Faith and Psychology Leslie J. Francis, 2005-01 Once seen as a major enemy of faith psychology is now recognised as a key ally and friend by many Christians In this clear and challenging book Leslie J Francis demonstrates how the theory of psychological type can help us to understand better the shape of our personal spirituality our preferences in public worship and the nature of our religious experience Leslie J Francis offers a careful description of each of the eight components of psychological type extraversion and introversion sensing and intuition feeling and thinking judging and perceiving together with a brief test to help you locate your own psychological preferences He shows how such analysis can lead to greater self awareness greater insight into others and into the nature of the God who created men and women in God s own image BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved      Research in the Social Scientific Study of Religion, Volume 21 Ralph L. Piedmont, Andrew Village, 2010-07-12 This volume includes a section on spirituality and hope that brings together theoreticians and practitioners who present original research on this important topic Alongside this section are papers presenting studies on civic participation suffering with God and spirituality      **Religious Identity and National Heritage** Francis-Vincent Anthony, 2012-05-18 In some parts of our world religion is on the wane losing its thrust of doctrinal authority and communal bonds In other regions it is gaining public significance as a powerful social cultural and political force Secularization theories are less successful in accounting for these differences in religion s role Other theories describe religion in terms of social capital to be invested whenever it offers certain personal social or political benefits and market opportunities allow smart choices Still other theories simply hold that religion corresponds to an inborn need or stable disposition that guarantees a culture s identity and reflects a natural equilibrium of social cohesion There are also critical theories that point to the intrinsic relationship of religion with power and identify it as a major cause of tension and conflict In this book distinguished scholars reflect on these questions and present empirical research about religious identity and national heritage      *Religion, Education and Society* Elisabeth Arweck, Robert Jackson, 2016-03-16 This volume presents

findings from recent research focusing on young people and the way they relate to religion in their education and upbringing. The essays are diverse and multidisciplinary in terms of the religions they discuss including Christianity, Islam and Sikhism; the settings where young people reflect on religion: the classroom, youth club, peer group, families, respective religious communities and wider society; the different perspectives which relate to religious education and socialisation; the teaching of RE; the role of teachers in pupils' lives; the way teachers' personal lives shape their approach to teaching; school ethos and social context; and the place and rationale of RE. The contexts within which the authors work: different national settings and various academic disciplines; and the methodology used: qualitative, quantitative and mixed method approaches. The authors make important contributions to the debate about the role of religious education in the curriculum. They demonstrate the crucially important formative influence of religious education in young people's lives which reaches well into their adulthood, shaping religious and other identities and attitudes towards the other whatever that other may be. This book was originally published as a special issue of the *Journal of Beliefs & Values*. [Young People's Attitudes to Religious Diversity](#) Elisabeth Arweck, 2016-07-01. Investigating the hitherto unexplored topic of how young people understand and relate to religious diversity in the social context in which they are growing up, this book makes a significant contribution to the existing body of literature on religious diversity and multiculturalism. It closes a gap in knowledge about young people's attitudes to religious diversity and reports data gathered across the whole of the UK as well as comparative chapters on Canada, USA and continental Europe. Reporting findings from both qualitative and quantitative research which reveal, for example, the importance of the particular social and geographical context within which young people are embedded, the volume addresses young people's attitudes towards the range of world religions as well as non-religious stances and offers an interdisciplinary approach through the different analytical perspectives of the contributors.

**The Public Significance of Religion** Leslie J. Francis, Hans-Georg Ziebertz, 2011-06-22. This book reflects on the idea that religion represents a force in the public realms of society. The empirical evidence reveals a regained relevance for and commitment to religion re-emerging in secularized countries but also that it does so in a new form, unexpected, foreign and maybe even dangerous. If religion regains public significance in social debates, what are its characteristics in terms of topics and interests, actors and parties? How is this experienced and evaluated by different groups in society? What are the motives of religious groups and churches to re-enter the public domain and are they effective? What is the importance of religious groups claiming participation, consulting, steering and dominating in public debates? How do different religious and non-religious groups evaluate the impact of religion on the public environment and under which conditions can it be regarded to be functional or dysfunctional? Scholars who address these questions do so from a theological or a religious studies perspective. They reflect on the phrase 'public significance of a religion' in its political, cultural and typical religious dimension. The book points out what tendencies can be observed when different religions profile themselves competitively in public debate and to what extent ethnic and national

identities intervene in this interreligious interaction
