Fact And Theory An Aspect Of The Philosophy Of Science:

Fact and Theory William Matthew O'Neil, 1969 *Fact and Theory* W.N. O'Neil, 1969 **John Stuart Mill** John Cunningham Wood, 1991 Empirically Informed Ethics: Morality between Facts and Norms Markus Christen, Carel van Schaik, Johannes Fischer, Markus Huppenbauer, Carmen Tanner, 2013-10-07 This volume provides an overview of the most recent developments in empirical investigations of morality and assesses their impact and importance for ethical thinking. It involves contributions of scholars both from philosophy, theology, and empirical sciences with firm standings in their own disciplines but an inclination to step across borders in particular the one between the world of facts and the world of norms. Human morality is complex and probably even messy and this clean distinction becomes blurred whenever one looks more closely at the various components that enable and influence our moral actions and ethical orientations. In that way, morality may indeed be located between facts and norms and an empirically informed ethics that is less concerned with analytical purity but immerses into this moral complexity may be an important step to make the contributions of ethics to this world more valuable and relevant. *The New Werner Twentieth Century Edition of the Encyclopaedia Britannica*, 1906 A Non-Philosophical Theory of Nature A. Smith, 2013-07-18 Utilizing François Laruelle's non-philosophical method, Smith constructs a unified theory of philosophical theology and ecology by challenging environmental philosophy and theology, claiming that engagement with scientific ecology can radically change the standard metaphysics of nature as well as ethical problems related to the natural. *The Encyclopedia Britannica*, 1911 **Whewell's Critics** John R. Wettersten, 2021-10-25 The Encyclopaedia Britannica Hugh Chisholm, 1911 The Encyclopædia Britannica Hugh Chisholm, 1911 **Contemporary Empirical Political Theory** Kristen Renwick Monroe, 2023-11-10 How can we best understand the major debates and recent movements in contemporary empirical political theory? In this volume, the contributors, including four past presidents of the APSA and one past president of the IPSA, present their views of the central core methodologies and development of empirical political science. Their disparate views of the unifying themes of the discipline reflect different theoretical orientations from behavioralism to rational choice, cultural theory to postmodernism and feminism to Marxism. Is there a human nature on which we can construct scientific theories of political life? What is the role of culture in shaping any such nature? How objective and value-free can political theories be? These are only a few of the issues the volume addresses. By assessing where we have traveled intellectually as a discipline and asking what remains of lasting significance in the various theoretical approaches that have engulfed the profession, *Contemporary Empirical Political Theory* provides an important evaluation of the current state of empirical political theory and a valuable guide to future developments in political science. **CONTRIBUTORS** Gabriel Almond, David Easton, Murray Edelman, J. Peter Euben, Bernard Grofman, John Gunnell, Russell Hardin, Edward Harpham, Nancy Hartsock, Jean Lapointe, Theodore Lowi, Kristen Monroe, William Riker, Ian Shapiro, Alexander Wendt, Catherine Zuckert, Michael Zuckert. Khatchadourian,2010-08-01 [Felix Kaufmann's Theory and Method in the Social Sciences](#) Robert S. Cohen,Ingeborg K. Helling,2014-05-19 This volume contains the English translation of Felix Kaufmann's 1895/1945 main work *Methodenlehre der Sozialwissenschaften* 1936 In this book Kaufmann develops a general theory of knowledge of the social sciences in his role as a cross border commuter between Husserl's phenomenology Kelsen's pure theory of law and the logical positivism of the Vienna Circle This multilayered inquiry connects the value oriented reflections of a general philosophy of science with the specificity of the methods and theories of the social sciences as opposed to abstract natural science and psychology The core focus of the study is the attempt to elucidate how and under what conditions scientific knowledge about social facts empirically justified and theoretically embedded can be obtained The empirical basis of knowledge within the social sciences forms a phenomenological concept of experience According to Kaufmann this concept of experience exhibits a complex structure Within the meaning interpretation of human action as the core of knowledge in the social sciences this structure reaches out across the isolated act of verification toward the synthesis of external and internal experiences The book opens with a detailed and useful introduction by Ingeborg K Helling which introduces the historical and theoretical background of Kaufmann's study and specifically illuminates his relation to Alfred Schütz and John Dewey Finally it contains interviews with and letters to members of his family colleagues and students [Albany Law Journal](#) ,1881 *The Albany Law Journal* ,1881 [The Encyclopædia Britannica](#) ,1911 [Encyclopaedia Britannica](#) ,1929 **Philosophical Foundations for a Christian Worldview** J.
