Devotion Alexander Fletcher, 1880 The Impact Of Reason On Faith, Ethics And Belief Geran F. Dodson, 2020-10-06 The purpose of the book is to examine the theological claims of ethics faith and belief from a philosophical perspective The Abrahamic and Mosaic covenants of the Old Testament Jesus of the synoptic gospels and Paul's writings serve as the frame of reference in examining a biblical expression of reason and structured logic The message of Jesus centered on the Kingdom of God defined the meaning of faith and belief established a new ethic and framed the message in logic forms The life and death of Jesus brought the realization of God's final covenant as prophesied by the Old Testament However Paul appropriated and developed the Jesus of history into the mythological eschatological Christ figure The clash of philosophy and theology is evident with theological presuppositions that are based on spiritual insight and divine revelation Logic in scripture employs propositions based primarily on revealed proof that is within the context of that which cannot be proven absolutely Uncovering the identity of YHWH in the manuscripts and religious practices of Canaanite culture clearly associated YHWH with the polytheism of the Ugarit texts YHWH was one of the seventy sons of the Canaanite Most High God El and took on a unique identity that was rooted in El and the polytheistic nature of the pantheon of gods Theological truths stand within the context of faith and reason stands apart from faith and infers only that which can be proven based on evidence That which is knowable by faith cannot be known by reason since reason cannot validate that which is not proven to exist

Anthropology as Ethics T. M. S. Evens,2009 Anthropology as Ethics is concerned with rethinking anthropology by rethinking the nature of reality It develops the ontological implications of a defining thesis of the Manchester School that all social orders exhibit basically conflicting underlying principles Drawing especially on Continental social thought including Wittgenstein Merleau Ponty Levinas Dumont Bourdieu and others and on pre modern sources such as the Hebrew bible the Nuer the Dinka and the Azande the book mounts a radical study of the ontology of self and other in relation to dualism and nondualism It demonstrates how the self other dichotomy disguises fundamental ambiguity or nondualism thus obscuring the essentially ethical dilemmatic and sacrificial nature of all social life It also proposes a reason other than dualist nihilist and instrumental one in which logic is seen as both inimical to and continuous with value Without embracing absolutism the book makes ambiguity and paradox the foundation of an ethical response to the pervasive anti foundationalism of much postmodern thought
