Middle East and Central Asia Dept.,2023-10-12 Across the Middle East and Central Asia the combined effects of global headwinds domestic challenges and geopolitical risks weigh on economic momentum and the outlook is highly uncertain Growth is set to slow this year in the Middle East and North Africa region driven by lower oil production tight policy settings in emerging market and middle income economies the conflict in Sudan and other country specific factors In the Caucasus and Central Asia although migration trade and financial inflows following Russia s war in Ukraine continue to support economic activity growth is set to moderate slightly this year Looking ahead economic activity in the Middle East and North Africa region is expected to improve in 2024 and 2025 as some factors weighing on growth this year gradually dissipate including the temporary oil production cuts But growth is expected to remain subdued over the forecast horizon amid persistent structural hurdles In the Caucasus and Central Asia economic growth is projected to slow next year and over the medium term as the boost to activity from real and financial inflows from Russia gradually fades and deep seated structural challenges remain unsolved Inflation is broadly easing in line with globally declining price pressures although country specific factors including buoyant wage growth in some Caucasus and Central Asia countries and climate related events continue to make their mark Despite some improvement since April the balance of risks to the outlook remains on the downside In this context expediting structural reforms is crucial to boost growth and strengthen resilience while tight monetary and fiscal policies remain essential in several economies to durably bring down inflation and ensure public debt sustainability Contributions to the Mechanism of Natural and Morbid Parturition, Including that of Placenta Praevia, with an Appendix James Matthews Duncan,1875

Labour Mobility in Times of Structural Transformation D. Narasimha Reddy, Kailash Sarap, 2017-11-12 This book examines essential issues and perspectives on rural labour helping readers understand the changes that are currently taking place in the labour markets especially with regard to migrants from rural to urban areas their socio economic conditions factors contributing to such mobility and associated problems Further it addresses the question of why the socio economic conditions of rural labour have not experienced measurable improvements Presenting a collection of painstakingly researched essays that focus on both India and China the book addresses these challenges with an explicit focus on safeguarding the interests of rural labour under the neoliberal dispensation The research is based on primary survey data and analytical issues from selected Asian economies especially from India On the basis of the findings discussed it subsequently suggests ways forward so as to improve the wellbeing of migrant households and put an end to distress migration Lastly the book convincingly argues that improving labour market outcomes and more specifically generating employment and providing alternative livelihood avenues represents the most pressing challenge in rural areas **Karl Marx and the Postcolonial Age** Ranabir Samaddar, 2017-09-07 This book seeks to explicitly engage Marxist and post colonial theory to place Marxism in the context of the post colonial age Those who study Marx particularly in the West often lack an understanding of post colonial realities conversely however those who fashion post colonial theory often have an inadequate understanding of Marx Many think that Marx is not relevant to critique postcolonial realities and the legacy of Marx seldom reaches the post colonial countries directly This work will read Marx in the contemporary post colonial condition and elaborate the current dynamics of post colonial capitalism It does this by analysing contemporary post colonial history and politics in the framework of inter relations between the three categories of class people and postcolonial transformation Examining the structure of power in postcolonial countries and revisiting the revolutionary theory of dual power in that context it appreciates and explains the transformative potentialities of Marx in relation to post colonial condition Examining Workers' Rights and Violence Against Labor Union Leaders in Colombia United States.
