Faces Of Power:

Faces of Power Andrew Stewart, 1993 During his reign and following his death the physiognomy of Alexander the Great was one of the most famous in history adorning numerous works of art This study demonstrates how the various portraits transmit not so much a likeness of Alexander as a set of clichés that symbolized the ruler *Faces of Power* Seyom Brown, 2015-02-17 Seyom Brown's authoritative account of U S foreign policy from the end of the Second World War to the present challenges common assumptions about American presidents and their struggle with power and purpose Brown shows Truman to be more anguished than he publicly revealed about the use of the atomic bomb Eisenhower and George W Bush to be more immersed in the details of policy formulation and implementation than generally believed Reagan to be more invested in changing his worldview while in office than any previous president and Obama to have modeled his military exit from Iraq and Afghanistan more closely to Nixon and Kissinger's exit strategy from Vietnam than he would like to admit Brown's analyses of Obama's policies for countering terrorist threats at home and abroad dealing with unprecedented upheavals in the Middle East preventing the proliferation of nuclear weapons and containing new territorial expansion by China and Russia reinforce the book's constancy and change theme which shows that serving the interests of the most powerful country in the world transforms the Oval Office's occupant more than its occupant can transform the world Praise for previous editions Systematic and informative Brown has a gift for clear analysis that makes his book a useful contribution to the Cold War literature The Journal of American History Comprehensive and clear thorough without ever becoming dull providing detailed analysis of decisions while never neglecting the environment within which they are made International Affairs An excellent reference for those interested in United States foreign policy Well written and well researched it is appropriate for use in both undergraduate and graduate courses International Journal An analysis with difference an important difference Seyom Brown discusses United States policy from the perspective of how decision makers in the United States viewed their adversaries and the alternatives as those decision makers saw them Well worth the effort of a careful reading American Political Science Review **Three Faces of Power** Kenneth Ewart Boulding, 1990-05 Defining power as the ability to get what we want this volume identifies three major types of power threat power economic power and integrative power It argues that threat power should not be seen as fundamental since it is not effective unless reinforced by economic and integrative power **The Faces of Power** Seyom Brown, 1994 In the new edition of this major work Seyom Brown brings his authoritative account of United States foreign policy completely up to date with analyses of the Truman administration to the Clinton administration Most notably Brown provides an insightful overview of the last three presidencies beginning with an expanded treatment of the Reagan years to the first major scholarly assessment of Bush's foreign policies to Clinton's early ambivalence toward grappling with the dilemmas of the post Cold War world *Faces of Power & Piety* Erik Inglis, 2008 Faces of Power and Piety is the second in the Medieval Imagination series of small affordable

books that draw on manuscript illuminations in the collections of the J Paul Getty Museum and the British Library Each volume focuses on a particular theme to provide an accessible and delightful introduction to the imagination of the medieval world The vivid and charming faces featured in this volume include portraits of both illustrious historical figures and celebrated contemporaries They reveal that medieval artists often disregarded physical appearance in favor of emphasizing qualities such as power and piety capturing how their subjects wished to be remembered for the ages Faces of Power and Piety also looks at the development of portraiture in the modern sense during the Renaissance when likeness became an important component of portrait painting An exhibition of the same name will be on view at the J Paul Getty Museum from August 12 through October 26 2008

Red Magic, Black Magic: The Two Faces of Power Alina Rubi, 2025-06-25 This book brings together rituals incantations and secrets of two of the most powerful and controversial forms of magical art black magic and red magic It is not a work for those who seek light without shadow but for those who wish to understand and channel the deepest energies of desire domination transformation and revenge Here you will find ancient practices and modern formulas for energetic control intense attraction separation of bonds personal protection awakening of passion and power over oneself and others Each chapter opens a door to occult knowledge that has been feared persecuted and misunderstood for centuries An intense unadorned and unvarnished guide for those who dare to explore both sides of power the fire it ignites and the shadow it claims

Lampton, 2008-04-30 By learning more not only about China but from China America is more likely to sustain a constructive relationship with the rising China Lampton insightfully provides us with the much needed guidance Zbigniew Brzezinski Center for Strategic and International Studies Professor Lampton's stimulating and well researched book provides a comprehensive framework for intelligent thinking about the implications for the United States and the world of the rapid expansion of China's economic and military power Serious students of world affairs and non specialists concerned about the outlook for U S China relations will all benefit from the historically based insights and judgments that fill the pages of this thought provoking volume J Stapleton Roy former United States ambassador to China

