Some Types of Unique Factorization in Integral Domains, 1968

Some Results on Factorization in Integral Domains Jack Robert Bennett, 2011 In this dissertation we study three recent generalizations of unique factorization the almost Schreier property the inside factorial property and the IDPF property Let R be an integral domain and let p be a nonzero element of R Then p is said to be almost primal if whenever p vertical line xy there exists an integer k greater than or equal to 1 and $p_1 p_2$ is an element of R such that $p_k p_1 p_2$ with p_1 vertical line xk and p_2 vertical line yk R is said to be almost Schreier if every nonzero element of R is almost primal Given an M graded domain R tensor product of modules m is an element of $M R m$ where M is a torsion free commutative cancellative monoid we classify when R is almost Schreier under the assumption that R is a subset of R is a root extension We then specialize to the case of commutative semigroup rings and show that if $R M$ is a subset of Special characters omitted is a root extension then $R M$ is almost Schreier if and only if R is an almost Schreier domain and M is an almost Schreier monoid

Factorization in Integral Domains Without Identity Jonathan Preisser, 2009

Factoring Ideals in Integral Domains Marco Fontana, Evan Houston, Thomas Lucas, 2012-09-14 This volume provides a wide ranging survey of and many new results on various important types of ideal factorization actively investigated by several authors in recent years Examples of domains studied include 1 those with weak factorization in which each nonzero nondivisorial ideal can be factored as the product of its divisorial closure and a product of maximal ideals and 2 those with pseudo Dedekind factorization in which each nonzero noninvertible ideal can be factored as the product of an invertible ideal with a product of pairwise comaximal prime ideals Pr fer domains play a central role in our study but many non Pr fer examples are considered as well

Restoring Factorization in Integral Domains Susan L. Kirk, 2015 This is an expository thesis on integral domains which are not unique factorization domains We focus on restoring a type of unique factorization using prime ideals within quadratic integer rings In particular we examine which quadratic integer rings will

admit such factorization Generalized Factorization in Integral Domains Andrea Marie Frazier, 2006 A Study of Unique Factorization in Quadratic Integral Domains Ronald Lee Van Enkevort, 1967 This thesis studies the question of unique factorization in quadratic integral domains In the first chapter many general theorems and definitions from algebraic number theory are introduced The second chapter considers an integral domain in which unique factorization holds The necessary theorems to prove unique factorization are developed The third chapter concerns an integral domain in which unique factorization fails That it fails is proved and then ideals are introduced to indicate how unique factorization would be restored in terms of ideals **Finiteness Theorems for Factorization in Integral Domains** Bernadette Mullins, 1995 **Integral Domains Not Possessing the Unique Factorization Property** Mary Buterbaugh Kline, 1971 **Advances in Commutative Ring Theory** David Dobbs, 2023-08-25 Presents the proceedings of the recently held Third International Conference on Commutative Ring Theory in Fez Morocco Details the latest developments in commutative algebra and related areas featuring 26 original research articles and six survey articles on fundamental topics of current interest Examines wide ranging developments in commutative algebra together with connections to algebraic number theory and algebraic geometry

Concepts in Abstract Algebra Charles Lanski, The style and structure of CONCEPTS IN ABSTRACT ALGEBRA is designed to help students learn the core concepts and associated techniques in algebra deeply and well Providing a fuller and richer account of material than time allows in a lecture this text presents interesting examples of sufficient complexity so that students can see the concepts and results used in a nontrivial setting Author Charles Lanski gives students the opportunity to practice by offering many exercises that require the use and synthesis of the techniques and results Both readable and mathematically interesting the text also helps students learn the art of constructing mathematical arguments Overall students discover how mathematics proceeds and how to use techniques that mathematicians actually employ This book is included in the Brooks Cole Series in Advanced Mathematics Series Editor Paul Sally Jr *Non-Unique Factorizations* Alfred Geroldinger, Franz Halter-Koch, 2006-01-13 From its origins in algebraic number theory the theory of non unique factorizations has emerged as an independent branch of algebra and number theory Focused efforts over the past few decades have wrought a great number and variety of results However these remain dispersed throughout the vast literature For the first time Non Unique Factoriza **Recent Progress in Ring and Factorization Theory** Matej Brešar, Alfred Geroldinger, Bruce Olberding, Daniel Smertnig, 2025-06-11 This proceedings volume gathers a selection of cutting edge research in both commutative and non commutative ring theory and factorization theory The papers were presented at the Conference on Rings and Factorization held at the University of Graz Austria July 10 14 2023 The volume covers a wide range of topics including multiplicative ideal theory Dedekind Pr fer Krull and Mori rings non commutative rings and algebras rings of integer valued polynomials topological aspects in ring theory factorization theory in rings and semigroups and direct sum decomposition of modules The conference also featured two special sessions dedicated to Matej Bre ar and

Sophie Frisch on the occasion of their 60th birthdays This volume is aimed at graduate students and researchers in these areas as well as related fields and provides new insights into both classical and contemporary research in ring and factorization theory

Rings, Monoids and Module Theory Ayman Badawi, Jim Coykendall, 2022-03-11 This book contains select papers on rings monoids and module theory which are presented at the 3rd International Conference on Mathematics and Statistics AUS ICMS 2020 held at the American University of Sharjah United Arab Emirates from 6-9 February 2020 This conference was held in honour of the work of the distinguished algebraist Daniel D Anderson Many participants and colleagues from around the world felt it appropriate to acknowledge his broad and sweeping contributions to research in algebra by writing an edited volume in his honor The topics covered are inevitably a cross section of the vast expansion of modern algebra The book is divided into two sections surveys and recent research developments with each section hopefully offering symbiotic utility to the reader The book contains a balanced mix of survey papers which will enable expert and non expert alike to get a good overview of developments across a range of areas of algebra The book is expected to be of interest to both beginning graduate students and experienced researchers

Arithmetical Properties of Commutative Rings and Monoids Scott T. Chapman, 2005-03-01 The study of nonunique factorizations of elements into irreducible elements in commutative rings and monoids has emerged as an independent area of research only over the last 30 years and has enjoyed a recent flurry of activity and advancement This book presents the proceedings of two recent meetings that gathered key researchers from around the world
