Anthony Pahnke, 2023-04-14 From fragile corporate controlled supply chains breaking down to millions of already hyper exploited farmworkers risking their lives in the fields without basic personal protective equipment the COVID 19 pandemic made it painfully obvious that US agriculture does not work **Agrarian Crisis in the United States** Pathways for Reform situates the many food system problems that the COVID 19 pandemic laid bare in historical context across four key policy areas namely in land labor markets and the environment In applying and building from the work of Jürgen Habermas **Agrarian Crisis in the United States** highlights how deep seated problems concerning systemic racism economic inequality and political legitimacy endanger the US food and farm system's future Besides analyzing crises it presents solutions that would make agriculture in the United States more just and resilient

through the implementation of certain communication and policy strategies Its original argument as well as a novel set of remedies will appeal to scholars and activists with interests in agrarian studies environmental policy and social movements

Capitalist Colonial Matan Kaminer,2024-11-26 For decades the agricultural settlements of Israel s arid Central Arabah prided themselves on their labor Zionist commitment to abstaining from hiring outside labor But beginning in the late 1980s the region s agrarian economy was rapidly transformed by the removal of state protections a shift to export oriented monoculture and an influx of disenfranchised ill paid migrants from northeast Thailand Isaan Capitalist Colonial Matan Kaminer s ethnography of the region and its people argues that the paid and unpaid labor of Thai migrants has been essential to resolving the clashing demands of the bottom line and Zionist ideology here as elsewhere in Israel s farm sector Kaminer s account mobilizes capitalism and colonialism as a combined analytical frame to comprehend the forms of domination prevailing in the Arabah Placing the findings of fieldwork as a farm laborer within the ecological economic and political histories of the Arabah and Isaan Kaminer draws surprising connections between the violent takeover of peripheral regions the imposition of agrarian commodity production and the emergence of transnational labor flows Insisting on the liberatory possibilities immanent in the interaction ideologies found among both migrant workers and settler employers and raising the question of the place of migrants who are neither Jewish nor Arab in visions of decolonization this book demonstrates anthropology s ongoing relevance to the struggle for local and global transformations

What Can We Learn from the Great Depression? Dana Frank, 2024-10-08 4 stories of resilience mutual aid and radical rebellion that will transform how we understand the Great Depression Drawing on little known stories of working people What Can We Learn from the Great Depression amplifies voices that have been long omitted from standard histories of the Depression era In four tales Professor Dana Frank explores how ordinary working people in the US turned to collective action to meet the crisis of the Great Depression and what we can learn from them today Readers are introduced to the 7 daring Black women who worked as wet nurses and staged a sit down strike to demand better pay and an end to racial discrimination the groups who used mutual aid cooperatives eviction protests and demands for government relief to meet their basic needs the million Mexican and Mexican American repatriados who were erased from mainstream historical memory while often fictitious white Dust Bowl migrants became enshrined the Black Legion a white supremacist fascist organization that saw racism antisemitism anti Catholicism and fascism as the cure to the Depression While capitalism crashed during the Great Depression racism did not and was in fact wielded by some to blame

and oppress their neighbors Patriarchy persisted too undermining the power of social movements and justifying women s marginalization within them For other ordinary people collective action gave them the means to survive and fight against such hostilities What resulted were powerful new forms of horizontal reciprocity and solidarity that allowed people to provide each other with the bread beans and comradeship of daily life The New Deal when it arrived provided vital resources to many but others were cut off from its full benefits especially if they were women or people of color What Can We Learn from the Great Depression shows us how we might look to the past to think about how we can shape the future of our own failed economy These lessons can also help us imagine and build movements to challenge such an economy and to transform the state as a whole in service to the common good without replicating racism and patriarchy **California** Kevin

Kopp,2016-09-06 Hoptopia argues that the current revolution in craft beer is the product of a complex global history that converged in the hop fields of Oregon s Willamette Valley What spawned from an ideal environment and the ability of regional farmers to grow the crop rapidly transformed into something far greater because Oregon farmers depended on the importation of rootstock knowledge technology and goods not only from Europe and the Eastern United States but also from Asia Latin America and Australasia They also relied upon a seasonal labor supply of people from all of these areas as a supplement to local Euroamerican and indigenous communities to harvest their crops In turn Oregon hop farmers reciprocated in exchanges of plants and ideas with growers and scientists around the world and of course sent their cured hops into the global marketplace These global exchanges occurred not only during Oregon s golden era of hop growing in the late nineteenth and early twentieth centuries but through to the present in the midst of the craft beer revival The title of this

book Hoptopia is a nod to Portland's title of Beervana and the Willamette Valley's claim as an agricultural Eden from the mid nineteenth century onward. But the story is fundamentally about how seemingly niche agricultural regions do not exist and have never existed independently of the flow of people, ideas, goods, and biology from other parts of the world. To define Hoptopia is to define the Willamette Valley's hop and beer industries as the culmination of all of this local and global history. With the hop itself as a central character, this book aims to connect twenty-first century consumers to agricultural lands and histories that have been forgotten in an era of industrial food production. Provided by publisher [Encyclopedia of American Social Movements](#) Immanuel Ness, 2015-07-17. This four-volume set examines every social movement in American history from the great struggles for abolition, civil rights, and women's equality to the more specific quests for prohibition, consumer safety, unemployment insurance, and global justice.

Rethinking the American Labor Movement Elizabeth Faue, 2017-04-28. Rethinking the American Labor Movement tells the story of the various groups and incidents that make up what we think of as the labor movement. While the efforts of the American labor force towards greater wealth parity have been rife with contention, the struggle has embraced a broad vision of a more equitable distribution of the nation's wealth and a desire for workers to have greater control over their own lives. In this succinct and authoritative volume, Elizabeth Faue reconsiders the varied strains of the labor movement, situating them within the context of rapidly transforming twentieth-century American society to show how these efforts have formed a political and social movement that has shaped the trajectory of American life. Rethinking the American Labor Movement is indispensable reading for scholars and students interested in American labor in the twentieth century and in the interplay between labor, wealth, and power.

[American Environmental History](#) Carolyn Merchant, 2007-10-31. By studying the many ways diverse peoples have changed, shaped, and conserved the natural world over time, environmental historians provide insight into humanity's unique relationship with nature and more importantly are better able to understand the origins of our current environmental crisis. Beginning with the precolonial land use practice of Native Americans and concluding with our twenty-first century concerns over our global ecological crisis, American Environmental History addresses contentious issues such as the preservation of the wilderness, the expulsion of native peoples from national parks, and population growth, and considers the formative forces of gender, race, and class. Entries address a range of topics from the impact of rice cultivation, slavery, and the growth of the automobile suburb to the effects of the Russian sea otter trade, Columbia River salmon fisheries, the environmental justice movement, and globalization. This illustrated reference is an essential companion for students interested in the ongoing transformation of the American landscape and the conflicts over its resources and conservation. It makes rich use of the tools and resources: climatic and geological data, court records, archaeological digs, and the writings of naturalists that environmental historians rely on to conduct their research. The volume also includes a compendium of significant people, concepts, events, agencies, and legislation, and an extensive bibliography of critical films, books, and Web sites.
