Toward the Factory of the Future K. Kornwachs, Hans-Jörg Bullinger, Hans-Jürgen Warnecke, 2013-12-14 The International Conference on Production Research has a good tradition The first Conference was held in Birmingham 1971 with 61 participants With respect to the decision that the Conference should be held every second year by this time the Conference has been held in the following countries Birmingham 1971 UK Copenhagen 1973 Denmark Amhurst 1975 USA Tokyo 1977 Japan Amsterdam 1979 The Netherlands Novi Sad 1981 Yugoslavia Windsor 1983 Canada Stuttgart 1985 Germany and the next Conference will take place in Cincinnati 1987 USA The number of submitted abstracts and papers was continuously increasing such that the Programme Committee of this actual 8th Conference on Production Research has been forced to introduce a further refereeing procedure Each submitted abstract was presented to at least two referees This resulted not only in a reduction of the number of presented full papers and poster contributions but as the Programme Committee and the Editors hope it led also to a considerable increase in the scientific quality of this 8th International Conference on Production Research The preceding conference in Windsor Canada was dedicated to the topic Production Research as a Means of Productivity Improvement We don't believe that this statement has become untrue in the meanwhile

Forcing the Factory of the Future Bryn Jones, 1997-06-26 Is computerised production transforming work roles as recent debates about flexible specialisation and post Fordist manufacturing suggest This book focuses on the key case of metalworking batch production in Britain Italy Japan and the USA Looking at technological political and social developments from a comparative perspective it suggests that comprehensive factory principles never fully replaced workshop organisation Drawing on empirical case studies of flexible manufacturing systems Bryn Jones offers a new distinction between the bureaucratic bias of Taylorism and the product standardisation approach of Fordism and questions whether computerised production is transcending Fordism Instead of the often predicted models of deskilled centrally controlled work or a decentralised craft renaissance he shows a greater likelihood of national variations between factory and workshop principles continuing into the contemporary age of computerisation
