*The Culture of the Incarnation: Essays in Catholic Theology* Tracey Rowland, 2017-08-01 In this collection of essays distinguished Australian theologian Tracey Rowland takes up the relationship of Christ and culture broadly understood She contrasts the principles undergirding what St John Paul II called a culture of death with those required for the flourishing of a humanism that flows from the grace of the Incarnation Rowland returns frequently to the theological insights of Joseph Ratzinger Pope Benedict XVI to whose thought she is deeply indebted Drawing upon the Augustinian and Thomist traditions of political theology she offers a trenchant theological critique of liberalism in all its forms with attention to our modern attraction to false utopias and accommodationist impulses The nine essays in this volume engage such perennial topics as the place of natural law the theological status of the world and the nature of true humanism along with timely topics such as the retrieval of the sources of Catholic resistance to Communism and what is now commonly called cultural Marxism Rowland's inimitable voice keen wit and penetrating insight into the distinctiveness of Catholic truth make this book a landmark volume as the Church today revisits anew its relationship to the world

**Global Ethics and Global Common Goods** Patrick Riordan, 2014-12-18 Patrick Riordan takes a different approach to the questions of global ethics by following the direction of questioning initially pioneered by Aristotle for him the most basic question of ethics is what is the good life So in the context of contemporary global ethics the Aristotelian questioner wonders about the good life on a global scale *Global Ethics and Global Common Goods* fills the gap in existing literature caused by the neglect of the topic of the good in global ethics Beginning by outlining answers to questions such as what is good and is there a highest good Riordan demonstrates the value of a common good perspective in matters of universal human rights and their institutions and practices the study of international relations and the construction of global institutions and debates about global justice between cosmopolitanism nationalism and economic globalization Philosophical questions provoked by these debates are identified and pursued such as the question of a common human nature which seems presupposed by the language of universal rights For experienced students of political philosophy and international relations this is a crucial text in the literature exploring the possibilities for politics on a world scale while the perspective of the common good adds a new and

distinctive dimension to current debates on global security and the challenges of managing conflict      *Edward Schillebeeckx and Contemporary Theology* Lieven Boeve, Frederiek Depoortere, Stephan van Erp, 2010-12-09      **Identity and Coherence**

**in Christology** Paul S. Scott, 2023-09-29 This book explores a number of closely related logical and metaphysical questions relating to the identity of Jesus Christ In particular it considers What does Jesus Christ name and How may Jesus Christ be the subject of both divine and human attributes given their apparent incompatibility The author draws on analytic and scholastic influences and integrates them into a rehabilitation of the neglected habitus theory of the hypostatic union The theory maintains a real identity between Christ and the Word and emphasises the instrumental or possessory dimension of Christ's relationship to his human nature This approach allows for an account of the hypostatic union that is true to the indispensable articles of classical Christology and which satisfies the demands of logical coherence Yet at no point is the mystery of the Incarnational event reduced to the strictures of creaturely comprehension The book will be of particular interest to scholars of Christology analytic theology and the philosophy of religion      **St Augustine** Ryan N. these elements live together in community most particularly in the tradition of social encyclicals dating from 1891 Rowlands takes a fresh approach in weaving overviews of the central principles with the development of thinking on political community and democracy migration and integral ecology and by considering the increasingly critical questions concerning the role of CST in a pluralist and post secular context As such this book offers both an incisive overview of this distinctive body of Catholic political theology and a new and challenging contribution to the debate about the transformative potential of CST in contemporary society

*Musical Beauty* Férdia J. Stone-Davis, 2011-01-01 This book offers an important new perspective on the Western tradition of musical aesthetics through an examination of Anicius Boethius and Immanuel Kant Within the trajectory illuminated by these two thinkers musical meaning is framed by and formed through the concept of beauty a concept which is shaped by prior understandings about notions of the self and the world Beauty opens up a space within which the boundary between the self and the world subject and object is negotiated and configured In doing so either the subject or the object is asserted to the detriment of the other and to the physicality of music This book asserts that the uniqueness of music's ontology emerges from its basis in sound and embodied practice It suggests that musical beauty is generated by the mutuality of subject and object arising within the participation that music encourages one which involves an ekstatic mode of attention on the part of the subject

*Rethinking the Ontological Argument* Daniel A. Dombrowski, 2006-05-29 In recent years the ontological argument and theistic metaphysics have been criticised by philosophers working in both the analytic and continental traditions Responses to these criticisms have primarily come from philosophers who make use of the traditional and problematic concept of God In this volume Daniel A Dombrowski defends the ontological argument against its contemporary critics but he does so by using a neoclassical or process concept of God

thereby strengthening the case for a contemporary theistic metaphysics Relying on the thought of Charles Hartshorne he builds on Hartshorne's crucial distinction between divine existence and divine actuality which enables neoclassical defenders of the ontological argument to avoid the familiar criticism that the argument moves illegitimately from an abstract concept to concrete reality His argument thus avoids the problems inherent in the traditional concept of God as static

D'Souza, 2016-10-01 Today's pluralist and multicultural society raises questions about how to teach religiously and ethnically diverse students in Catholic schools A Catholic Philosophy of Education addresses these challenges by examining

the documents from the Roman Congregation for Catholic Education alongside the writings of Jacques Maritain and Bernard Lonergan Mario D Souza proposes a contemporary formulation for a Catholic philosophy of education in which the ideals of Catholicism form the basis for the mission of the Catholic school Drawing on the Church s educational documents and informed by Maritain and Lonergan D Souza explains how the unifying anthropology of Catholic education enables Catholic schools to serve amidst diversity by avoiding the extremes of religious exclusivism and fundamentalism on the one hand and relativism and individualism on the other He explores the aims of Catholic schools in relation to students teachers and society and the relationship between goodness discipline and knowledge He argues that students must be educated for personal and communal freedom and authenticity and to strive for the common good suggesting how a Catholic philosophy of education can provide the framework for such personal and communal transformation Essential reading for new and experienced Catholic educators A Catholic Philosophy of Education demonstrates that Maritain and Lonergan have much to offer in service of an education that is liberating instructive illuminating and integrative
