Buller,2021-10-15 Faculty recruitment is a major expense for colleges and universities and schools devote a considerable amount of their resources to the hiring process But many of these institutions fail to devote the same attention to retaining college professors We ve learned through many studies that it s far less expensive to retain a student you have than to recruit a new one Why is this lesson not also applied to the college faculty This book addresses why higher education currently has a faculty retention problem and then explores the strategies needed to address that problem But now all faculty members are alike Minority faculty members have their own retention challenges as do highly competitive researchers part time and temporary faculty members who excel at teaching and other ley groups The best ways to retain the junior faculty are not necessarily the best ways to retain mid career and senior faculty By examining best practices currently in place in higher education and then combining those insights with research conducted in the corporate world the book encourages colleges and universities to develop a culture of retention that applies to students and faculty members alike   **Mothers in Academia** Maria Castaneda,Kirsten Isgro,2013-06-18 Featuring forthright testimonials by women who are or have been mothers as undergraduates graduate students academic staff administrators and professors Mothers in Academia intimately portrays the experiences of women at various stages of motherhood while theoretically and empirically considering the conditions of working motherhood as academic life has become more laborious As higher learning institutions have moved toward more corporate based models of teaching immense structural and cultural changes have transformed women s academic lives and by extension their families Hoping to push reform as well as build recognition and a sense of community this collection offers several potential solutions

for integrating female scholars more wholly into academic life Essays also reveal the often stark differences between women s encounters with the academy and the disparities among various ranks of women working in academia Contributors including many women of color call attention to tokenism scarce valuable networks and the persistent burden to prove academic credentials They also explore gendered parenting within the contexts of colonialism racism sexism ethnocentrism ageism and heterosexism *Women of Color in Higher Education* Gaëtane Jean-Marie,Brenda Lloyd-Jones,2011-08-18 Focuses on African American Hispanic American Native American and Asian Pacific American women whose increased presence in senior level administrative and academic positions in higher education is transforming the political climate to be more inclusive of women of color **Driving Change Through Diversity and Globalization** James A. Anderson,2023-07-03 This book significantly advances discussion of the mission of higher education in today s multicultural environment and global economy It sets out the challenges and considerations that must be addressed by administrative leaders by trustees and others who shape the vision and direction of the institution but most particularly by academic deans and faculty The author makes the case that the inclusion of diversity and globalization in disciplinary work contributes to the research agendas of individual faculty and their departments aligns with scholarly values and promotes such student learning goals as tolerance of ambiguity and paradox critical thinking and creativity He offers a strategic vision of success backed by theory and examples of effective application for creating transformative change and provides a roadmap to implementing inclusive pedagogical practices and curricula With implementation dependent on leadership and participation at every level of an institution everyone with a stake in its future should read this book Inclusive Leadership Joanne Barnes,Michael J.
