Yaghamai, 2012-12-06 Six years ago the editors of the Encyclopedia of Medical Radiology selected two additional editors from the emerging generation of young radiologists to complete this unique compendium of radiology Klaus Ranniger was one of them and he worked with enthusiasm and great energy at the challenge facing him His editorial work was excellent and he succeeded in winning internationally acclaimed scientists to contribute to this volume Their chapters have met the requirements and goals we set out to achieve in every aspect and to the highest degree The majority of the authors valued Klaus Ranniger not only as a fellow scientist and doctor but also as a personal friend In America his adopted country he found acknowledgement of his personal achievement and scientific research He was highly respected and admired among specialists in the field of radiology Klaus Ranniger our coeditor and friend died suddenly and unexpectedly before this volume could be published We are honored to present this volume as his legacy

Tumors and Tumorlike Lesions of Bone and Joints F. Schajowicz, 2012-12-06 In the past 50 years considerable progress has been made in

orthopedics and traumatology One of the principal reasons for these advances has undoubtedly been the separation of these specialties from general surgery Alongside this development the number of those devoted to the study and treatment of locomotor disabilities who could formerly be counted on the fingers of one hand at least in our country has multiplied by thousands and even more have subspecialized This accelerated growth has encouraged the sharpening of diagnostic skills technical improvement and the application of advances in other fields of medicine to orthopedics However paradoxically enough one of the most important aspects of orthopedics bone pathology has not attracted enough specialists worldwide to handle the complex problems encountered daily that only an expert and experienced pathologist is capable of resolving Within the modern milieu the personality and accomplishments of Professor Fritz Schajowicz stand out distinctly Dr Schajowicz of Austrian origin studied with Professor J Erdheim of Vienna Having afterwards been granted a fellowship to extend his knowledge of bone pathology at the Rizzoli Orthopedic Institute of Bologna under the direction of Professor Vittorio Putti he complemented this work with the study of clinical orthopedics at that prestigious institution In 1938 Professor Jose Valls visited the Rizzoli Institute and recognizing the outstanding training of Professor Schajowicz invited him to move to Argentina where we were in need of an expert pathologist
