The Future of the International Labour Organization in the Global Economy Francis Maupain, 2013-10-23 The International Labour Organization was created in 1919 as part of the Treaty of Versailles that ended the First World War to reflect the belief that universal and lasting peace can be accomplished only if it is based on social justice As the oldest organisation in the UN system approaching its 100th anniversary in 2019 the ILO faces unprecedented strains and challenges Since before the financial crisis the global economy has tested the limits of a regulatory regime which was conceived in 1919 The organisation s founders only entrusted it with balancing social progress with the constraints of an interconnected open economy but gambled almost entirely on tools of persuasion to ensure that this would happen Whether that gamble is still capable of paying off is the subject of this book by a former ILO insider with an unrivalled knowledge of its work The book forms part of a broader inquiry into the relevance of founding institutional principles to today s context and strives to show that the bet made on persuasion may yet pay off In part the text argues that there may be little alternative anyway showing that the pathways to more binding solutions are fraught with difficulty It also shows the ILO s considerable future potential for promoting effective universal regulations by extending its tools of persuasion in as yet insufficiently explored directions Starting with an examination of how the organisation s institutional context differs from 93 years ago the author goes on to evaluate the prospects of numerous proposals put forward today including the trade labour linkage but going beyond this As a case study in how strategic choices can be made under legal social and institutional constraints the book should be valuable not only to those with an interest in the ILO but to anyone who studies international organisation labour law law and society or political economy

Publisher description **What is a Fair International Society?** Emmanuelle Tourme Jouannet, 2014-07-18 Today's world is post colonial and post Cold War These twin characteristics explain why international society is also riddled with the two major forms of injustice which Nancy Fraser identified as afflicting national societies First the economic and social disparities between states caused outcry in the 1950s when the first steps were taken towards decolonisation These inequalities to which a number of emerging states now contribute are still glaring and still pose the problem of the gap between formal equality and true equality Second international society is increasingly confronted with culture and identity related claims stretching the dividing line between equality and difference The less favoured states those that feel stigmatised but also native peoples ethnic groups minorities and women now aspire to both legal recognition of their equal dignity and the protection of their identities and cultures Some even seek reparation for injustices arising from the past violation of their identities and the confiscation of their property or land In answer to these two forms of claim the subjects of international society have come up with two types of remedy encapsulated in legal rules the law of development and the law of recognition These two sets of rights are neither wholly autonomous and individualised branches of law nor formalised sets of rules They are imperfect and have their dark side Yet they can be seen as the first milestones towards what might become a fairer international society one that is both equitable as an answer to socio economic injustice and decent as an answer to cultural injustice This book explores this evolution in international society setting it in historical perspective and examining its presuppositions and implications
