Faces In The Clouds A New Theory Of Religion:

Faces in the Clouds Stewart Elliott Guthrie, 1995-04-06 Religion is universal human culture No phenomenon is more widely shared or more intensely studied yet there is no agreement on what religion is Now in *Faces in the Clouds* anthropologist Stewart Guthrie provides a provocative definition of religion in a bold and persuasive new theory Guthrie says religion can best be understood as systematic anthropomorphism that is the attribution of human characteristics to nonhuman things and events Many writers see anthropomorphism as common or even universal in religion but few think it is central To Guthrie however it is fundamental Religion he writes consists of seeing the world as humanlike As Guthrie shows people find a wide range of humanlike beings plausible Gods spirits abominable snowmen HAL the computer Chiquita Banana We find messages in random events such as earthquakes weather and traffic accidents We say a fire rages a storm wreaks vengeance and waters lie still Guthrie says that our tendency to find human characteristics in the nonhuman world stems from a deep seated perceptual strategy in the face of pervasive if mostly unconscious uncertainty about what we see we bet on the most meaningful interpretation we can If we are in the woods and see a dark shape that might be a bear or a boulder for example it is good policy to think it is a bear If we are mistaken we lose little and if we are right we gain much So Guthrie writes in scanning the world we always look for what most concerns us living things and especially human ones Even animals watch for human attributes as when birds avoid scarecrows In short we all follow the principle better safe than sorry Marshalling a wealth of evidence from anthropology cognitive science philosophy theology advertising literature art and animal behavior Guthrie offers a fascinating array of examples to show how this perceptual strategy pervades secular life and how it characterizes religious experience Challenging the very foundations of religion *Faces in the Clouds* forces us to take a new look at this fundamental element of human life *Faces in the Clouds* Stewart Guthrie, 1992 *An Ancient Theory of Religion* Nickolas Roubekas, 2016-12-08 *An Ancient Theory of Religion* examines a theory of religion put forward by Euhemerus of Messene late 4th early 3rd century BCE in his lost work *Sacred Inscription* and shows not only how and why euhemerism came about but also how it was and still is used By studying the utilization of the theory in different periods from the Graeco Roman world to Late Antiquity and from the Renaissance to the twenty first century this book explores the reception of the theory in diverse literary works In so doing it also unpacks the different adoptions and misrepresentations of Euhemerus's work according to the diverse agendas of the authors and scholars who have employed his theory In the process certain questions are raised What did Euhemerus actually claim How has his theory of the origins of belief in gods been used How can modern scholarship approach and interpret his take on religion When referring to euhemerism whose version are we employing *An Ancient Theory of Religion* assumes no prior knowledge of euhemerism and will be of interest to scholars working in classical reception religious studies and early Christian studies ***Crossing and Dwelling* Thomas A. TWEED, 2009-06-30** A deeply researched and vividly written study this book depicts religion in place and in movement

dwelling and crossing Drawing on insights from the natural and social sciences Tweed's work is grounded in the gritty particulars of distinctive religious practices even as it moves toward ideas about cross cultural patterns It offers a responsible way to think broadly about religion a topic that is crucial for understanding the contemporary world

The Red Planet Bill Hatcher,2024-04-16 We humans have an extraordinary capacity for compassion much of it in response to the atrocities we inflict on the planet its animals and each other The popular explanation for this paradox is that we evolved as carnivorous killer apes who gradually curbed our lust for violence with frequent exceptions by implementing humane social norms This explanation is so well worn especially in the American psyche that it epitomizes cliché So we could be forgiven for believing it when nearly every word is fiction Current research shows that our original biological and social programming is nonviolent So what changed What turned us from goddess worshiping plant eating peacemakers into god worshiping animal eating warmongers Find out in this fresh avant garde nonfiction The Red Planet Gendered Landscapes and Violent Inequalities and learn how our intrinsically feminine predilection for peace may yet save us
