Faith Based Diplomacy The Challenge To Development:

Faith Based Diplomacy John Chikago, James John Chikago, 2005 Faith Based Diplomacy The Challenge to Development is not just another book on diplomacy It is a book in its own class Concisely written and imbued with pragmatism it outlines a vision of hope to poverty stricken people making a concerted effort to improve their situations Based on practical experience and influenced by faith Ambassador James John Chikago's book is useful reading for those possessing faith based values specifically people believing that God created the Universe before creating mankind and those sensitive individuals aware that poverty is not a permanent condition relegated to any specific ethnic identity Beginning with the early pages Chikago defines diplomacy as statesmanship disavowing the assumption that diplomacy is a new invention by modern states Instead the author shows how the Holy Bible makes references to diplomacy in the books of 2 Samuel 10 2 2 Corinthians 5 20 and Ephesians 6 20 With the consolidation of democratic regimes and the flowering of democracy worldwide the author explores the problems diplomatic missions from developing countries face in the world's new political environment For instance he extols those ordinary citizens in developing countries who courageously question the status quo of resident diplomatic missions in search for something better but also deplores public anger for performance improvements at diplomatic missions explaining that such anger is misdirected because diplomatic missions are not independent entities The author contends that governments in developing countries have acted responsibly by implementing development diplomacy as a strategy for improving the performance at diplomatic missions While the change to development diplomacy has aroused a sense of optimism among some citizens the author cautions that many unwisely place too much hope in political systems and man made solutions alone Ambassador Chikago reminds readers of the prophet's promise in Isaiah 44 2a He who made you will help you He also notes that Pastor author Rick Warren Purpose Driven Life has stated that no person was born by mistake and that God has a purpose for all of us God plans who will be born and when In other words while adopting development diplomacy is a positive step it is not a silver bullet and it means little without God's blessings The resolution of poverty in developing countries will be realized through prayers and by asking God for an awakening to correct value systems Faith Based Diplomacy The Challenge to Development is a thoughtful and stimulating discussion for politicians the diplomatic community bureaucrats and students of diplomacy everywhere

Faith- Based Diplomacy Trumping Realpolitik

Douglas Johnston, 2008-06-02 For most of the twentieth century the most critical concerns of national security have been balance of power politics and the global arms race The religious conflicts of this era and the motives behind them however demand a radical break with this tradition If the United States is to prevail in its long term contest with extremist Islam it will need to re-examine old assumptions expand the scope of its thinking to include religion and other irrational factors and be willing to depart from past practice This book looks at five intractable conflicts and explores the possibility of drawing on religion as a force for peace The world class authors writing in this volume suggest how the peacemaking tenets of five major

world religions can be strategically applied in ongoing conflicts in which those religions are involved Faith-based Diplomacy and Interfaith Dialogue Scott Blakemore, 2019-05-27 Scholars are seeking to identify how to constructively integrate faith into diplomacy Proponents of faith based diplomacy recognise that incorporating faith into peacemaking activities assists in managing identity based conflict and religiously motivated violence in the contemporary international system A promising strategy within the scope of faith based diplomacy is interfaith dialogue The study and practice of interfaith dialogue has been reinvigorated since the advent of 9 11 and yet the link between interfaith dialogue and diplomacy remains underdeveloped The cases of Indonesia and the United States present lessons on how states can effectively use interfaith dialogue to achieve policy objectives while recognising that some policies are detrimental to achieving diplomatic goals This paper seeks to provide some framework for bringing interfaith dialogue into the scope of diplomacy by illuminating how faith based diplomacy and interfaith dialogue can be innovative diplomatic perspectives useful in addressing contemporary global issues Faith-Based Diplomacy Brian Cox, 2015-06-19 The rise of religion and religious actors combined with nonstate actors increasing influence in the international order has become the new normal These fundamental changes in the security environment call for a new paradigm to address national security concerns That paradigm must acknowledge the cultural and historical factors at the heart of many identity based conflicts and advance the role of nation states in resolving them That emerging paradigm is faith based diplomacy and this book written by one of the worlds leading experts describes the principles and methodology of this form of engagement in the strategic political realm It is informed by twenty five years of experience in some of the worlds roughest neighborhoods including East Central Europe and the Balkans Sudan Kashmir and the Middle East Canon Brian Cox is an ordained Episcopal priest a pastor in Santa Barbara California a diplomat with a Washington DC nongovernmental organization and a professor in a law school based conflict resolution program in Southern California