Rethinking Power Thomas E. Wartenberg, 1992-01-01 A collection of 14 essays seven previously published analyzing the nature of power in society and personal lives The different perspectives and divergent conclusions share assumptions that power is important that previous analyses are inadequate and that the only reason to talk about it is in order to improve people's lives No index Paper edition unseen 16 95 Annotation c by Book News Inc Portland Or

The Two Faces of Judicial Power Benjamin G. Engst, 2021-04-17 This book shows that constitutional courts exercise direct and indirect power on political branches through decision making The first face of judicial power is characterized by courts directing political actors to implement judicial decisions in specific ways The second face leads political actors to anticipate judicial review and draft policies accordingly The judicial political interaction originating from both faces is herein formally modeled A cross European comparison of pre conditions of judicial power

shows that the German Federal Constitutional Court is a well suited representative case for a quantitative assessment of judicial power Multinomial logistic regressions show that the court uses directives when evasion of decisions is costly while accounting for the government's ability to implement decisions Causal analyses of the second face of judicial power show that bills exposed to legal signals are drafted accounting for the court These findings re shape our understanding of judicialization and shed light on a silent form of judicialization

Planning in the Face of Power John

Forester,1988-12-21 Why do our best laid plans often over reach and under achieve Why do our attempts to solve problems in some rational way often run afoul of politics and power Why do we so often accomplish so little even as we sense that so much more is possible By looking closely at the work of city planners Planning in the Face of Power addresses these questions and provides a new way of thinking about the practical and inevitably political work of improving our neighborhoods schools community organizations and the public institutions that shape our lives Power and inequality are realities that planners of all kinds must face in the practical world In Planning in the Face of Power John Forester argues that effective public serving planners can overcome the traditional but paralyzing dichotomies of being either professional or political detached and distantly rational or engaged and change oriented Because inequalities of power directly structure planning practice planners who are blind to relations of power will inevitably fail Forester shows how in the face of the conflict ridden demands of practice planners can think politically and rationally at the same time avoid common sources of failure and work to advance both a vision of the broader public good and the interests of the least powerful members of society This book provides a systematic reformulation of the politics of professional practice in the arena of city planning public policy making and public administration and management It has immediate implications for the study of administration and management and for students of administration and planning in schools of social work education and public health While focusing concretely on problems of planning practice e g planners sources of influence their difficulties of listening critically their understandings of the politics of organizations Planning in the Face of Power brings to bear a wide range of theoretical insights and so integrates social and political theory with the demands of actual practice Accordingly the book will be important to practitioners who seek to understand the pressures they face at work as well as social theorists who wish to integrate theory and practice more powerfully but will also appeal to the general reader interested in gaining an understanding of the practice of planning in the face of the realities of social equality and power

Putting Ideas to Work

Mark Mattern,2006-07-08 Offers an alternative to the traditional approaches to the study and teaching of political philosophy Political ideas drawn from historical and analytical political philosophy are used to help rethink public problems and imagine potential solutions to them

Power and Politics

Michael David Parsons,1997-01-01 Provides the most intimate view of federal higher education policymaking since Congress and the Colleges Reveals that despite the lack of power as measured by conventional standards higher education associations have succeeded in convincing Congress to dramatically expand the

