

A man wearing a black t-shirt and a black baseball cap is holding a woman from behind. The woman is wearing a floral dress and is looking up at the man with a smile. They are both smiling and appear to be in a happy relationship. The background is a blurred outdoor setting.

If your man were the
faithful type you
wouldn't have to worry
about other women.
Realize that it's his job
to be faithful to you.

Sexual Life in Sweden Hans Zetterberg, 2021-10-14 Now available in English Sexual Life in Sweden is a classic piece of sex research by one of Sweden's most distinguished social scientists Sponsored by the Royal Commission on Sex Education more than thirty years ago it remains the only study of sexual behavior in a randomly selected adult population sample ever funded by a government Because an astonishing response rate was achieved 91 percent during the course of Zetterberg's research the claim that Sweden is one of the few countries where generalizations about national sexual behavior can be made may be stated with confidence Zetterberg's study matches the gender of interviewers to that of subjects From a theoretical perspective Zetterberg analyzes the change in Sweden from a restrictive to a contraceptive society The study makes it clear that with over 1 000 acts of intercourse for every live birth 90 percent of sexual activity between consenting adults in modern Sweden does not result simply for procreation Nevertheless the research yields a picture of a highly responsible society Zetterberg explores the emergence of two powerful new norms when having sex you must use contraception and when in an existing sexual relationship you must not start another one He also examines the issue of abortion as part of a concept of social justice The author compares the behavior of those who experience an unwanted pregnancy with those who do not and explains that abortion is seen by Swedes as part of the provision of the welfare and social justice system Included is an examination of the sexual behavior of young people the age of their first sexual experience the circumstances surrounding it whether positive parental involvement in their children's lives has any influence on their sexual conduct and sex education programs in the schools This translation of Zetterberg's study has been prepared by British sociologist Graham Fennell who also authored a new introduction positioning Zetterberg's work in the history of sex research and comparing its findings with contemporary studies in Scandinavia Western Europe and North America In light of the ongoing controversies about sex education its conclusions remain relevant to policy discussions today

Theories, Sites, Toposes
 Olivia Caramello, 2018 According to Grothendieck the notion of topos is the bed or deep river where come to be married geometry and algebra topology and arithmetic mathematical logic and category theory the world of the continuous and that of discontinuous or discrete structures It is what he had conceived of most broad to perceive with finesse by the same language rich of geometric resonances an essence which is common to situations most distant from each other coming from one region or another of the vast universe of mathematical things The aim of this book is to present a theory and a number of techniques which allow to give substance to Grothendieck's vision by building on the notion of classifying topos educed by categorical logicians Mathematical theories formalized within first order logic give rise to geometric objects called sites the passage from sites to their associated toposes embodies the passage from the logical presentation of theories to their mathematical content i e from syntax to semantics The essential ambiguity given by the fact that any topos is associated in general with an infinite number of theories or different sites allows to study the relations between different theories and hence the theories themselves by using toposes as bridges between these different presentations The expression or calculation of invariants of toposes in terms of the theories associated with them or their sites of definition generates a great number of results and notions varying according to the different types of presentation giving rise to a veritable mathematical morphogenesis

Folktales of the Jews, Volume 1 Dov Noy, Dan Ben-Amos, Ellen Frankel, 2006-09-03 Tales from the Sephardic Dispersion begins the most important collection of Jewish folktales ever published It is the first volume in Folktales of the Jews the five volume series to be released over the next several years in the