Christie, 2021-04-21 The engagement of religious diplomacy within the United Nations systems has become increasingly important for achieving the Sustainable Development Goals The editors argue that effective religious diplomacy must reflect the great diversity of religious and spiritual expressions within human communities The editors argue that this can best be achieved through a worldview shift within the United Nations systems Religious engagement in the United Nations systems has been understandably constrained by limited and formal organizational structures and conventions However the existing patterns of engagement mitigate against the very goals they seek to achieve The editors argue that expanded yet measured religious inclusion will strengthen social cohesion in the global community Contributors demonstrate how communities become stronger when marginalized minority voices are included in public discourse The editors further argue that governance has a responsibility to ensure a safe environment for this interaction The editors propose that the United Nations adopt the posture of loyal opposition that is inherent in parliamentary democracies to serve as a guideline for expanded religious engagement The contributors advance this proposal with illustrations from multiple contexts that address a diverse array of social problems from perspectives rooted in theory and practice *European Societies in Transition* Dan Sandu, 2010 The contributions in this volume on social care and welfare disadvantaged groups or individuals are intended to be useful in the Eastern European social context to those who experienced or study the communist rule The transition in Eastern societies is fast paced sometimes people oppose it or refuse to be involved Rules are firm and imposed according to already established models in Western European countries Society tends to become more ferocious in content but more accessible through media and democratic liberties Changes are very swift and need greater attention because of the fundamental and structural nature of transformations in an age of transition , **The Palgrave Handbook of Diplomatic Thought and Practice in the Digital Age** Francis Onditi, Katharina McLarren, Gilad Ben-Nun, Yannis A. Stivachtis, Pontian Okoth, 2023-08-01 This handbook integrates a range of conceptual and empirical approaches to diplomacy in the context of ongoing technological and societal change Technological and societal disruptions affect modern diplomacy altering its character and reforming its way In light of such changes this book offers both historical foundations and contemporary perspectives in the field By doing so it demonstrates how contemporary change impacts the work of diplomats representing sovereign states Global diplomatic services will forever be affected by the digitalization of engagement between states during and after the COVID 19 pandemic In this rapidly changing culture with burgeoning geopolitical and geostrategic realignment among global powers the tools of diplomacy have changed The state s foreign policy astuteness and responses to these changes could have long term impacts All this culminates in opportunities for improving the management of diplomatic services and efficiency of the Ministries of Foreign Affairs MoFA of various states This book provides useful insights into how modern diplomacy works especially the integration of informalities into formal diplomatic practices in

complex peace and security environments within such a framework of change *The Global Resurgence of Religion and the Transformation of International Relations* S. Thomas, 2005-02-04 This book is about the global resurgence of culture and religion in international relations and how these social changes are transforming our understanding of International Relation theory and the key policy related issue areas in world politics It is evident in the on going debates over the root causes of 9 11 that there are many scholars journalists and members of the public who still believe culture and religion can be explained away by appeals to more basic economic social or political forces in society Therefore *The Global Resurgence of Religion and the Transformation of International Relations* presents an argument for taking culture and particularly religion as social forces that are important for understanding world politics in the post Westphalian era **Religion and European Society** Ben Schewel, Erin K. Wilson, 2019-04-17 A contemporary examination of the role of religion in the European public sphere and beyond Although the role of religion has arguably declined in the societies of Western and Northern Europe religious participation in other parts of the continent and among growing immigrant communities remains an important aspect of daily life Recent years have seen a resurgence of religion in the public sphere prompting many researchers to view European secularism as an outlier in this global trend *Religion and European Society A Primer* presents recent academic literature that explores key developments and current debates in the field covering topics such as changing patterns of belief religion across the political spectrum and development and humanitarian aid Articles written by leading scholars draw from well established findings to help readers contemplate the role of religion in public life understand the assumptions and underpinnings of the secular worldview and develop new ways of thinking about global issues relevant to contemporary global affairs Each theme is addressed by several articles to provide readers with diverse sometimes competing perspectives This volume offers concepts and ideas that can be used in various policy practitioner and academic settings clarifying overarching concepts and trends rather than analyzing specific policy issues that can quickly become outdated Addresses issues of contemporary importance such as demographic changes in religious observance increased immigration the emergence of new religious movements and changes in more established religions Explores the ethical and philosophical concepts as well as the practical everyday consequences of European post secularism Challenges widespread assumptions about the secular nature of the modern public sphere Offers analytical tools as well as practical policy recommendations on a range of issues including media regulation gender conflict and peacebuilding immigration and humanitarianism Designed to move research findings from academic journals to the realm of public discourse *Religion and European Society A Primer* is a valuable source of information for practitioners within and outside of Europe of religious studies politics and international affairs **Taiwan's Economic and Diplomatic Challenges and Opportunities** Mariah Thornton, Robert Ash, Dafydd Fell, 2021-04-20 This book offers a diverse set of perspectives on the current state of Taiwan s economy and international relations equally considering the challenges and opportunities that could forge Taiwan s future Featuring a range of

