Beiser,2014-07-14 The Sovereignty of Reason is a survey of the rule of faith controversy in seventeenth century England It examines the arguments by which reason eventually became the sovereign standard of truth in religion and politics and how it triumphed over its rivals Scripture inspiration and apostolic tradition Frederick Beiser argues that the main threat to the authority of reason in seventeenth century England came not only from dissident groups but chiefly from the Protestant theology of the Church of England The triumph of reason was the result of a new theology rather than the development of natural philosophy which upheld the orthodox Protestant dualism between the heavenly and earthly Rationalism arose from a break with the traditional Protestant answers to problems of salvation ecclesiastical polity and the true faith Although the early English rationalists were not able to defend all their claims on behalf of reason they developed a moral and pragmatic defense of reason that is still of interest today Beiser s book is a detailed examination of some neglected figures of early modern philosophy who were crucial in the development of modern rationalism There are chapters devoted to Richard Hooker the Great Tew Circle the Cambridge Platonists the early ethical rationalists and the free thinkers John Toland and Anthony Collins Originally published in 1996 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **New Approaches to Religion and the Enlightenment** Brett C. McInelly,Paul E. Kerry,2018-11-09 The Enlightenment an eighteenth century philosophical and cultural movement that swept through Western Europe has often been characterized as a mostly secular phenomenon that ultimately undermined religious authority and belief and eventually gave way to the secularization of Western society and to modernity To whatever extent the Enlightenment can be credited with giving birth to modern Western culture historians in more recent years have aptly demonstrated that the Enlightenment hardly singled the death knell of religion Not only did religion continue to occupy a central place in political social and private life throughout the

eighteenth century but it shaped the Enlightenment project itself in significant and meaningful ways. The thinkers and philosophers normally associated with the Enlightenment to be sure challenged state sponsored church authority and what they perceived as superstitious forms of belief and practice but they did not mount a campaign to undermine religion generally. A more productive approach to understanding religion in the age of Enlightenment then is to examine the ways the Enlightenment informed religious belief and practice during the period as well as the ways religion influenced the Enlightenment and to do so from a range of disciplinary perspectives which is the goal of this collection. The chapters document the intersections of religious and Enlightenment ideas in such areas as theology, the natural sciences, politics, the law, art, philosophy and literature.

Van Til and the Limits of Reason R. J. Rushdoony, 2013-09-23. The Enlightenment was an intellectual movement of the late seventeenth and eighteenth centuries that was a self-conscious move away from the Reformation's emphasis on faith and revelation. It was the mind of man that became the new standard. "My own mind is my own church" wrote Thomas Paine in his *Age of Reason* Part First 1794 which was an attack on all religion that claimed to be authoritative and Christianity in particular. It is not without case that Paine's title is sometimes used as a synonym for the Enlightenment. Its rationalism saw faith as a blind confidence, a belief in nothing while Hebrews 11:3 tells us it is through faith we understand. The Christian must see faith in God's revelation as opening up understanding as thinking God's thoughts after Him and rationalism as a restriction of thought to the narrow confines of human understanding. Reason is a gift of God but we must not make more of it than it is. To see our reason as supreme is to see ourselves as supreme and thereby repeat the sin of seeking to be as gods. Gen 3:5. The first three essays of this volume were published in a small booklet in 1960 as a tribute to the thought of Dr. Cornelius Van Til titled *Van Til*. The last four essays were written some time later and are published here for the first time.

Faith in the Enlightenment? Lieven Boeve, 2006. One of the urgent tasks of modern philosophy is to find a path between the rationalism of the Enlightenment and the relativism of postmodernism. Rationalism alone cannot suffice to solve today's problems but neither can we dispense with reasonable critique. The task is to find ways to broaden the scope of rational thought without losing its critical power. The first part of this volume explores the ideas of Enlightenment philosophers and shows nuances often absent from the common view of the Enlightenment. The second part deals with some of the modern heirs of Enlightenment such as Durkheim, Habermas and Derrida. In the third part this volume looks at alternatives to Enlightenment thought in West European, Russian and Buddhist philosophy. Part four provides over against the Enlightenment a new starting point for the philosophy of religion in thinking about human beings, God and the description of phenomena.
