Faith In Nation Exclusionary Origins Of Nationalism:

Faith in Nation Anthony W. Marx, 2005-04-21 Common wisdom has long held that the ascent of the modern nation coincided with the flowering of Enlightenment democracy and the decline of religion ringing in an age of tolerant inclusive liberal states Not so demonstrates Anthony W Marx in this landmark work of revisionist political history and analysis In a startling departure from a historical consensus that has dominated views of nationalism for the past quarter century Marx argues that European nationalism emerged two centuries earlier in the early modern era as a form of mass political engagement based on religious conflict intolerance and exclusion Challenging the self congratulatory genealogy of civic Western nationalism Marx shows how state builders attempted to create a sense of national solidarity to support their burgeoning authority Key to this process was the transfer of power from local to central rulers the most suitable vehicle for effecting this transfer was religion and fanatical passions Religious intolerance specifically the exclusion of religious minorities from the nascent state provided the glue that bonded the remaining populations together Out of this often violent religious intolerance grew popular nationalist sentiment Only after a core and exclusive nationality was formed in England and France and less successfully in Spain did these countries move into the enlightened 19th century all the while continuing to export intolerance and exclusion to overseas colonies Providing an explicitly political theory of early nation building rather than an account emphasizing economic imperatives or literary imaginings Marx reveals that liberal secular Western political traditions were founded on the basis of illiberal intolerant origins His provocative account also suggests that present day exclusive and violent nation building or efforts to form solidarity through cultural or religious antagonisms are not fundamentally different from the West's own earlier experiences *The Origins of the Slavic Nations* Serhii

Plokhyy, 2006-09-07 This book documents developments in the countries of eastern Europe including the rise of authoritarian tendencies in Russia and Belarus as well as the victory of the democratic Orange Revolution in Ukraine and poses important questions about the origins of the East Slavic nations and the essential similarities or differences between their cultures It traces the origins of the modern Russian Ukrainian and Belarusian nations by focusing on pre modern forms of group identity among the Eastern Slavs It also challenges attempts to nationalize the Rus past on behalf of existing national projects laying the groundwork for understanding of the pre modern history of Russia Ukraine and Belarus The book covers the period from the Christianization of Kyivan Rus in the tenth century to the reign of Peter I and his eighteenth century successors by which time the idea of nationalism had begun to influence the thinking of East Slavic elites **Power and the Nation in**

European History Len Scales, Oliver Zimmer, 2005-06-09 Few would doubt the central importance of the nation in the making and unmaking of modern political communities The long history of the nation as a concept and as a name for various sorts of imagined community likewise commands such acceptance But when did the nation first become a fundamental political factor This is a question which has been and continues to be far more sharply contested A deep rift still separates

modernist perspectives which view the political nation as a phenomenon limited to modern industrialised societies from the views of scholars concerned with the pre industrial world who insist often vehemently that nations were central to pre modern political life also This book engages with these questions by drawing on the expertise of leading medieval early modern and modern historians

The ^AOxford Handbook of Religion, Conflict, and Peacebuilding Atalia Omer,R. Scott Appleby,David Little,2015-03-02 The book provides a comprehensive overview of the literature on religion conflict and peacebuilding With a focus on structural and cultural violence the volume also offers a cutting edge interdisciplinary reframing of the scope of scholarship in the field

Between Babel and Beast Peter J. Leithart,2012-07-06 The United States is one of history s great Christian nations but our unique history success and global impact have seduced us into believing we are something more God s New Israel the new order of the ages the last best hope of mankind a redeemer nation Using the subtle categories that arise from biblical narrative Between Babel and Beast analyzes how the heresy of Americanism inspired America s rise to hegemony while blinding American Christians to our failures and abuses of power The book demonstrates that the church best serves the genuine good of the United States by training witnesses martyr citizens of God s Abrahamic empire

Figurations of France Marcus Keller,2011-04-22 In Figurations of France Literary Nation Building in Times of Crisis 1550 1650 Marcus Keller explores the often indirect and subtle ways in which key texts of early modern French literature from Joachim Du Bellay s D fense et illustration de la langue fran aise to Corneille s Le Cid contribute to the fiction of France as a nation Through his fresh take on these and other classics he shows that they not only create the French as an imaginary community but also provide venues for an incisive critique of the political and cultural construct that underpins the modern nation state Current theories of nationhood in particular the concepts of the nation form and fictive ethnicity tienne Balibar inform the close readings of Du Bellay s D fense Ronsard s Discours d Aubign s Tragiques Montaigne s Essays Malherbe s odes and Corneille s Le Cid and Horace They reveal the imaginary power and unifying force of early modern figurations of France that come to bear in this heteregoneous corpus of French literature with texts ranging from manifesto and epic poem to essay and tragedy Situating each author and text in their particular historical context the study suggests that the literary invention of France in the sixteenth and seventeenth centuries is as abundant as it is conceptually innovative Du Bellay for example develops an idea of France by portraying the French language as a pruned and grafted tree while d Aubign proposes to think of the French as a nuclear but fatherless family Blood functions as a highly charged metaphor of nationhood in all texts Opening up new perspectives on these canonical works the focus on literary nation building also puts them into unexpected and thought provoking relationships to each other Figurations of France deliberately crosses the fictive boundary between the sixteenth and the seventeenth centuries and argues that in terms of imaginary nation building the contours that delineate the early modern period and separate it from what we call the modern era quickly begin to dissolve Ultimately the book makes the case for early modern literature as a creative and critical

discourse able to nourish and nuance our thinking about the nation as the postmodern nation state is increasingly called into question by the economical political and cultural effects of globalization Published by University of Delaware Press

Islam and Competing Nationalisms in the Middle East,

1876-1926 Kamal Soleimani, 2016-06-15 Opposing a binary perspective that consolidates ethnicity religion and nationalism into separate spheres this book demonstrates that neither nationalism nor religion can be studied in isolation in the Middle East Religious interpretation like other systems of meaning production is affected by its historical and political contexts and the processes of interpretation and religious translation bleed into the institutional discourses and processes of nation building This book calls into question the foundational epistemologies of the nation state by centering on the pivotal and intimate role Islam played in the emergence of the nation state showing the entanglements and reciprocities of nationalism and religious thought as they played out in the late nineteenth and early twentieth century Middle East