scope of federal student aid programs under the 1992 Higher Education Act The Two Faces of Political Apathy Tom DeLuca, 1995 This inclusive study examines the extraordinarily high rates of political nonparticipation in the United States and the political historical institutional and philosophical roots of such widespread apathy To explain why individuals become committed to political apathy as a political role Tom DeLuca begins by defining the two faces of political apathy The first rooted in free will properly places responsibility for nonparticipation in the political process on individuals Political scientists and journalists however too often overlook a second more insidious face of apathy a condition created by institutional practices and social and cultural structures that limit participation and political awareness The public blames our most disenfranchised citizens for their own disenfranchisement Apathetic citizens blame themselves DeLuca examines classic and representative explanations of non participation by political analysts across a range of methodologies and schools of thought Focusing on their views on the concepts of political power and political participation he assesses current proposals for reform He argues that overcoming the second face of apathy requires a strategy of real political equality which includes greater equality in the availability of political resources in setting the political agenda in clarifying political issues and in developing a public sphere for more genuine democratic politics Author note Tom DeLuca is Assistant Professor of Political Science at Fordham College at Lincoln Center He has been a long time activist on local and national issues especially nuclear arms control and his op ed pieces on politics have appeared in The New York Times New York Newsday The Nation and The Progressive **Frameworks of Power** Stewart Clegg, 1989-07-17 This textbook provides a coherent and comprehensive account of the different frameworks for understanding power which have been advanced within the social sciences Though looking back to the classical literature on power with special emphasis on Machiavelli and Hobbes the book concentrates on the modern analysis of power from both British and American social and political theorists and from German Critical Theory and French theorists such as Foucault and develops upon its theory and its application Not only does the book provide an overview of the various frameworks of power advanced by these and other influential thinkers but it also develops a new synthesis based on important work in both the sociology of science *Cosmopolitan Power in International Relations* Giulio M. Gallarotti, 2010-09-27 How can nations optimize their power in the modern world system Realist theory has underscored the importance of hard power as the ultimate path to national strength In this vision nations require the muscle and strategies to compel compliance and achieve their full power potential But in fact changes in world politics have increasingly encouraged national leaders to complement traditional power resources with more enlightened strategies oriented around the use of soft power resources The resources to compel compliance have to be increasingly integrated with the resources to cultivate compliance Only through this integration of hard and soft power can nations truly achieve their greatest strength in modern world politics and this realization carries important implications for competing paradigms of international relations The idea of power optimization can only be delivered through the integration of the three leading paradigms of international

relations Realism Neoliberalism and Constructivism **The Circular Structure of Power** Torben Bech Dyrberg, 1997 Few concepts in social theory have been used so extravagantly in recent years as the notion of power Yet despite its inflated presence the term is still unclear and undertheorized In *The Circular Structure of Power* Torben Dyrberg rises to the challenge of conceptualizing power through a philosophical examination of its uses in contemporary social theory Drawing on the insights of Michel Foucault Ernesto Laclau and Chantal Mouffe Dyrberg brings this continental tradition into a creative dialogue with the Anglo American tradition represented by figures such as Steven Lukes William Connolly Peter Bachrach and Morton Baratz Moreover Dyrberg moves from such abstract considerations to their implications for political and democratic theory through an examination of the work of thinkers as diverse as Robert Dahl John Rawls Jürgen Habermas and Nicos Poulantzas Simultaneously engaging with and defying many of the dominant definitions of power Torben Dyrberg destabilizes and undermines the conventional distinctions and polarities through which power is usually understood The new perspective offered to us by this investigation is one which goes beyond the assumption that power can be based on and derived from either agency or structure as if these categories themselves were not somehow constituted by power

International Governance in the Wto Tomer Broude, 2004 **Shaping the Future of Power** Lina Benabdallah, 2020-07-20 China's rise to power is one of the biggest questions in International Relations theory IRT and foreign policy circles Although power has been a core concept of IRT for a long time the faces and mechanisms of power as it relates to Chinese foreign policymaking has changed the contours of that debate The rise of China and other powers across the global political arena sparks a new visibility for different kinds of encounters between states particularly between China and other Global South states These encounters are more visible to IR scholars because of the increasing influence that rising powers have in the international system This book shows that foreign policy encounters between rising powers and Global South states do not necessarily exhibit the same logics behaviors or investment strategies of Euro American hegemons Instead they have distinctive features that require new theoretical frameworks for analysis *Shaping the Future of Power* probes the types of power mechanisms that build diffuse and project China's power in Africa One must take into account the processes of knowledge production social capital formation and skills transfers that Chinese foreign policy directs toward African states to fully understand China's power building mechanisms The relational power framework requires these elements to capture both the material aspects and ideational people centered aspects to power By examining China's investments in human resource development programs for Africa the book reveals a vital yet undertheorized aspect of China's foreign policy making *Influence and Power* Ruth Zimmerling, 2005-07-19 Exact but not exacting this is a fine work of overview and analysis it makes an excellent contribution to the literature on power and freedom Philip Pettit William Nelson Cromwell Professor of Politics Princeton University In this work the author assumes the task of a logical clean up an extremely valuable contribution to the promotion of scientific rigour and clarity in political scholarship This book gives the

reader orientation in a conceptual jungle It is an excellent analysis of the relationships between normative and social power
Ernesto Garz n Vald s Prof em **Power** John Scott,1994 This collection brings together the indispensable secondary
literature It includes a major introduction which explains why power is a key concept and guides the reader through the
contrasting attempts to understand it
