Faces Of Infinity:

Faces of the Infinite Stefan Sperl, Yorgos Dedes, 2022-01-06 Neoplatonism forms part of the common heritage of the Christian Jewish and Muslim cultures of the greater Mediterranean and left its mark on the region's poets. The verses composed from Late Antiquity to the modern period in the seven languages which were representative of the region confirm the cross-cultural relevance of Neoplatonic thought.

New Trends in Intuitive Geometry Gergely Ambrus, Imre Bárány, Károly J. Böröczky, Gábor Fejes Tóth, János Pach, 2018-11-03 This volume contains 17 surveys that cover many recent developments in Discrete Geometry and related fields. Besides presenting the state of the art of classical research subjects like packing and covering, it also offers an introduction to new topological, algebraic and computational methods in this very active research field. The readers will find a variety of modern topics and many fascinating open problems that may serve as starting points for research.

The Shape of God Terry David Silvercloud, 2007 An explanation about the nature of material reality and motion, how solids, liquids and gases come to be, the nature of the Sun and planets, the importance and nature of shapes and dimensional values, human evolution, the nature of religions and God, problems upon Earth and possible solutions, the history of Islam, the history of Christianity, the history of the Bible, the history of the Knights Templar, the history of the Freemasons, notes about wave lengths and frequencies. I will prove to you that the Earth has never made a circle nor an ellipse around the Sun and never will. I will prove to you that something DOES go much faster than light and that it does indeed curve space. The stuff that goes faster than light is the sub-atomic stuff that presents to us the stuff we call matter. How about that? And that's just the beginning of surprises.

Levinas Faces Biblical Figures Yael Lin, 2014-03-20 This collection of essays is an attempt to capture the drama of the encounter of the facing of Levinas and the biblical text. It seeks to link Jewish experience and Levinasian themes such as responsibility, substitution, hospitality, suffering and forgiveness and at the same time make the biblical text accessible in a new way. The book offers new insights on the opening up of Levinas's thought and biblical stories to one another; it considers the ways in which Levinas can open up the biblical text to questioning and how the biblical text can inform our reading of Levinas. Setting up in dialogue the heteronomic texts, the narrative texts of the Bible and Levinas's philosophical texts allows an enforced and renewed understanding of both. The examination of these issues is pursued from diverse perspectives and disciplines, probing the role biblical figures play in Levinas's thought and the manner by which to approach them. Do the biblical allusions serve in Levinas's thought merely as a rhetorical and literary device, as illustrations of his ideas, or perhaps they have a deeper philosophical meaning which contributes to his project in general? Do the references to biblical figures work in Levinas's philosophy in a way that other literary figures are incapable of, and how do these references comply with his conflicted attitude towards literature?

The Origin of God Sorin Cerin, 2006-06 The author is the main character of this work in which he travels through other dimensions and the origin of the universe is revealed to him.

The Divine Light Sorin Cerin, 2010-11-10 Everything have

started by some few dreams which not just that I would never forget my entire life but more than that I don't think it was just dreams in the right sense of the notion dream I was conscious during the rest that I was sleeping What it could be said that I was dreaming is nothing else than a real experience in a space from where I can come back anytime in the world where I am sleeping I was at the beginning somewhere on the fringe of an unknown town in the night While I have looked at the multicolored lights from any distance I started to become easier so easy that I felt in a moment I could fly Sorin Cerin The

Hybrid Face Massimo Leone, 2023-12-12 This original and interdisciplinary volume explores the contemporary semiotic dimensions of the face from both scientific and sociocultural perspectives putting forward several traditions aspects and signs of the human utopia of creating a hybrid face The book semiotically delves into the multifaceted realm of the digital face exploring its biological and social functions the concept of masks the impact of COVID 19 AI systems digital portraiture symbolic faces in films viral communication alien depictions personhood in video games online intimacy and digital memorials The human face is increasingly living a life that is not only that of the biological body but also that of its digital avatar spread through a myriad of new channels and transformable through filters post productions digital cosmetics all the way to the creation of deepfakes The digital face expresses new and largely unknown meanings which this book explores and analyzes through an interdisciplinary but systematic approach The volume will interest researchers scholars and advanced students who are interested in digital humanities communication studies semiotics visual studies visual anthropology cultural studies and broadly speaking innovative approaches about the meaning of the face in present day digital societies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **Buildings and Classical Groups** Paul B.

