Fairness In Children A Social Cognitive Approach To The Study Of Moral Development:

Fairness in Children Michael Siegal,1982 Cognitive Development Lisa Oakley,2004-09-02 Cognitive Development provides a detailed and accessible account of three main areas theories of cognitive development the development of measured intelligence and the development of moral understanding The theories of Piaget Vygotsky Eisenburg and Bruner are discussed The book is suitable for the AQA A A2 level examination and students studying cognitive development for the first time at undergraduate level The Routledge Modular Psychology series is a completely new approach to introductory level psychology tailor made for the new modular style of teaching Each book covers a topic in more detail than any large text book can allowing teacher and student to select material exactly to suit any particular course or project Especially written for those students new to higher level study whether at school College or university the books include the following designed features to help with technique practise essays with specialist commentary to show how to achieve a higher grade chapter summaries and summaries of key research glossary and further reading progress and review exercises Series editors Cara Flanagan is a Reviser for AS and A2 level Psychology and an experienced teacher and examiner Philip Banyard is Associate Senior Lecturer in Psychology at Nottingham Trent University and a Chief Examiner for AS and A2 level Psychology **Psychology Library Editions: Child Development** Various,2021-12-02 Psychology Library Editions Child Development 20 Volume set brings together a diverse number of titles across many areas of developmental psychology from children s play to language development The series of previously out of print titles originally published between 1930 and 1993 with the majority from the 70s and 80s includes contributions from many respected authors in the field and charts the progression of the field over this time **Research Issues in Child Development** Chris Pratt,Alison F. Garton,William E. Tunmer,Andrew R. Nesdale,2017-12-06 First published in 1986 this authoritative book contains a selection of original research based reports of studies conducted in Australia and New Zealand in the field of Child Development The topics have been arranged into four major sections cognitive issues in development language and reading development perpetual motor development and social aspects of development Both pure and applied research issues are presented and the chapters cover child development from infancy to adolescence The book s special strength lies in the diversity of topics tackled and the range of developmental research represented Theoretical viewpoints are raised and empirical questions answered in the studies reported The editors have systematically drawn together important contributions which reflected contemporary topics in child development at the time Although no one common theoretical or empirical theme unites either each section or the whole book which reflects the general scope and diversity of child development in the 1980s the contributors in general see the child as developing through active interaction with his or her environment This interactionist position is clearly preferred by most researchers who realised that simplistic genetic or environmental models are inadequate to explain the complex development of the child The editors were all active researchers in the area of child development at the time and

each co authored a chapter in the book All published regularly in national and international journals and books and were aware of current developments in their main areas of expertise All those interested in issues in child development will find this book important reading as it provides the reader with an excellent and diverse selection of studies bearing on a wide range of empirical research

Working with Children and Families Robert Adams,2011-10-25 Across 30 chapters a team of experienced teachers and practitioners introduce the fundamental professional issues concerning children young people and their families in the 21st century Working with Children and Families explores the diverse contexts in which children develop and the policies and practices that directly affect them essential knowledge for effective practice Offering a multidisciplinary approach this inclusive text gives a broad range of perspectives to support the study of children and childhood Take a look inside to discover more about Key policies and agendas introduces the policies agendas and government guidance that serve as the foundation of children s services Contemporary issues tackles complex topics such as anti discriminatory and ethical practice child protection and safeguarding Reflective practice offers reflective activities throughout to help you engage understand and apply knowledge in practice Diversity helps you understand the variety of backgrounds and experiences children may have from sociological psychological educational and cultural perspectives Integrative working focuses holistically on the child rather than on specific professional approaches offering insight into important themes in all areas of work with children This text offers a broad basis from which to launch into any area of work or study involving children including early years social work education social policy nursing sociology and childhood studies It is great introductory reading for foundation and undergraduate degree level students

Character Christian B. Miller,R. Michael Furr,Angela Knobel,William Fleeson,2015-10-12 This collection contains some of the best new work being done on the subject of character in philosophy theology and psychology From a virtual reality simulation of the Milgram shock experiments to an understanding of the virtue of modesty in Muslim societies these 31 chapters significantly advance our understanding of character

The Israeli State and Society Baruch Kimmerling,1989-01-01 This book provides a unique mosaic of the most recent processes and phenomena which explains Israel factually as well as theoretically It offers a new conceptual framework for analysing the relationships between state and society contrasting social boundaries with social frontiers It also discusses the problems that arise when Zionist ideology confronts reality in contemporary Israel

