Facing Up To Aids 2e Hc

William Shakespeare

Facing Up To Aids 2e Hc:

AIDS in the World II Global AIDS Policy Coalition, 1996 AIDS in the World Vol 1 published in 1992 was the first full analysis of mankind's global confrontation with this disease. The AIDS scene however has been changing so rapidly that the need for a second volume was felt much earlier than expected. In AIDS in the World II the authors extend the international comparisons from 38 countries to the entire world and show that the AIDS pandemic has become increasingly fragmented within the world population. They present data that takes the discussion beyond the current understanding of the vulnerability of nations and communities to the worldwide spread of HIV engaging in a detailed exploration of the social strategies that have enabled individuals to avoid infection. Mann and Tarantola chart a course into the future based on an incisive investigation of the global pandemic and response, the crucial lessons learned from the first decade and their expert understanding of the scientific and social dimensions of the HIV challenge. The authors explain how the variety of reactions to the pandemic has contributed to a more advanced awareness of our vulnerability to HIV/AIDS and offer a blueprint for an expanded global prevention effort. Intended to serve the information needs of all professionals involved in AIDS research and care, this volume's accessibility and clarity of writing make it highly suitable for the general reader as well. Antiretroviral Treatment in Sub-Saharan Africa Tizazu Fetene, Rahel Mesfin, 2013-05-13 The introduction of antiretroviral therapy (ART) in middle and low income countries is arguably one of the most meaningful outcomes recorded in the fight against HIV and AIDS. A record number of some 6.2 million people living with HIV and AIDS are reported to be benefiting from the treatment which is reported to have risen by 19 per cent between 2010 and 2011 and as a result of this the region has also enjoyed a significant decline in AIDS mortality. This volume is the outcome of the call for abstracts put out by OSSREA in 2011 for senior researchers, social scientists and practitioners to write scientific articles on issues surrounding ARVs. The volume contains eight chapters organized into four sections: ART and quality of life, Adherence to ART, Traditional medicine and ART, and Sexual behaviour of ART attendants. The chapters are contributed by academics and researchers from three different African countries: four from Ethiopia, two from Uganda and two from Zimbabwe. **Global Virology II - HIV and NeuroAIDS** Paul Shapshak, Andrew J. Levine, Brian T. Foley, Charurut Somboonwit, Elyse Singer, Francesco Chiappelli, John T. Sinnott, 2017-10-07 This book on NeuroAIDS, a collection of chapters written by experts and specialists from around the world, provides a global perspective on HIV and NeuroAIDS in the field, clinic and laboratory. The chapters address the comorbidity of HIV and other infectious agents including Zika virus, Ebola, Chagas disease, TB and HCV. Also discussed are key topics such as Molecular socioepidemiology, Global HIV and NeuroAIDS, Neuropathology, cART and blood-brain barrier penetration, HIV replicative oscillations, HIV and SIV evolution, Psychiatric comorbidities, Neurosyphilis. The examination of current and innovative models of translational research to translational effectiveness. **The Works of Shakespeare: Henry VI, pt. 1-3, ed. by H.C.
