Protectors of the Land and Water Thomas R. Huffman, 2000-11-09 Since the beginning of the twentieth century Wisconsin citizens have promoted innovative environmental programs During the 1960s Wisconsin was again at the forefront of the movement advancing mainstream political environmentalism Thomas Huffman traces the rise of environmentalism in the Badger State during these key years when the people of Wisconsin instituted policies in such areas as outdoor recreation and resource planning water pollution control the preservation of wild rivers and centralized environmental management Huffman focuses especially on the influence of Senator Gaylord Nelson a Democrat and founder of Earth Day and Governor Warren Knowles a Republican He shows that their efforts and the efforts of their followers in citizen groups the business and university communities and the state government clearly indicate that the origins of environmentalism cannot be placed along a left right political spectrum Rather the movement evolved from an interweaving of liberal and conservative ideologies and from important traditions and precedents within the state s environmental culture What happened in Wisconsin is particularly significant Huffman points out because of the effect of that state s example on other states and the federal government Originally published in 1994 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value **State of Wisconsin Blue Book** ,1989 *The State of Wisconsin Blue Book* ,1989

McGaw, 2019-01-15 On a visit to a Berkshire paper mill the narrator of Herman Melville s *The Tartarus of Maids* views the wonderful papermaking machine with awe and calls it a miracle of inscrutable intricacy Manifesting in their factories and towns such nineteenth century fascination with machinery paper mill owners and workers made an industrial revolution in Berkshire County Massachusetts This book examines their experiences from the era of craft production through several generations of sustained technological change to answer two major questions What accounts for the widespread and rapid adoption of machines in nineteenth century America And how did the new technology help to transform America socially and culturally Rejecting technological determinism Judith McGaw effectively integrates labor business social and women s history with technological history to bring to life the human decisions that made mechanization possible In compelling detail the author offers new explanations of how change in the craft era paved the way for industrialization and how paternalism worked in small scale industry She also provides a thoughtful discussion of the interaction between evangelical culture and the emerging industrial order and a close analysis of how nineteenth century gender distinctions fostered mechanization

Judith A McGaw is Assistant Professor of History of Technology at the University of Pennsylvania Originally published in 1987 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