Christian Conversion Walter E. Conn,2006-07-01 Walter Conn has provided us with something we have needed for a long time a scholarly study of Christian conversion that draws synthetically from present day psychology philosophy and theology and uses these insights to analyze actual Christian religious experience And in doing that Conn has produced what is probably the best treatment to date of foundational moral theology To follow Conn through the pages of this volume is to become acquainted with most of today s important reflection on human moral and personal development But one emerges with much

more than relevant information about what is being said Conn's own view of conversion goes beyond the thinkers from whom he draws and provides a basic challenge to and enrichment of our understanding of faith and morality Bernard Cooke Holy Cross College Walter E Conn is Professor of Theology and Religious Studies at Villanova University He is also the editor of Horizons journal of the College Theology Society *The Human Experience* Cedric Cullingford, 2019-08-08 First published in 1999 the focus of this ground breaking study is on representing the mental world of the child with unprecedented clarity Cedric Cullingford aims to show that this world in its normal experience by children is significantly unlike what we typically assume it to be and significantly unlike anything exposed by the most prominent research programs Querying common assumptions about children's thinking Cullingford begins with an outline of children's understanding which emphasizes its range and complexity along with an address of the mythology of children's intellectual incapacity and preparation for the approach to be taken in detailing children's construction of a sense of their world The following four chapters combine to construct a description of how children approach their world exploring theory of mind the self the family the school and then the wider social and physical worlds Cullingford achieves a vividness immediacy and intensity not seen elsewhere using the constant medium of the child's gaze and demonstrating that the youngest child is not simply responsive but is active and critical in interrogating the world

Sociological Studies of Child Development Patricia A. Adler, Peter Adler, Nancy Mandell, 1986 *Who to Release?* Nicola Padfield, 2013-03-07 This book is concerned to explore the changing role of the Parole Board across the range of its responsibilities including the prediction of risk and deciding on the release or continued detention of the growing number of recalled prisoners and of those subject to indeterminate sentences In doing so it aims to rectify the lack of attention that has been given by lawyers academics and practitioners to back door sentencing where the real length of a sentence is decided by those who take the decision to release compared to front door sentencing decisions taken by judges or magistrates in court Particular attention is given in this book to the important changes made to the role and working of the Parole Board as a result of the impact of the early release scheme of the Criminal Justice Act 2005 with the Parole Board now deciding in Panels concerned with determinate sentence prisoners lifers and recalled prisoners A wide range of significant issues and case law has arisen as a result of these changes which the contributors to this book leading authorities in the field aim to explore

Promises, Oaths, and Vows Herbert J. Schlesinger, 2011-07-21 Considering that getting along in civil society is based on the expectation that most people will do what they say they will do i.e. essentially live up to their explicit or implicit promises it is amazing that so little scientific attention has been given to the act of promising A great deal of research has been done on the moral development of children for example but not on the child's ability to make and keep a promise one of the highest moral achievements What makes it possible developmentally cognitively and emotionally to make a promise in the first place And on the other hand what compels one to keep a promise or vow or threat when there seems to be no personal advantage in doing so and even when harm can be predicted How do we know when a

promise is offered seriously to be taken at face value and how do we understand that another is only a polite gesture not to be taken seriously In *Promises Oaths and Vows On the Psychology of Promising* Herbert Schlesinger addresses these questions drawing on the literature of moral development in children the psychotherapy of a patient who regularly broke promises that were unnecessary in the first place those who were regarded as promising youngsters who did not fulfill their promise and those who feared making a promise a commitment or a threat out of fear that once made the utterance would take on a life of its own and could never be taken back Furthermore he illustrates his conclusions by examining the widespread use of promising in classical literature such as Greek drama and the plays of Shakespeare as well as the motivating and reifying power of the promise in Western religious traditions With a style honed over the penning of two previous books Schlesinger once again produces a work grounded in a firm analytic sensibility but which also retains the wit and candor of the seasoned analyst His seminal investigation of this all but neglected topic in the clinical literature is as timely as it is scholarly and with the title firmly in mind *Promises Oaths and Vows* is assured to be a worthy addition to any clinician's library and a provoking investigation into Nietzsche's notion of man as the animal who makes promises **Group Norms and Moral Development: Reasoning & Cognition Across The Lifespan** Clare Conry-Murray, Luke McGuire, Aline Hitti, Hanna Beißert, 2022-11-16 **Handbook of Child Psychology and Developmental Science, Socioemotional Processes**, 2015-04-06 The essential reference for human development theory updated and reconceptualized The Handbook of Child Psychology and Developmental Science a four volume reference is the field defining work to which all others are compared First published in 1946 and now in its Seventh Edition the Handbook has long been considered the definitive guide to the field of developmental science Volume 3 Social Emotional and Personality Development presents up to date knowledge and theoretical understanding of the several facets of social emotional and personality processes The volume emphasizes that any specific processes function or behavior discussed in the volume co occurs alongside and is inextricably affected by the dozens of other processes functions or behaviors that are the focus of other researchers work As a result the volume underscores the importance of a focus on the whole developing child and his or her sociocultural and historical environment Understand the multiple processes that are interrelated in personality development Discover the individual cultural social and economic processes that contribute to the social emotional and personality development of individuals Learn about the several individual and contextual contributions to the development of such facets of the individual as morality spirituality or aggressive violent behavior Study the processes that contribute to the development of gender sexuality motivation and social engagement The scholarship within this volume and as well across the four volumes of this edition illustrate that developmental science is in the midst of a very exciting period There is a paradigm shift that involves increasingly greater understanding of how to describe explain and optimize the course of human life for diverse individuals living within diverse contexts This Handbook is the definitive reference for educators policy makers researchers students and practitioners in

