Deathquest Robert M. Bohm, 2011 A textbook on the death penalty that engages the reader with a full account of the arguments and issues

surrounding capital punishment It begins with the history of the death penalty from colonial to modern times and then examines the moral and legal arguments for and against capital punishment **Days of Remembrance, April 3-10, 1994**, 1994 An anthology of writings about the Holocaust topically arranged for study **Basic Reference Sources** Margaret Taylor, Ronald R. Powell, 1990 A perennial favorite invaluable as a learning tool I highly recommend it *Report of the Secretary of the Senate from ... United States. Congress. Senate*, 1984-04 *The Language of Foreign Affairs*, 1987-10 *War, Aggression and Self-Defence* Yoram Dinstein, 2006-01-30 Fourth edition of Yoram Dinstein's seminal textbook looking at the legal issues of war aggression and self defence **Statistical Yearbook of the Immigration and Naturalization Service**, 1986 The New American Interventionism Demetrios Caraley, 1999 In the process this book focuses on the great complexity involved when deciding to enter a conflict the almost universal circumvention of congressional authority the ineffectualness of pinpoint air strikes and the essentially ad hoc nature of military deployment since the cold war **BOOK JACKET** New Serial Titles, 1985 Military geography for professionals and the public, 1998 Military geography one of several subsets within those broad confines concentrates on the influence of physical and cultural environments over political military policies plans programs and combat support operations of all types in global regional and local contexts Key factors displayed in table 1 directly sometimes decisively affect the full range of military activities strategies tactics and doctrines command control and organizational structures the optimum mix of land sea air and space forces intelligence collection targeting research and development the procurement and allocation of weapons equipment and clothing plus supply maintenance construction medical support education and training *Africa's Second Wave of Freedom* Lyn S. Graybill, Kenneth W. Thompson, 1998 Africa's Second Wave of Freedom represents the work of scholars who share a concern with the development of civil society in Africa The first third of the book deals theoretically with the issues of democracy and stability in Africa In particular the contributors analyze the inadequacy of the United States response to African problems such as environmental decay spiraling debt and health epidemics that do not respect national boundaries the fragility of democracy in Africa and the danger of reversion to dictatorships and the barriers to constitutional democracy in sub Saharan Africa The remainder of the book consists of case studies of various aspects of civil society from Mozambique Nigeria Zimbabwe and South Africa The Presidential Difference Fred I. Greenstein, 2001-02-28 As Americans choose and install a new president for a new century they could do no better than to read this work by one of our keenest observers of the modern presidency Drawing on a quarter century's immersion in the presidential record and scores of interviews Fred I Greenstein provides a fascinating and instructive account of the qualities that have served well and poorly in the Oval Office from Franklin D Roosevelt's first hundred days to the end of the Clinton administration Greenstein offers a series of bottom line judgments on each of his eleven subjects and a bold new explanation of why presidents succeed or fail Previous analysts have placed their bets on the president's political prowess or personal character Yet by the first standard LBJ should have

been our greatest president and by the second the nod would go to Jimmy Carter Greenstein surveys each president's record in public communication political skill vision cognitive style and emotional intelligence He concludes that the last is by far the most important According to Greenstein FDR provides endless positive lessons but is a source of warnings Truman let his bizarre readings of history lead him astray Eisenhower was wise but failed to communicate a vision Kennedy had no vision Reagan was Carter in reverse It is Ford who is most unappreciated and genuinely interesting Ford balanced many conflicting demands kept his poise and left the office much stronger than he found it Presidents can avoid failure if they are willing to accept the warnings of failures past and act accordingly But it is not only presidents who should read this book with care Some flaws cannot be overcome no matter how otherwise talented the man Only three of Greenstein's eleven modern presidents were fundamentally free of distracting emotional perturbations When we choose our presidents we will do well to listen to Greenstein and Beware the presidential contender who lacks emotional intelligence In its absence all else may turn to ashes

Statistical Reference Index ... Annual, 1980 *Military Geography for Professionals and the Public* John M. Collins, 1998 This book covers many topics that are crucial to military planning but often receive only passing mention in histories or briefings Collins a former Army officer stresses land geography but he does not stint oceans the atmosphere or interplanetary space His discussions of urban areas are too brief given the increasing amount of large scale violence in cities since the end of World War II
