Collins, 1998 An examination of geography's critical effects on battles throughout the ages **The Destruction of a Nation** George Wright, 1997 In this thorough examination of US policy towards Angola from 1945 up to the present George Wright assesses how each President from Truman to Clinton has carried out US foreign policy in general and in Angola specifically in a step by step case study that traces the dismantling of a Marxist regime by the West Wright demonstrates the influence that policy planning organisations have in determining foreign policy and emphasizes the internal debates and struggles inherent in carrying out foreign policy This well researched and well documented book is an invaluable critique of US intervention in a Third World state over five decades before and after the end of the Cold War *Everything You Pretend to Know And Are Afraid Someone Will Ask* Lynette Padwa, 1996-04-01 You can fool some of the people all of the time but wouldn't you rather really know what you're talking about Why are conservatives on the right and liberals on the left What is an archetype Most people drop these and other cultural references in conversation all the time without really knowing much about them But with this witty information packed book you can quickly bone up on the actual facts behind the multitude of data events and words that come at you each day and that you've been casually bandying about without really understanding Here are invaluable explanations of a wide range of topics that are assumed to be common knowledge from deciphering newsspeak What is a spin doctor to psychobabble What's the difference between the ego and the id to cyberlingo What is cyberlingo from the supposedly obvious What makes cholesterol good or bad to the deceptively simple What is a formula race car Perfect as a quick reference tool for browsing or simply for sharing impressive newfound knowledge with family and friends this handbook will endow you with genuine cultural literacy in just a few hours of fun filled reading *Literacy as a Moral Imperative* Rebecca Powell, 1999 In this important new book on literacy and teaching practices education scholar and former

schoolteacher Rebecca Powell argues that the decisions we make about literacy in a pluralistic society are fundamentally moral ones either supporting inequitable power relationships or seeking to transform them Powell explores the underlying ideological assumptions of Oschooled literacyO and examines the ways teaching practices create tensions in the lives of students tensions that often result in alienation and educational failure particularly among those whose cultural knowledge and language tends to be marginalized in our nationOs schools While primarily ground in critical theory this volume also draws from multicultural and holistic perspectives in the teaching of written and oral language and addresses the link between whole language and critical pedagogy Thus the text is both theoretical and practical Powell effectively argues that literacy instruction should encourage social responsibility and civic action should enable students and teachers to understand the transformative potential of language and should nurture a culture of compassion and care

Collateral Damage And The United States Air Force Major Patrick M. Shaw,2014-08-15 Minimization of collateral damage is an objective of the United States Air Force USAF whenever it conducts hostile operations While the USAF has often expressed concern about

causing collateral damage its actions have not always reflected a consistent level of commitment This essay explores the evolution of USAF concerns about collateral damage and examines the causes and effects of this unfortunate by product of airpower It concludes that the concerns harbored about causing collateral damage reduce the military effectiveness of airpower This loss of effectiveness is not always important For example when a resource rich coalition conducts an air campaign against an inferior adversary that coalition can discriminate in its application of airpower by allocating great effort to the avoidance of collateral damage In a different context such asymmetry may not exist Commanders then might have to focus on achieving objectives while paying little attention to the possibility of collateral damage In either case collateral damage will likely occur varying only in degree The USAF can take actions which will help alleviate some of the causes of collateral damage Improvements in the areas of planning and technology provide certain relief but ultimately political and military leaders must accept that collateral damage is an inevitable part of airpower **Yellow Steel** William R.
