White,John Hugh McQuillen,George Jacob Ziegler,James William White,Edward Cameron Kirk,Lovick Pierce Anthony,1872 A Reference Handbook of the Medical Sciences Albert Henry Buck,1893 **Strategic Instincts** Dominic D. P. Johnson,2020-09-08 At the heart of much work in international relations is the attempt to understand why citizens and leaders act as they do and over the last decade a growing body of research has shown that the rational choice theory that has long guided this understanding is insufficient People do not always behave rationally instead most of us have psychological biases that cause us to behave irrationally As political science has integrated this new behavioral research the literature has tended to view such biases as source of errors or mistakes Yet for other fields most notably evolutionary biology the same psychological biases are recognized as adaptive heuristics that evolved to improve our decision making not to undermine it In this book Johnson uses his cross disciplinary training to push this evolutionary understanding of biases into the study of politics Specifically he asks when and how can psychological biases cause or promote success in the realm of international relations Johnson focuses on three of the most prominent psychological biases overconfidence the fundamental attribution error the tendency to see others actions as motivated by personality rather than the influence of external situational factors and in group out group bias favoring members of group one identifies with over those one does not He outlines the scientific research on each bias explores its adaptive advantages and then gives detailed historical examples where the bias seems to have caused strategic advantages focusing on the American Revolution overconfidence the UK and the appeasement of Hitler fundamental attribution error and the Pacific campaign in WW2 group bias He then circles back to acknowledge the dark side of biases when taken to the extreme considering how confidence becomes hubris the attribution error becomes paranoia and group bias becomes racism Ultimately Johnson argues that this evolutionary perspective is the crucial next step in bringing psychological insights to bear on the foundational questions in the field
