Federalism-in-the-Making Edward McWhinney, Jerald Zaslove, Werner Wolf, 2023-09-20 The long continuing constitutional debate within Canada has brought a search today for new constitutional governmental models of paradigms capable of taking us all safely into the twenty first century For students of Contemporary Constitutionalism no country's experience has been more seriously studied than that of the West German federal state formed out of the three Western zones of Germany in 1949 and endowed with what was then described as a temporary governmental charter pending final reunification of Germany This volume is the result of a special bilateral Canadian German conference organised by the Simon Fraser University and the Goethe Institut of Vancouver in 1991 on the theme The Challenge of Contemporary Constitutionalism Canadian and German Federalism in the Making The essays it contains from many distinguished judges and professors from both countries form a unique contribution both to scientific knowledge in Constitutionalism and to current ventures in Constitution making and drafting in a number of countries Western and Eastern Europe North America around the world Drifting Together

Diplomatic Departures

Kim R. Nossal, Nelson Michaud, 2007-10-01 During the nine years that the Conservatives under Brian Mulroney held power in Ottawa Canadian foreign policy underwent a series of important departures from established policy Some of these changes mirrored the major transformations in global politics that occurred during this period as the Berlin Wall was breached the Cold War came to an end and a globalized economy emerged But some of the changes were the results of initiatives taken by the Conservative government The first major scholarly examination of the foreign policy of this period this collection explores and analyzes the many departures from traditional Canadian statecraft that took place during the Mulroney Conservative era free trade with the U S a continentalized energy policy initiatives over the environment and the Arctic the withdrawal of Canadian forces from Europe and the transformation of peacekeeping into peacemaking

Canadian Studies in the New Millennium

Patrick James, Mark J. Kasoff, 2008-01-01 This popular textbook offers a thorough and accessible approach to Canadian Studies through comparative analyses of Canada and the United States their histories geographies political systems economies and cultures Students and professors alike acknowledge it as an ideal tool for understanding the close relationship between the two countries their shared experiences and their differing views on a range of issues Fully revised and updated the second edition of Canadian Studies in the New Millennium includes new chapters on Demography and Immigration Policy the Environment and Civil Society and Social Policy all written by leading scholars and educators in the field At a time in which there is a growing mutual dependence between the US and Canada for security trade and investment Canadian Studies in the New Millennium will continue to be a valuable resource for students educators and practitioners on both sides of the

border **Canada Among Nations, 1992-93** Fen Osler Hampson, Christopher J. Maule, 1992-05-15 **The Migration of Constitutional Ideas** Sujit Choudhry, 2007-01-18 The migration of constitutional ideas across jurisdictions is one of the central features of contemporary constitutional practice The increasing use of comparative jurisprudence in interpreting constitutions is one example of this In this 2007 book leading figures in the study of comparative constitutionalism and comparative constitutional politics from North America Europe and Australia discuss the dynamic processes whereby constitutional systems influence each other They explore basic methodological questions which have thus far received little attention and examine the complex relationship between national and supranational constitutionalism an issue of considerable contemporary interest in Europe The migration of constitutional ideas is discussed from a variety of methodological perspectives comparative law comparative politics and cultural studies of law and contributors draw on case studies from a wide variety of jurisdictions Australia Hungary India South Africa the United Kingdom the United States and Canada **The Art of the State II** Thomas J. Discovering the Americas James Rochlin, 2011-11-01 Over much of this century Canada has played only a minor role in hemispheric affairs In recent years dramatic changes have occurred which have catapulted Canada to the role of full partner in the Americas These include Canada's decision to enter the Organization of American States as a full member its involvement in the NAFTA negotiations its important peacekeeping role in Central America and its support for a process of hemispheric integration Discovering the Americas describes and analyzes the evolution of Canadian foreign policy towards Latin America The book is divided into three parts each reflecting a distinct phase of Canada's relations with the Americas Part 1 traces Canada's minimal relations from the beginning of the century until the Trudeau years Part 2 examines the Trudeau era when partly propelled by nationalism Canada sought a more independent role in its relations with Latin America Part 3 discusses the post 1984 era which has been marked by the prospect of an emerging hegemony in the Americas The central thesis of this timely book is that changing hegemonic structures represent the most significant factor shaping Canadian policy in the region Rochlin argues that the emergence in the late 1980s and 1990s of global trading blocs and the trend towards ideological convergence have opened up new opportunities for Canada in the hemisphere Canada's role in inter American affairs is becoming increasingly entrenched and is unlikely to recede The Ashgate Research Companion to Regionalisms Dr J Andrew Grant, Dr Scarlett Cornelissen, Professor Timothy M Shaw, 2013-04-28 This collection of original essays provides a broad overview of regionalism together with detailed analyses on the construction activities and implications of both established and emerging examples of formal political and economic organizations as well as informal

