Faith And Human Transformation A Dialogue Between Psychology And Theology:

Faith and Human Transformation James Forsyth, 1997 This book proposes the parallel concept that authentic faith development both presupposes and facilitates authentic human development Thomas Aquinas posited a reciprocal relationship between nature and grace grace both presupposes or builds on nature and perfects nature Translated into developmental terms this would mean that religious and spiritual growth takes place on the foundation of healthy human growth and reciprocally the authentic religious development facilitates development towards the goals of authentic human growth This study attempts to investigate the validity of this reciprocal relationship as it applies to human and religious growth A dialogue is constructed between the views of four Christian thinkers Kierkegaard Barth Bultmann and Tillich on the dynamics of the Christian faith experience and four psychological theorists Alister E. McGrath, Erich Fromm, Carl Jung and Viktor Frankl on the dynamics of human growth

Theology, Psychoanalysis and Trauma Marcus Pound, Conor Cunningham, Peter Candler, 2007-09-01 The subtitle of Pound's book could have been Lacan with Kierkegaard It stages an extraordinary dialogue between the two thinkers demonstrating the Kierkegaardian resonances of the key Lacanian concepts From now on we know that the Freudian notion of trauma its sexual references notwithstanding belongs to the domain of the divine The book is a true event after reading it neither Kierkegaard nor Lacan will remain the same in our theoretical imaginary You can ignore this book if you want to remain a happy idiot Slavoj Žižek Marcus Pound's first book is the most important sustained reflection on the relation of Theology and Psychoanalysis to date His approach is admirably focussed since it compares the ideas of the theological founder of complex motivational psychology Søren Kierkegaard with those of the most sophisticated secular psychoanalytical theorist Jacques Lacan In doing so Pound offers in a short compass both a psychological deepening of theological orthodoxy and a theological critique of psychoanalysis as such Future engagement with this area must begin with this lucid subtle and brilliant treatise John Milbank The vitality of Christian theology today its creativity its imaginative and scholarly engagement are nowhere more evident than in this book Pound's presentation of an interface between psychology and doctrine is as bold as it is original Kierkegaard meets Lacan trauma is related to liturgy and therapy to sacramentalism all under the aegis of Aquinas This is contemporary theology at its best exploring new terrains and forging distinctive relations between onetime strangers Graham Ward

Psychology, Religion, and Spirituality James M. Nelson, 2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental understandings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may

not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult

'Two Scrubby Travellers': A psychoanalytic view of flourishing and constraint in religion through the lives of John and Charles Wesley Pauline Watson, 2018-03-15 The ways in which people change and grow and learn to become good are not only about conscious decisions to behave well but about internal change which allows a loving and compassionate response to others Such change can take place in psychotherapy this book explores whether similar processes can occur in a religious context Using the work of Julia Kristeva and other post Kleinian psychoanalysts change and resistance to change are examined in the lives of John Wesley the founder of Methodism and his brother Charles the greatest English hymn writer Their mother's description of them as young men as two scrubby travellers was a prescient expression indicating their future pilgrimage which they negotiated through many struggles and compromises it points towards the wounded healer a description which could be applied to John in later years The use of psychoanalytic thought in this study allows the exploration of unconscious as well as conscious processes at work and interesting differences emerge which shed light on the elements in religion that promote or inhibit change and the influence of personality factors

Two scrubby travellers A psychoanalytic view of flourishing and constraint in religion through the lives of John and Charles Wesley enriches our understanding of these two important historical figures It questions the categorising of forms of religion as conducive to change and so mature and other forms as immature at a time when many particularly young people are attracted by fundamentalist evangelical forms of belief This book will be essential reading for researchers working at the intersection of psychoanalysis and religious studies it will also be of interest to psychotherapists and psychoanalysts more generally and to researchers in the philosophy of religion

THE DIALOGUE BETWEEN THEOLOGY AND PSYCHOLOGY Jerald C. Brauer, 1968 **The Dialogue Between**

Theology and Psychology LeRoy Aden, 1968 Three essays reflect the exploratory nature of Religion and Personality a field still in its infancy in divinity studies Each of the eleven authors applies the insights of psychology both theoretical and clinical to important elements of Christian thought and religious meaning New light is shed on such central concepts as faith guilt and salvation The relation between belief and myth is defined and the old controversy about demythologization receives fresh impetus

Schleiermacher, the Study of Religion, and the Future of Theology Brent W. Sockness, Wilhelm Gräb, 2010

This volume documents a significant meeting in the history of Schleiermacher studies at which leading scholars from Europe and North America gathered to probe key features of Schleiermacher's theological and philosophical program in light of its contested place in the study of religion. Offering fresh interpretations of Schleiermacher's theory of religion, revisionary dogmatics and hermeneutics of culture, the book critically re-examines Schleiermacher's thought with an eye on the contemporary divide between theology and religious studies. Religious Hatred and Human Conflict Andrew Floyer Acland, 2023-09-12 *Religious Hatred and Human Conflict* focuses the lens of psychodynamic psychology on a phenomenon that often confounds conventional thinking: the intensity of conflict with religious or quasi-religious dimensions. The book highlights six dimensions of religion: identity, doctrine and practice, emotion and experience, mythology, sacred values and power and control, exploring how these can give rise to religious hatred and lead to marginalisation, persecution and even genocide. It also explores reasons for the evolution of religion and religious hatred and their relationship with human behaviour through contemporary issues such as fundamentalism, martyrdom, clerical narcissism and apocalyptic belief. Acland examines how religious hatred and conflict may be transcended by facilitating processes of dialogue and diapraxis, which

enable a systematic understanding of prejudices and projections Last it offers practical methods and strategies for helping individuals and communities grow beyond the constraints of religious hatred treating religious hatred as a psycho spiritual problem that requires self understanding Identifying the implications for professionals in conflict resolution and mediation politicians community leaders diplomats and anyone working to prevent or reduce conflict where religious belief is a factor this book sets out how those tasked with intervening can respond to the challenges involved It will also be highly relevant reading for students and researchers of psychology and religious studies **Before the Face of God** Hanneke
