# Myths vs Facts

## About DEPRESSION

MYTH #1:	Depression will not affect me.	
FACT:	Depression is more common than you may think. In the US, more than 17 million adults live with depression yet less than half get treatment. While you may not experience depression, chances are you know someone who does.	
MYTH #2:	Depression and sadness are the same and people can just snap out of it.	
FACT:	Being sad is not the same as having depression. Depression is a mental health condition that causes people to experience extreme sadness, trouble sleeping, loss of energy, difficulty thinking, and more.	
MYTH #3:	People's genetics dictate whether they develop depression.	
FACT:	Depression is caused by one or more factors, including biological factors, life experiences, family history, personality, and environment.	
MYTH #4:	People with depression cannot work in demanding or stressful jobs.	
FACT:	People with depression hold jobs in diverse fields and at all levels of organizations, from the shop floor to the c-suite. Depression impacts people's work and personal lives differently. There is no "one size fits all."	
MYTH #5:	Those impacted by depression do not recover.	
FACT:	With proper treatment, usually consisting of medication, psychotherapy or a combination of both, people with depression can and do get better! Early and effective treatment leads to the best results.

**Unstressable** Mo Gawdat, Egypt, Alice Law, 2024-04-30 Mo Gawdat is an engineer. What most of us see as insurmountable problems, he sees as system overloads to tackle and solve. *Unstressable* breaks stress into inputs and effects, classifying human stressors as stress to the mind, stress to emotions, stress to the body and stress to the soul. Once classified, Gawdat and co-author Alice Law show readers how stress can be predicted and once predicted, prevented. *Unstressable* illuminates for readers how most of us deal with the unpleasant anxiety-producing and even miserable or tragic events in our lives: stress is always a by-product leading directly to inability to cope, health problems and cratered confidence. Gawdat and Law guide readers to both heart-centred and science-based solutions. They'll train readers to develop habits and attitudes of listening and learning that limit stress. Learn the language of de-stressing mind, emotions, body and soul. Respond, not react. Release self-criticism, insomnia and lethargy. Increase energy, focus.

and confidence Unstressable is a handbook for those who understand that stress isn't what happens to you it's how you handle what happens to you It's a practical and rounded approach to an ever increasing modern day problem

**Facts, Fallacies and Frauds in Psychology** Andrew M. Colman, 2024-05-01 Are the effects of hypnosis real or imagined Is intelligence determined by nature or nurture Will ordinary people perform acts of cruelty if ordered to do so by authority figures Are anorexia and bulimia nervosa forms of depression Why do some groups outscore others on IQ tests Is there any real evidence of ESP These are some of the questions that continued to generate fierce arguments among psychologists and excite considerable general interest in the 1980s and beyond But where does the truth lie Originally published in 1987 Facts Fallacies and Frauds in Psychology looks closely at these six popular and controversial issues In each case the central ideas are explained and research findings presented in such a way that readers can begin their own voyage of scientific discovery develop a clearer deeper understanding and find out how psychologists really think Reputations are assessed fraud is unflinchingly exposed This entertaining and provocative book will still fascinate the general reader and provide an excellent introduction for students of psychology This book is a re issue originally published in 1987 The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re publication

*Augmentation of Brain Function: Facts, Fiction and Controversy* Ioan Opris, Manuel F. Casanova, Mikhail Lebedev , 2018-09-14 The Volume II is entitled Neurostimulation and pharmacological approaches This volume describes augmentation approaches where improvements in brain functions are achieved by modulation of brain circuits with electrical or optical stimulation or pharmacological agents Activation of brain circuits with electrical currents is a conventional approach that includes such methods as i intracortical microstimulation ICMS ii transcranial direct current stimulation tDCS and iii transcranial magnetic stimulation TMS tDCS and TMS are often regarded as noninvasive methods Yet they may induce long lasting plastic changes in the brain This is why some authors consider the term noninvasive misleading when used to describe these and other techniques such as stimulation with transcranial lasers The volume further discusses the potential of neurostimulation as a research tool in the studies of perception cognition and behavior Additionally a notion is expressed that brain augmentation with stimulation cannot be

described as a net zero sum proposition where brain resources are reallocated in such a way that gains in one function are balanced by costs elsewhere In recent years optogenetic methods have received an increased attention and several articles in Volume II cover different aspects of this technique While new optogenetic methods are being developed the classical electrical stimulation has already been utilized in many clinically relevant applications like the vestibular implant and tactile neuroprosthesis that utilizes ICMS As a peculiar usage of neurostimulation and pharmacological methods Volume II includes several articles on augmented memory Memory prostheses are a popular recent development in the stimulation based BMIs For example in a hippocampal memory prosthesis memory content is extracted from hippocampal activity using a multiple input multiple output non linear dynamical model As to the pharmacological approaches to augmenting memory and cognition the pros and cons of using nootropic drugs are discussed **Christian Science Sentinel** ,1909