Garrett, 1997-04-01 Buildings are highly structured geometric objects primarily used in the finer study of the groups that act upon them In Buildings and Classical Groups the author develops the basic theory of buildings and BN pairs with a focus on the results needed to apply it to the representation theory of p -adic groups In particular he addresses spherical and affine buildings and the spherical building at infinity attached to an affine building He also covers in detail many otherwise apocryphal results Classical matrix groups play a prominent role in this study not only as vehicles to illustrate general results but as primary objects of interest The author introduces and completely develops terminology and results relevant to classical groups He also emphasizes the importance of the reflection or Coxeter groups and develops from scratch everything about reflection groups needed for this study of buildings In addressing the more elementary spherical constructions the background pertaining to classical groups includes basic results about quadratic forms alternating forms and hermitian forms on vector spaces plus a description of parabolic subgroups as stabilizers of flags of subspaces The text then moves on to a detailed study of the subtler less commonly treated affine case where the background concerns p -adic numbers more general discrete valuation rings and lattices in vector spaces over ultrametric fields Buildings and Classical Groups provides

essential background material for specialists in several fields particularly mathematicians interested in automorphic forms representation theory p adic groups number theory algebraic groups and Lie theory No other available source provides such a complete and detailed treatment

Illuminati Bible of Divine Light: Part one Sorin Cerin, 2021-07-10 With the appearance of my first philosophical studies but also of aphorisms I initially published the book entitled Bible of the Light and then a more complete form of the book Bible of the Light was the book entitled The Illuminati Bible so that in present to publish the full form of the Bible which I felt that it will be perfected with the help of God and which I decided to call the Illuminati Bible of Divine Light Some will wonder why I chose this name of The Illuminati Bible starting with that book published in 2014 the content of which is also in this book called the Illuminati Bible of Divine Light which in turn contains many other parts Simple Firstly because I wanted to help in Good the Karma of this World because Illuminati and Enlightenment are spoken of in negative terms and secondly because Illuminati comes from Enlightenment and true Enlightenment cannot bring the Evil nor can it be the Evil vile True Enlightenment must be based only on Good and never on bringing the Evil as the supreme Wickedness Therefore in order to improve the Karma of Mankind I show that Enlightenment does not consist in Wickedness but in combating Wickedness The enlightened ones cannot be a hidden group of people who lead humanity out of the shadows committing all sorts of evils and abuses to maintain power These people are by no means Enlightened but Dark If there really are some in such a situation then they use the term Illuminati or Enlightened falsely How just as Dark are those who dirtyly attack on the true Illuminati or Enlightened only out of obscure interests of a religious nature for fear that the Enlightened ones might open the souls of the People and show them the Way to the Truth from which some high prelates that are at the head of certain churches flee who are afraid that if the Truth would be found they will lose both their financial and their decision making power I believe that the future will belong to those truly Enlightened the true Illuminati A thing is to use Evil to bring through it Good and another is to use Evil to bring through it the Wickedness The true Enlightened and not Dark are those who understand that the Evil can only be used for Good when he can do it and the Good only for the Evil less Evil when the Good itself can lead to destruction disaster or pain The real Bad People the Dark Ones are the ones who use both Good and Evil to do as much as possible Evil and not Good Mankind must understand that the Evil and Good the God and the Devil are an Entity with two distinct characteristics an Entity that defines our True God that is our Creator Factor and Unique Incidentally Therefore in order to improve the Karma of this World we will have to pray to the Universal Consciousness formed by the Universal Pure Language That is to pray to the Divine Light of all the Worlds the Supreme God of Intelligence which to inspire our thoughts so that to use in moderation both Good and Evil for the ultimate purpose of doing and bringing through us as much as possible Good Why didn't I let in continuation the name of the Illuminati Bible and to this new much deeper work of the Bible and call it the Illuminati Bible of Divine Light Because compared to the other book called the Illuminati Bible the Illuminati Bible of Divine Light contains in addition to the content

Merleau-Ponty and the Face of the World Glen A. Mazis, 2016-09-21 Assesses Merleau Ponty's contribution to ethics as calling for a poetic interplay between perception and imagination and between silence and solidarity that reveals our place in the world and our obligations to ourselves and others Before his death in 1961 Merleau Ponty worried about what he saw as humanity's increasingly self enclosed and manipulative way of experiencing self others and the world the consequences of which remain apparent in our destructive inability to connect with others within and across cultures In *Merleau Ponty and the Face of the World* Glen A Mazis provides an overall consideration of Merleau Ponty's philosophy that brings out what he sees as a corrective prescription for ethical reorientation that is fundamental to Merleau Ponty's thought Mazis begins by analyzing the key role that silence plays for Merleau Ponty as a positive powerful presence rather than a lack or emptiness and then builds on this to explore the ethical significance of the face to face encounter in his thought as one of solidarity rather than obligation In the last part of the book Mazis traces the development of what he calls physiognomic imagination in Merleau Ponty's work This understanding of imagination is not fancy or make believe but rather brings out the depths of perceptual meaning and leads to an appreciation of poetic language as the key to revitalizing both ethics and ontology

