## **Faith Security And Risk The Dynamics Of Spiritual Growth:**

**Faith: Security and Risk** Richard W. Kropf, 2003-06-20 Is faith a search for security Is faith the reason for taking risks The answer to these questions will ultimately determine the quality of our faith whether it will be a faith that flourishes and grows or a faith that is stunted and limited Author Richard Kropf analyzes these faith choices with a unique approach He combines the psycho dynamics of Viktor Frankl the faith analysis of Avery Dulles and the faith stages researched by James Fowler to provide a provocative foundation for understanding our spiritual life Kropf then takes us through each faith level and highlights the challenges and pitfalls along the way He covers the broad range of topics from compulsive religious behavior fundamentalism and various enthusiasms to adolescent and mid life crises of faith and the risks of trying to achieve sainthood Faith Security and Risk is ideal for pastors spiritual directors and professional counselors and is particularly designed to complement spiritual workshops and retreats Each chapter ends with a series of questions that provide excellent stimulus for small group discussion as well as personal reflection This book has also proved most helpful for college professors as an excellent text for their students seeking to understand their own faith struggles *Logical Faith* Joseph P. Provenzano, Richard W. Kropf, 2007-07-30 Science has failed to develop ethical guidelines or a path to personal fulfillment as previously expected Religious differences continue to be a source of friction threatening world peace But now a new more encompassing vision of reality a vision that offers new ways to address these problems is emerging This evolutionary view presented by authors Joseph P Provenzano and Richard W Kropf builds on the findings of modern science but also touches on personal fulfillment and spiritual values In our worldwide computerized information age we have seen an unprecedented clash of moral values scientific pursuits religions spiritual movements and cultures Provenzano and Kropf explain how it is possible to have a religious faith consistent with the understanding of matter and energy as studied by contemporary science logical faith Logical Faith Introducing a Scientific View of Spirituality and Religion presents a clear down to earth formulation of an emerging vision Provenzano and Kropf show how their viewpoint can be used as a bridge between science and spirituality and as a base to develop a new path to tolerance among the world s great religions and spiritual movements

The Faith of Jesus Richard W. Kropf, 2006-01-01 Combining the faith development theory of James Fowler with the psychodynamics of Viktor Frankl and utilizing many of the insights of contemporary biblical scholarship the author has here proposed a unique and provocative interpretation of the life of Jesus as described in the Epistle to the Hebrews as the leader and perfecter of faith No doubt many will find this approach to a life of Christ to be novel even disturbingly unorthodox Yet it has been written in the conviction that the faith of most Christians for the most part has fallen into the heresy of monophysitism if not in theory at least in practice amounting to a denial of Jesus as a human being and as a result a person of faith In addition in his Christological Postscript the author has sketched out the beginnings of a new more evolutionary approach to understanding how Jesus might be understood to be divine even while remaining the fully human character

depicted in this book      **Suspended God** Maeve Louise Heaney, 2022-03-24 Heaney traces the hidden history of music's presence in Christian thought including its often unrecognized influence on key figures such as von Balthasar Barth and Bonhoeffer She uses Lonergan's theological framework to explore musical composition as a theological act showing why when and how music is a useful symbolic form The book introduces eleven ground breaking theologians and each chapter offers an entry point into the thought of the theologian being presented through an original piece of music which can be found on the companion website <https://bloombsbury.pub/suspendedgod> Heaney argues that music is a universally important means of making sense of life with which theology needs to engage as a means of expression and of development Musical composition is presented as an appropriate and even necessary form of doing theology in its quest to engage with the past mediate truth to the present and tradition it into the future      Views from a Hermitage Richard W. Kropf, 2008-01-01 This book consists of a collection of about one hundred short essays on the subject of the influence for better or for worse of religion in today's world They were written by a retired Catholic priest and theologian who beginning in 1981 left academia to live a more strictly contemplative life in a cabin in Michigan's north woods Selected from about two hundred such works written over seven years time late 1999 to mid 2007 the essays in this book have been rearranged into ten sub topics ranging from faith and belief science and religion war and peace ethics and politics and Jesus and Christianity to ever mounting concerns over the environment Nevertheless within each broad subject the chronological sequence and development of the author's views has also been retained Originally inspired by both the example and the advice of the late monk and writer Thomas Merton although he makes no claims to being a poet the author who once specialized in the thought of Teilhard de Chardin nevertheless emulates the pastoral example of Merton's favorite theologian Karl Barth It is Barth who is said to have written his sermons at his kitchen table with a Bible at one hand and a newspaper at the other It is in this same spirit of living a contemplative life that is still deeply engaged with the world that the author shares his thoughts with anyone who cares about the future of our planet and the human race      *Pierre Teilhard De Chardin on People and Planet* Celia Deane-Drummond, 2017-07-05 Humanity's relationship to nature is central to the work of Pierre Teilhard de Chardin an influential priest and scientist of the twentieth century Teilhard believed that spiritual development must be viewed alongside material development and that evolutionary theory lies at the heart of humanity's understanding of its place in the world Pierre Teilhard de Chardin on People and Planet argues that Teilhard's cosmic mysticism and intense interest in both cosmological and evolutionary sciences are highly relevant to current debates about how best to construct a meaningful spirituality The book offers a critical revision of Teilhard's thought in the light of current debates in evolutionary science ecology and environmental ethics The essays present fresh interpretations of Teilhard's work and point to the significance of his thought in the contemporary study of science and religion      Spiritual Connections Brian P. Hall, 2006-08-01 In *Spiritual Connections* The Journey of Discipleship and Christian Values psychologist priest Brian P Hall shares his own discernment of

God's will in order to instruct others about their own personal discernment of Jesus' call to discipleship. In easily read though highly focused form he instructs the reader on practical skills basic to making faith, hope, and love vital. Here is a map of the landscape of discipleship as mediated by the values which energize our lives. The thoughtful reader will come away with a deeper sense of his or her own values, how these reflect and express one's personal relationship with Jesus, and from an empirical research point of view, how elegantly these values make sense of our being called forth into all that God intends us to become. James B. Ashbrook, author of *Minding the Soul: Pastoral Counseling As Remembering*. Dr. Brian P. Hall is Professor Emeritus of Pastoral Counseling at Santa Clara University and an ordained Episcopal priest. He is also chairman of Values Technology, an organization committed to training religious and corporate leaders in values theory and its application in order to bring about changes that result in a more caring, interdependent society worldwide.

**Evil and Evolution: A Theodicy** Richard W. Kropf, 2004-08-18. First published in 1984 and recently revised and updated, this book deals with the problem of evil or theodicy: God's justice. It contends that the process of evolution, particularly as it bears on the emergence of free will, rather than being a barrier to faith, gives us the key to understanding its greatest obstacle: the existence of so much suffering in the world. It further advances the still-contested claim that God is truly our fellow sufferer in our struggle to overcome evil in all of its many forms.

**Functional Images of the Religious Educator** Timothy Arthur Lines, 1992. *FUNCTIONAL IMAGES OF THE RELIGIOUS EDUCATOR* is one of those rare and precious books which helps religious educators explore and clarify their own special identity as religious educators. This special identity is revealed in ten basic functional roles which are central to religious education enactment. The author shows that while religious educators perform most, and possibly all, these ten basic functional roles, nonetheless one predominates. This dominant role, plus the way the religious educator harmoniously integrates the other roles into the dominant one, is the key to each religious educator's own special identity.