regional entities and networks Aimed at scholars and students interested in the continuing growth of regionalism The Ashgate Research Companion to Regionalisms is a key resource to understanding the major debates in the field Market Rules Douglas Brown,2003 Federalism is about dividing and sharing government often in complex ways that involve some tasks being done jointly Are federal systems capable of effective joint policy making Is this possible in the fast moving context of globalization In Market Rules Douglas Brown examines these questions through a comparative study of Australia and Canada looking at recent major reforms to the economic union in the two federations and comparing them with the evolving European Union EU Brown argues that internal barriers to trade and competition in these countries were significant obstacles to competition in the global economy and shows that the old market rules were rooted in longstanding political and regional compromises He describes the process of detailed and difficult intergovernmental collaboration required for the EU and now Canada and Australia to produce new market rules The resulting reforms created new regimes that provide deeper and broader national economic integration in Canada and Australia than in the EU The new rules entrench neo liberal values retaining some room for diversity and flexibility for equity goals Built on a careful analysis of the differences and similarities in political economy constitutional design federal culture and history of intergovernmental relations in Canada and Australia Market Rules provides fresh evidence that federal states can be strong and autonomous in the global society while underscoring the conditions for effective collaboration that make this sustainable Rich in detail broad in scope Market Rules makes a significant contribution to knowledge about federalism and economic policy making in the era of globalization

Asleep at the Switch Bruce Smardon,2014-11-01 Since 1960 Canadian industry has lagged behind other advanced capitalist economies in its level of commitment to research and development Asleep at the Switch explains the reasons for this underperformance despite a series of federal measures to spur technological innovation in Canada Bruce Smardon argues that the underlying issue in Canada s longstanding failure to innovate is structural and can be traced to the rapid diffusion of American Fordist practices into the manufacturing sector of the early twentieth century Under the influence of Fordism Canadian industry came to depend heavily on outside sources of new technology particularly from the United States Though this initially brought in substantial foreign capital and led to rapid economic development the resulting branch plant industrial structure led to the prioritization of business interests over transformative and innovative industrial strategies This situation was exacerbated in the early 1960s by the Glassco framework which assumed that the best way for the federal state to foster domestic technological capacity was to fund private sector research and collaborative strategies with private capital Remarkably and with few results federal programs and measures continued to emphasize a market oriented approach Asleep at the Switch details the ongoing attempts by the federal government to increase the level of innovation in Canadian industry but shows why these efforts have failed to alter the pattern of technological dependency *Capacity for Choice* George Hoberg,2002-01-01 Examines North American integration and its potential future impact on Canadian life in eight areas

