the most common and most interesting animals around providing essential information and a bullet list of key points on each species Photographs and original artwork represent 900 species total making this the ultimate field guide to the creatures of the continental United States and Canada from your own backyard into the deepest wilderness

**Bad Land Pastoralism in Great Plains Fiction** Matthew J. C. Cella, 2010-04-15 At the core of this nuanced book is the question that ecocritics have been debating for decades what is the relationship between aesthetics and activism between art and community By using a pastoral lens to examine ten fictional narratives that chronicle the dialogue between human culture and nonhuman nature on the Great Plains Matthew Cella explores literary treatments of a succession of abrupt cultural transitions from the Euroamerican conquest of the Indian wilderness in the nineteenth century to the Buffalo Commons phenomenon in the twentieth By charting the shifting meaning of land use and biocultural change in the region he posits this bad land the arid West as a crucible for the development of the human imagination Each chapter deals closely with two novels that chronicle the same crisis within the Plains community Cella highlights for example how Willa Cather reconciles her persistent romanticism with a growing disillusionment about the future of rural Nebraska how Tillie Olsen and Frederick Manfred approach the tragedy of the Dust Bowl with strikingly similar visions and how Annie Proulx and Thomas King use the return of the buffalo as the centerpiece of a revised mythology of the Plains as a palimpsest defined by layers of change and response By illuminating these fictional quests for wholeness on the Great Plains Cella leads us to understand the intricate interdependency of people and the places they inhabit Cella uses the term pastoralism in its broadest sense to mean a mode of thinking that probes the relationship between nature and culture a discourse concerned with human engagement material and nonmaterial with the nonhuman community In all ten novels discussed in this book pastoral experience the encounter with the Beautiful leads to a renewed understanding of the integral connection between human and nonhuman communities Propelling this tradition of bad land pastoralism are an underlying faith in the beauty of wholeness that comes from inhabiting a continuously changing biocultural landscape and a recognition of the inevitability of change The power of story and language to shape the direction of that change gives literary pastoralism the potential to support an alternative series of ideals based not on escape but on stewardship community continuity and commitment

**Great Plains** Michael Forsberg, 2019-03-22 The Great Plains were once among the greatest grasslands on the planet But as the United States and Canada grew westward the Plains were plowed up fenced in overgrazed and otherwise degraded Today this fragmented landscape is the most endangered and least protected ecosystem in North America But all is not lost on the prairie Through lyrical photographs essays historical images and maps this beautifully illustrated book gets beneath the surface of the Plains revealing the lingering wild that still survives and whose diverse natural communities native creatures migratory traditions and natural systems together create one vast and extraordinary whole Three broad geographic regions

in Great Plains are covered in detail evoked in the unforgettable and often haunting images taken by Michael Forsberg. Between the fall of 2005 and the winter of 2008, Forsberg traveled roughly 100,000 miles across 12 states and three provinces from southern Canada to northern Mexico to complete the photographic fieldwork for this project underwritten by The Nature Conservancy. Complementing Forsberg's images and firsthand accounts are essays by Great Plains scholar David Wishart and acclaimed writer Dan O'Brien. Each section of the book begins with a thorough overview by Wishart, while O'Brien, a wildlife biologist and rancher as well as a writer, uses his powerful literary voice to put the Great Plains into a human context, connecting their natural history with man's uses and abuses. The Great Plains are a dynamic but often forgotten landscape, overlooked, undervalued, misunderstood, and in desperate need of conservation. This book helps lead the way forward, informing and inspiring readers to recognize the wild spirit and splendor of this irreplaceable part of the planet.
