The British Controversialist ,1856 **Conjuring Asia** Chris Goto-Jones,2016-07-04 The promise of magic has always commanded the human imagination but the story of industrial modernity is usually seen as a process of disenchantment Drawing on the writings and performances of the so called Golden Age Magicians from the turn of the twentieth century Chris Goto Jones unveils the ways in which European and North American encounters with and representations of Asia the fabled Mystic East worked to re enchant experiences of the modern world Beginning with a reconceptualization of the meaning of modern magic itself moving beyond conventional categories of real and fake magic Goto Jones acclaimed book guides us on a magical mystery tour around India China and Japan showing us levitations and decapitations magic duels and bullet catches goldfish bowls and paper butterflies In the end this mesmerizing book reveals Orientalism as a kind of magic in itself casting a spell over Western culture that leaves it transformed even today The Zoist ,1851 *Chemistry and Physics in Relation to Physiology and Pathology* Justus von Liebig,1847 **The British Controversialist and Literary Magazine** ,1856 **The British Controversialist and Self-educator** ,1856 *Edgar Allan Poe, Eureka, and Scientific Imagination* David N. Stamos,2017-02-28 Explores the science and creative process behind Poe s cosmological treatise In 1848 almost a year and a half before Edgar Allan Poe died at the age of forty his book Eureka was published In it he weaved together his scientific speculations about the universe with his own literary theory theology and philosophy of science Although Poe himself considered it to be his magnum opus Eureka has mostly been overlooked or underappreciated sometimes even to the point of being thought an elaborate hoax Remarkably however in Eureka Poe anticipated at least nine major theories and developments in twentieth century science including the Big Bang theory multiverse theory and the solution to Olbers paradox In this book the first devoted specifically to Poe s science side David N Stamos a philosopher of science combines scientific background with analysis of Poe s life and work to highlight the creative and scientific achievements of this text He examines Poe s literary theory theology and intellectual development and then compares Poe s understanding of science with that of scientists and philosophers from his own time to the present Next Stamos pieces together and clarifies Poe s theory of scientific imagination which he then attempts to update and defend by providing numerous case studies of eureka moments in modern science and by seeking insights from comparative biography and psychology cognitive science neuroscience and evolution Edgar Allan Poe Eureka and Scientific Imagination is the most comprehensive treatment of Eureka that has yet been published It is staggeringly thorough in its analysis of Poe s book but it

also shows how Poe's theories of cosmogony and cosmology ramify into his fiction and poetry especially the tales of ratiocination Stamos takes Eureka seriously and he does so with the empirical undergirding of vast amounts of scientific scholarship and literary criticism James M Hutchisson author of Poe **Margaret Fuller and Her Circles** Brigitte Bailey, Katheryn P. Viens, Conrad Edick Wright, 2013 Essays on the American Transcendentalist **Hidden Depths** Robin Waterfield, 2013-01-22 In Hidden Depths Robin Waterfield explores the fascinating world of hypnosis tracing the history of this often misunderstood craft beginning with a passage in the book of Genesis and continuing through his own personal experiences today Waterfield uses the history and controversy surrounding the practice of hypnosis to gain insight into our behavior and psychology and considers how hypnotic techniques have been absorbed into society through advertising media and popular culture The Journal of Mental Science , 1902 Vol 77 includes Yearbook of the Association 1931