trade the labour market the brain drain macroeconomics federalism social welfare the environment and culture North America in Question Jeffrey McKelvey Ayres, Laura Macdonald, 2012-01-01 Can North America survive as a region in light of the political turbulence provoked by the global economic crisis Or have regional integration and collaboration reached a plateau beyond which disintegration is likely In North America in Question leading analysts from Canada the United States and Mexico provide theoretically innovative and rich empirical reflections on current challenges sweeping the continent and on the faltering political support for North American regionalism This collection begins by reviewing the recent trajectories and events that have undermined North America's trilateral relationship then addresses concerns that go beyond NAFTA and economic issues including labour immigration energy the environment quality of citizenship borders women's and civil society struggles and democratic deficits Although demonstrating that many informal dimensions of North American integration continue to flourish the contributors assess whether the future will hold greater economic instability security crises and emerging bilateral relationships **Uncle Sam and Us** Stephen Clarkson, 2002-09-28 Between them Brian Mulroney and Jean Chrétien radically altered the structure and functions of the federal government first by signing and implementing major trade liberalization projects and then by cutting back the size of their governments' budgets and the scope of their policies Uncle Sam and Us analyzes the Mulroney Chrétien era's impact on Canadian governance through two related factors globalization from without and neoconservatism from within Stephen Clarkson begins his study by conceptualizing the present Canadian state as a five tiered nested system stretching from the municipal and provincial levels through the federal government and on to the new continental and global spheres of governance in effect he argues the North American Free Trade Agreement and the World Trade Organization have added a supraconstitution to Canada's existing institutions His analysis concerns the changes that have occurred not just in the federal government but in provincial and municipal governance as well The impact of globalization and neoconservatism is examined extensively in the second part of Clarkson's study which examines how the functions of the Canadian state have altered Clarkson addresses the changes in a number of policy areas such as macro and monetary policy regulatory industrial and trade policy as well as social labour environmental cultural and foreign policy In linking external forces and internal factors in his analysis Clarkson brings together separate aspects of the Canadian state into a comprehensive understanding of the current Canadian political climate He combines a global knowledge of the international political economy with a micro concern for detailed analyses of policy issues and concludes that the responsibility for Canada's predicament lies less with external forces than with Canadians and the governments they elected He ends with a hopeful look into the future pointing towards a realization of the shortcomings of neoconservative globalization and the expectation of a new governing paradigm Co published with Woodrow Wilson Center Press **Hegemonic Transitions, the State and Crisis in Neoliberal Capitalism** Yildiz Atasoy, 2009-01-08 More than 15 years have passed since the end of the Cold War but uncertainty persists in the political

economic shaping of the world economy and state system Although many countries have institutionalized neoliberal policies since the mid 1970s these policies have not taken hold to the same degree nor have their effects been uniform across all countries Nevertheless there has been widespread deepening of inequalities and therefore scepticism towards the neoliberal project Uncertainty prevails not only in the relations between states but also in the relations between forces of capital citizens and political power within states Moreover there is conceptual confusion in our understanding of the events and processes of neoliberal global transformation This collection of essays provides a comprehensive theoretical and empirical examination of neoliberal restructuring as a complex political process In an effort to penetrate and clarify this complexity the book explores the connections between the economy state society and citizens while also offering current examples of resistance to neoliberalism The book provides a forum for rethinking politics that represents a turn to societal forces as essential not only to the uncovering of this complexity but also to the formulation of democratic possibilities beyond global hegemonic projects The book does not seek to produce a new model for social change nor does it dwell on the spatial aspects of modernity s new form or the emergence of a new state hegemony China or new forms of rule empire in managing the world capitalist economy Instead the book argues that an understanding of hegemonic transformations requires the problematization of global power as embedded in historically specific social relations

Globalization and Institutional Adjustment Axel Hülsemeyer, 2017-11-28 Combining the disciplines of international political economy public sector economics and comparative politics this stimulating book debates whether federalism obstructs institutional adjustment under conditions of a globalized economy or whether this depends upon the extent to which a given political system is centralized Axel H lsemeyer analyzes the ratification of the Single European Act and the Maastricht Treaty and contrasts these with the implementation of the bilateral free trade agreement between the United States and Canada as well as the NAFTA Preferential trade agreements themselves are conceptualized as the state response to economic globalization

Constitutionalizing Economic Globalization David Schneiderman, 2008-03-27 Are foreign investors the privileged citizens of a new constitutional order that guarantees rates of return on investment interests Schneiderman explores the linkages between a new investment rules regime and state constitutions between a constitution like regime for the protection of foreign investment and the constitutional projects of national states The investment rules regime as in classical accounts of constitutionalism considers democratically authorized state action as inherently suspect Despite the myriad purposes served by constitutionalism the investment rules regime aims solely to enforce limits both inside and outside of national constitutional systems beyond which citizen driven politics will be disabled Drawing on contemporary and historical case studies the author argues that any transnational regime should encourage innovation experimentation and the capacity to imagine alternative futures for managing the relationship between politics and markets These objectives have been best accomplished via democratic institutions operating at national sub national and local levels