Religion in Development Séverine Deneulin, 2013-07-18 Development practice is full of examples of the importance of religion in the lives of people in developing countries However religion has largely remained unexplored in development studies This timely new book aims to fill that gap The authors expertly review how religion has been treated in the evolution of development thought how it has been conceptualised in the social sciences and highlights the major deficiencies of the assumption of secularism The book argues that development theory and practice needs to rewrite its dominant script regarding its treatment of religion a script which has so far been heavily inscribed in the secular tradition It puts forward an understanding of religions as traditions that religions rest on central thesis and teachings which never cease to be re interpreted in the light of the social political and historical context In addition to providing a conceptual framework for analysing the role of religion in development the book provides numerous empirical examples drawn from the Christian and Islamic religious traditions This comprehensive new guide to this key issue is essential for students development thinkers and practitioners who wish to understand better the role that religion plays in development processes and outcomes

On the Significance of Religion in Conflict and Conflict Resolution Christine Schliesser, S. Ayse Kadayifci-Orellana, Pauline Kollontai, 2020-07-01 In this ground breaking volume the authors analyze the role of religion in conflict and conflict resolution They do so from the perspectives of Judaism Christianity and Islam while bringing different disciplines into play including peace and conflict studies religious studies theology and ethics With much of current academic political and public attention focusing on the conflictive dimensions of religion this book also explores the constructive resources of religion for conflict resolution and reconciliation Analyzing the specific contributions of religious actors in this field their potentials and possible problems connected with them this book sheds light on the concrete contours of the oftentimes vague religious factor in processes of social change Case studies in current and former settings of violent conflict such as Israel post genocide Rwanda and Pakistan provide real life contexts for discussion Combining cutting edge research with case studies and concrete implications for academics policy makers and practitioners this concise and easily accessible volume helps to build bridges between these oftentimes separated spheres of engagement The Open Access version of this book available at <http://doi.org/10.4324/9781003002888> has been made available under a Creative Commons Attribution Non

The contributors refocus the attention on religion away from the misery discourse of conflict and violence towards the domain of international relations, diplomacy and foreign policy in Africa. Through this shift the contributors analyze the ways in which religion has impacted the external relations of African states. Religion and Global Politics introduces the theme of religion to the discourse of African international relations and politics to provide a thorough examination of religion's influence on politics in the daily lives of African people. *Visions in Conflict* Brian C. Alston, 2010 A conflict in visions stands at the center of major international and national crises in the Middle East, Africa, Asia or elsewhere. Whether in mass killing, genocide or intractable conflict, ideology is usually present and plays an important role. By ideology, political, religious, economic, social or some other, is meant visions of social arrangements and human relations that provide meaning and hope for a group. Such ideologies can identify others as enemies who stand in the way of their fulfillment. The present volume contains essays written by authors from around the world on powerful vehicles of conflict resolution, namely religion, psychology, education and training, psychotherapy and sports. It is our sincere hope that these essays shed light on the process of peace and reconciliation. **Challenges to Religious Liberty in the Twenty-First Century** Gerard V. Bradley, 2012-03-12 Almost everyone today affirms and applauds religious liberty. In this book scholars in law, theology and political theory exchange views on five specific challenges to religious liberty in the twenty-first century. *The Routledge Handbook of Religions and Global Development* Emma Tomalin, 2015-02-11 This Handbook provides a cutting-edge survey of the state of research on religions and global development. Part one highlights critical debates that have emerged within research on religions and development, particularly with respect to theoretical, conceptual and methodological considerations from the perspective of development studies and its associated disciplines. Parts two to six look at different regional and national development contexts and the place of religion within these. These parts integrate and examine the critical debates raised in part one within empirical case studies from a range of religions and regions. Different religions are situated within actual locations and case studies, thus allowing a detailed and contextual understanding of their relationships to development to emerge. Part seven examines the links between some important areas within development policy and practice where religion is now being considered, including Faith-Based Organisations and Development, Public Health, Religion and Development, Human rights, Religion and Development, Sustainable Development, Climate Change and Religion, Global Institutions and Religious Engagement in Development, Economic Development and Religion, Religion Development and Fragile States, Development and Faith-Based Education.
