Christian Green, 2011-11-25 The relationship between religion and human rights is both complex and inextricable While most of the world's religions have supported violence repression and prejudice each has also played a crucial role in the modern struggle for universal human rights Most importantly religions provide the essential sources and scales of dignity and responsibility shame and respect restraint and regret restitution and reconciliation that a human rights regime needs to survive and flourish in any culture With contributions by a score of leading experts *Religion and Human Rights* provides authoritative and accessible assessments of the contributions of Judaism Christianity Islam Hinduism Confucianism Buddhism and Indigenous religions to the development of the ideas and institutions of human rights It also probes the major human rights issues that confront religious individuals and communities around the world today and the main challenges that the world's religions will pose to the human rights regime in the future

*Faith in Human Rights* Robert Traer, 1991-01-01 In this first comprehensive study of the problem of a universal definition of human rights Robert Traer argues that contemporary theological discourse contains an affirmation of faith that unites members of world religious traditions with secular humanists in a common struggle to establish human rights as the basis for human dignity Scholars of religion law and comparative religious ethics as well as human rights advocates will find it an invaluable guide

## **Contemporary Issues in Human Rights Education** gratuit, 2011      **Religion and Human Rights**

Wilhelm Gräb, Lars Charbonnier, 2015-05-19 Current processes of globalization are challenging Human Rights and the attempts to institutionalize them in many ways The question of the connection between religion and human rights is a crucial point here The genealogy of the Human Rights is still a point of controversies in the academic discussion Nevertheless there is consensus that the Christian tradition especially the doctrine that each human being is an image of God played an important role within the emergence of the codification of the Human Rights in the period of enlightenment It is also obvious that the struggle against the politics of apartheid in South Africa was strongly supported by initiatives of churchy and other religious groups referring to the Human Rights Christian churches and other religious groups do still play an important role in the post apartheid South Africa They have a public voice concerning all the challenges with which the multiethnic and economically still deeply divided South African society is faced with The reflections on these questions in the collected lectures and essays of this volume derive from an academic discourse between German and South African scholars that took place within the German South African Year of Science 2012 13