human development psychology sociology anthropology and neuroscience Intergroup Helping Esther van Leeuwen, Hanna Zagefka, 2017-05-17 The aim of this volume is to provide an overview of research from different psychological domains with regards to intergroup helping arguing for intergroup helping as a research area in and of itself Historically research on intergroup relations has largely overlooked helping between groups which combined with the fact that most of the research on altruism and helping has focused on individuals meant that intergroup helping was primarily looked at as deriving from negative intergroup interactions such as ingroup bias or discrimination However over the last decade a small but growing group of researchers started to investigate intergroup helping as a positive social act occurring between and amongst groups With contributions from these expert researchers this volume makes the case that intergroup helping should be studied as a phenomenon in and of itself not as a mere expression of negative intergroup behaviour To advance this argument the first section covers traditional research approaches in which the willingness to help other groups is construed as a form of discrimination Then the second section looks at the reasons why people may be motivated to help other groups Finally the last section explores intergroup helping in real world settings looking at natural disaster responses and the role of morality among other topics demonstrating that intergroup relations can be truly positive Thus *Intergroup Helping The Positive Side of Intergroup Behavior* informs researchers in positive and group relations psychology about the current state of affairs of research on intergroup cooperation and helping and sets out an agenda for further exploration Tapping into a current trend towards positive psychology it moves away from the traditional view within intergroup relations research of the group as a source of trouble and instead focuses on truly positive intergroup relations with the ultimate goal of promoting real positive behaviour that breaches the intergroup divide **Handbook of Moral Development** Melanie Killen, Judith G. Smetana, 2013-10-08 The *Handbook of Moral Development* is the definitive source of theory and research on the development of morality Since the publication of the first edition ground breaking approaches to studying the development of morality have re invigorated debates about what it means to conceptualize and measure morality in early childhood how children understand fairness and equality what the evolutionary basis is for morality and the role of culture The contributors of this new edition grapple with these questions and provide answers for how morality originates changes evolves and develops during childhood adolescence and into adulthood Thoroughly updated and expanded the second edition features new chapters that focus on infancy neuroscience theory of mind moral personality and identity cooperation and culture gender sexuality prejudice and discrimination Reflecting the interdisciplinary nature of the study of moral development this edition contains contributions from over 50 scholars in developmental science cognitive psychology social neuroscience comparative psychology and evolution and education *Blackwell Handbook of Childhood Cognitive Development* Usha Goswami, 2008-04-15 This definitive volume provides state of the art summaries of current research by leading specialists in different areas of cognitive development Forms part of a series of four Blackwell Handbooks in

Developmental Psychology spanning infancy to adulthood Covers all the major topics in research and theory about childhood cognitive development Synthesizes the latest research findings in an accessible manner Includes chapters on abnormal cognitive development and theoretical perspectives as well as basic research topics Now available in full text online via xreferplus the award winning reference library on the web from xrefer For more information visit www.xreferplus.com

Handbook of Moral Behavior and Development William M. Kurtines, Jacob Gewirtz, Jacob L. Lamb, 2014-02-04 The publication of this unique three volume set represents the culmination of years of work by a large number of scholars researchers and professionals in the field of moral development The literature on moral behavior and development has grown to the point where it is no longer possible to capture the state of the art in a single volume This comprehensive multi volume Handbook marks an important transition because it provides evidence that the field has emerged as an area of scholarly activity in its own right Spanning many professional domains there is a striking variety of issues and topics surveyed anthropology biology economics education philosophy psychology psychiatry sociology social work and more By bringing together work on diverse topics the editors have fostered a mutually beneficial exchange not only between alternative approaches and perspectives but also between applied and pure research interests The Theory volume presents current and ongoing theoretical advances focusing on new developments or substantive refinements and revisions to existing theoretical frameworks The Research volume summarizes and interprets the findings of specific theory driven research programs reviews research in areas that have generated substantial empirical findings describes recent developments in research methodology techniques and reports research on new and emerging issues The Application volume describes a diverse array of intervention projects educational clinical organizational and the like Each chapter includes a summary report of results and findings conceptual developments and emerging issues or topics Since the contributors to this publication are active theorists researchers and practitioners it may serve to define directions that will shape the emerging literature in the field