Drawing on Merleau Ponty's published works, lecture notes, unpublished writings, and the work of many phenomenologists and Merleau Ponty scholars, Mazis also offers incisive readings of Merleau Ponty's work as it relates to that of Antoine de Saint-Exupéry, Gaston Bachelard, and Emmanuel Levinas.

Ethics as First Philosophy Adrian Peperzak, 2013-12-02 In *Ethics as First Philosophy*, Adrian P. Peperzak brings together a wide range of essays by leading international scholars to discuss the work of the 20th-century French philosopher Emmanuel Levinas. The first book of its kind, this collection explores the significance of Levinas's texts for the study of philosophy, psychology, and religion. Offering a complete account of the most recent research on Levinas, *Ethics as First Philosophy* is an extraordinary overview of the various approaches which have been adopted in interpreting the work of a revolutionary but difficult contemporary thinker.

Hyperbolic Knot Theory Jessica S. Purcell, 2020-10-06 This book provides an introduction to hyperbolic geometry in dimension three with motivation and applications arising from knot theory. Hyperbolic geometry was first used as a tool to study knots by Riley and then Thurston in the 1970s. By the 1980s, combining work of Mostow and Prasad with Gordon and Luecke, it was known that a hyperbolic structure on a knot complement in the 3-sphere gives a complete knot invariant. However, it remains a difficult problem to relate the hyperbolic geometry of a knot to other invariants arising from knot theory. In particular, it is difficult to determine hyperbolic geometric information from a knot diagram, which is classically used to describe a knot. This textbook provides background on these problems and tools to determine hyperbolic information on knots. It also includes results and state-of-the-art techniques on hyperbolic geometry and knot theory to date. The book was written to be interactive with many examples and exercises. Some important results are left to guided exercises. The level is appropriate for graduate students with a basic background in algebraic topology, particularly fundamental groups and covering spaces. Some experience with some differential topology and Riemannian geometry will also be helpful.

Advances in Geometric Modeling and Processing Falai Chen, 2008-04-07 This book constitutes the refereed proceedings of the 5th International Conference on Geometric Modeling and Processing GMP 2008 held in Hangzhou, China, in April 2008. The 34 revised full papers and 17 revised short papers presented were carefully reviewed and selected from a total of 113 submissions. The papers cover a wide spectrum in the area of geometric modeling and processing and address topics such as curves and surfaces, digital geometry, processing geometric feature modeling and recognition, geometric constraint solving, geometric optimization, multiresolution modeling, and applications in computer vision, image processing, scientific visualization, robotics, and reverse engineering.

God, Value, and Nature Fiona Ellis, 2014-10-31 Many philosophers believe that God has been put to rest. Naturalism is the default position, and the naturalist can explain what needs to be explained without recourse to God. This book agrees that we should be naturalists, but it rejects the more prevalent scientific naturalism in favour of an expansive naturalism inspired by David Wiggins and John McDowell. It is argued that expansive naturalism can accommodate the idea of God and that the

expansive naturalist has unwittingly paved the way towards a form of naturalism which poses a genuine challenge to the atheist. It follows that the traditional naturalism versus theism debate must be reconfigured: naturalism and theism are no longer logically incompatible; rather they can both be true. Fiona Ellis draws on a wide range of thinkers from theology and philosophy and spans the gulf between analytic and continental philosophy. She tackles various philosophical problems including the limits of nature and the status of value, some theological problems surrounding the natural/supernatural relation, the Incarnation and the concept of myth, and offers a model inspired by the secular expansive naturalist's conception of philosophy to comprehend the relation between philosophy and theology. **The Chemists' Year Book**, 1916. *Levinas and Lacan* Sarah Harasym, 1998-01-01. Draws attention to the enigmatic missed encounter between Emmanuel Levinas and Jacques Lacan and articulates the theoretical stakes and practical consequences of such a disjunctive encounter for ethics.
