Fact And Relevance:

Fact and Relevance Michael Moïsey Postan, 1971-01-02 A collection of fourteen essays in which Professor Postan draws together for the first time his contributions to the debate on historical method and discusses from a variety of different angles the inter relation of history and the social sciences After making in his first three essays a direct statement of his point of view the author deals with two main aspects of the subject time sequences and theoretical relevance of facts He then proceeds to exemplify his point of view more particularly with relation to macro economics and to certain specific issues within economic history as well as to economic history in general In the final two chapters one is on Karl Marx the other on Hugh Gaitskell he seeks to describe the intellectual climate in which the debate on methodology was held and in which his opinions on the subject were formed The essays contained in this book will be of interest to all those involved in the social sciences economics and history as well as to those specifically concerned with historical methodology The Modern Law of Evidence Adrian Keane, Paul McKeown, 2020 A superbly clear direct and detailed explanation of the rule that underpin the law of evidence The Modern Law of Evidence is well established as a lucid engaging authoritative and comprehensive exploration of the law of evidence The emphasis is on critical focused analysis setting the rules in context and drawing upon both modern practice and a wealth of relevant legal and non legal research An ideal text for undergraduate and postgraduate students including students undertaking the bar course or solicitors training courses The Modern Law of Evidence is also an authoritative resource for legal practitioners and judges including appellate judges in England and Wales and across the Commonwealth Book jacket *Roberts & Zuckerman's Criminal Evidence* Paul Roberts, Adrian Zuckerman, 2022-08-04 Roberts and Zuckerman's Criminal Evidence is the eagerly anticipated third of edition of the market leading text on criminal evidence fully revised to take account of developments in legislation case law policy debates and academic commentary during the decade since the previous edition was published With an explicit focus on the rules and principles of criminal trial procedure Roberts and Zuckerman's Criminal Evidence develops a coherent account of evidence law which is doctrinally detailed securely grounded in a normative theoretical framework and sensitive to the institutional and socio legal factors shaping criminal litigation in practice The book is designed to be accessible to the beginner informative to the criminal court judge or legal practitioner and thought provoking to the advanced student and scholar a textbook and monograph rolled into one The book also provides an ideal disciplinary map and work of reference to introduce non lawyers including forensic scientists and other expert witnesses to the foundational assumptions and technical intricacies of criminal trial procedure in England and Wales and will be an invaluable resource for courts lawyers and scholars in other jurisdictions seeking comparative insight and understanding of evidentiary regulation in the common law tradition *The What and the Why of History* Goldstein, 2021-12-06 The What and the Why of History deals with history as a cognitive discipline concerned to establish justifiable knowledge about a past we can never experience It is divided into three parts The first focuses on the

conditions that are presupposed when historians offer explanations of what they have come to know But whatever is to be explained must first come to be known and the second part is concerned with the character of the cognitive activity which is the constitution of the historical past The point is that we must attend to the historical enterprise on its own terms and not try to make it fit the epistemology of natural science or of common sense The last section deals with Collingwood It is shown that his characteristic positions contribute to an account of historical knowing not historical explanation **The Oxford**

Historical Judgement Jonathan Gorman, 2014-11-27 The historical profession is not noted for examining its own methodologies Indeed

most historians are averse to historical theory In *Historical Judgement* Jonathan Gorman's response to this state of affairs is to argue that if we want to characterize a discipline we need to look to persons who successfully occupy the role of being practitioners of that discipline So to model historiography we must do so from the views of historians Gorman begins by showing what it is to model a discipline by using recent philosophy of law and philosophy of science There are different models at work whose rivalry and resolution are to be historically understood With this approach in place he is able to develop the history of historiography and explore the character of historiography as presented by historians He reveals that historians conform to various norms that historians now and in the past have agreed and disagreed about the same set of interrelated matters truth telling moral judgement and the synthesis of facts and it is this internal understanding that we need to recover if we are to arrive at a correct characterization of the discipline of historiography Demonstrating how the practice of historiography requires choices and therefore the exercise of judgement Gorman is able to show that in their making of judgements historians enjoy the immense benefit of hindsight He shows how in reflecting on their own discipline historians have typically failed to attend adequately to the history of historiography neglecting to situate previous historians within their historical contexts or to pay adequate attention to the fact that present historians too are within a context that will change In addition Gorman's approach which emphasizes the power and necessity of choice and which rests on the pragmatic holistic empiricism of Quine shows postmodernism not to be the threat that some historians feel it to be indeed it is shown to be a radical form of empiricism Gorman shows how the historical enterprise may be established in our factual and moral understanding in the light of our choices and commitments to a shared world *Historical Judgement* is an original and important contribution to the philosophy of history By bringing together the ideas of historians and philosophers Gorman presents a much more practitioner focused examination of the discipline of history one that will hopefully encourage historians to think more about the nature of what they do

Nonconscious Social Information Processing Pawel

Lewicki, 2013-10-22 *Nonconscious Social Information Processing* presents a research program concerned with the processing of social information It cannot be considered a typical social psychological research program however because it is not aimed at explaining any specific social psychological phenomena nor are the cognitive processes studied specific to the processing of social information The program explores complex or high level processing of information that is not mediated by conscious awareness and social cognition seems to be an appropriate area in which to investigate this kind of processing The research program began with observations which suggest that nonconscious acquisition and processing of information play a major role in human development and adjustment The first two chapters discuss these observations and present preliminary theoretical assumptions The subsequent chapters contain reports of 34 experiments on nonconscious information processing The book is addressed not only to personality and social psychologists but also to cognitive psychologists concerned with information processing in general The former may find this research relevant because most of the experiments describe some

mechanisms of acquisition and utilization of social information problems they are working on themselves The latter may want to ignore the specific stimulus material i e social information employed in most of the experiments and focus on the general nature of the cognitive mechanisms studied
