Racism Sexism Society Vivisection Women s Ordination      The New Genetic Medicine Thomas Anthony Shannon,James J. Walter,2003 Since the 1970s the interrelated areas of medical genetics and biotechnology have developed dramatically and afforded increased control over the design of living organisms From the very beginning controversies over these techniques and their applications to plants animals and humans have raged in many disciplines including science philosophy ethics and religion This book brings together the seminal essays of two leading Catholic moral theologians Thomas Shannon and James Walter in an effort to identify the key ethical and theological questions raised by the new genetic medicine What is unique about this book is that it specifically and directly brings modern genetics and the Roman Catholic theological and ethical tradition into dialogue While the authors argue that the Catholic tradition has much to offer in putting this current scientific revolution into perspective they well understand the need to avoid merely repeating the tradition in favor of bringing the best of the tradition to bear on the precise questions posed by modern genetic technology      **The Greening of Protestant Thought** Robert Booth Fowler,2000-11-09 The Greening of Protestant Thought traces the increasing influence of environmentalism on American Protestantism since the first Earth Day which took place in 1970 Robert Booth Fowler explores the extent to which ecological concerns permeate Protestant thought and examines contemporary controversies within and between mainline and fundamentalist Protestantism over the Bible s teachings about the environment Fowler explores the historical roots of environmentalism in Protestant thought including debates over God s relationship to nature and the significance of the current environmental crisis for the history of Christianity Although he argues that mainline Protestantism is becoming increasingly green he also examines the theological basis for many fundamentalists hostility toward the environmental movement In addition Fowler considers Protestantism s policy agendas for environmental change as well as the impact on mainline Protestant thinking of modern eco theologies process and creation theologies and ecofeminism      **Mankind and Energy: Needs, Resources, Hopes** ,2009-06-05 Mankind and Energy Needs Resources Hopes      One Christ--Many Religions S. J. Samartha,2015-06-29 Here is a wise radical and illuminating book on the obstacles that a rigid interpretation of orthodox christological doctrines presents to dialogue with persons of other faiths One Christ Many Religions examines religious pluralism today and in the light of its implications for the global community suggests the contours of a revised christology more credible to Christians and their neighbors of other faiths Samartha argues that the problem with the christological dogmas of the first Ecumenical Councils is not their truth so much as their interpretation and the un Christian zealotry they seem to engender in Christians Sensitive to charges of sentiments of racial and cultural superiority that stem from Christians believing themselves uniquely authorized agents of God Samartha challenges us to admit the truth of these accusations and to revise our understanding of Jesus Without such christological revisions Samartha fears Christianity may cease to be Christian may become enfeebled in the pursuit of justice for the oppressed alienated from the deeper challenge of Jesus sealed off from the truths of other religions and ultimately may be

Handbook of Bioethics and Religion David E. Guinn,2006-08-10 What role should religion play in a religiously pluralistic liberal society Public bioethics unavoidably raises this question in a particularly insistent fashion As the 20 papers in this collection demonstrate the issues are complex and multifaceted The authors address specific and highly contested issues as assisted suicide stem cell research cloning reproductive health and alternative medicine as well as more general questions such as who legitimately speaks for religion in public bioethics what religion can add to our understanding of justice and the value of faith based contributions to healthcare Christian Catholic and Protestant Jewish Islamic and Buddhist viewpoints are represented The first book to focus on the interface of religion and bioethics this collection fills a significant void in the literature      *Faith and science in an unjust world : report of the World Council of Churches' Conference on Faith, Science and the Future, Massachusetts Inst. of Technology, Cambridge, USA, 12 - 24 July 1979* Roger L.