tradition of Louis Ginzberg's classic *Legends of the Jews*. The 71 tales here and the others in this series have been selected from the Israel Folktale Archives Named in Honor of Dov Noy. The University of Haifa IFA, a treasure house of Jewish lore that has remained largely unavailable to the entire world until now. Since the creation of the State of Israel, the IFA has collected more than 20,000 tales from newly arrived immigrants, long lost stories shared by their families from around the world. The tales come from the major ethno-linguistic communities of the Jewish world and are representative of a wide variety of subjects and motifs, especially rich in Jewish content and context. Each of the tales is accompanied by in-depth commentary that explains the tale's cultural, historical, and literary background and its similarity to other tales in the IFA collection and extensive scholarly notes. There is also an introduction that describes the Sephardic culture and its folk narrative tradition, a world map of the areas covered, illustrations, biographies of the collectors and narrators, tale type and motif indexes, a subject index, and a comprehensive bibliography. Until the establishment of the IFA, we had had only limited access to the wide range of Jewish folk narratives. Even in Israel, the gathering place of the most wide-ranging cross-section of world Jewry, these folktales have remained largely unknown. Many of the communities no longer exist as cohesive societies in their representative lands. The Holocaust, migration, and changes in living styles have made the continuation of these tales impossible. This volume and the others to come will be monuments to a rich but vanishing oral tradition.

Hereditary Noetherian Prime Rings and Idealizers Lawrence S. Levy, James Christopher Robson, 2011. This surveys material previously available only in the research literature. It provides a reworked and simplified account with improved clarity, fresh insights, and many original results about finite length modules, injective modules, and projective modules. It culminates in the authors' surprisingly complete structure theorem for projective modules, which involves two independent additive invariants: genus and Steinitz class.

101 Middle Eastern Tales and Their Impact on Western Oral Tradition Ulrich Marzolph, 2020-08-18. A comprehensive exploration of the Middle Eastern roots of Western narrative tradition. Against the methodological backdrop of historical and comparative folk narrative research, *101 Middle Eastern Tales and Their Impact on Western Oral Tradition* surveys the history, dissemination, and characteristics of over one hundred narratives transmitted to Western tradition from or by the Middle Eastern Muslim literatures, i.e., authored written works in Arabic, Persian, and Ottoman Turkish. For a tale to be included, Ulrich Marzolph considered two criteria: that the tale originates from or at least was transmitted by a Middle Eastern source and that it was recorded from a Western narrator's oral performance in the course of the nineteenth or twentieth century. The rationale behind these restrictive definitions is predicated on Marzolph's main concern with the long-lasting effect that some of the Oriental narratives exercised in Western popular tradition: those tales that have withstood the test of time. Marzolph focuses on the originally Oriental tales that became part and parcel of modern Western oral tradition. Since antiquity, the Orient constitutes the quintessential Other vis-à-vis the European cultures. While delineation against this Other served to define and reassure the Self, the Orient also constituted a constant source of

fascination attraction and inspiration Through oral retellings numerous tales from Muslim tradition became an integral part of European oral and written tradition in the form of learned treatises medieval sermons late medieval fabliaux early modern chapbooks contemporary magazines and more In present times when national narcissisms often acquire the status of strongholds delineating the Us against the Other it is imperative to distinguish document visualize and discuss the extent to which the West is not only indebted to the Muslim world but also shares common features with Muslim narrative tradition

Conway,2025-05-01 Operator theory is a significant part of many important areas of modern mathematics functional analysis differential equations index theory representation theory mathematical physics and more This text covers the central themes of operator theory presented with the excellent clarity and style that readers have come to associate with Conway s writing Early chapters introduce and review material on C algebras normal operators compact operators and non normal operators Some of the major topics covered are the spectral theorem the functional calculus and the Fredholm index In addition some deep connections between operator theory and analytic functions are presented Later chapters cover more advanced topics such as representations of C algebras compact perturbations and von Neumann algebras Major results such as the Sz Nagy Dilation Theorem the Weyl von Neumann Berg Theorem and the classification of von Neumann algebras are covered as is a treatment of Fredholm theory The last chapter gives an introduction to reflexive subspaces which along with hyperreflexive spaces are one of the more successful episodes in the modern study of asymmetric algebras Professor Conway s authoritative treatment makes this a compelling and rigorous course text suitable for graduate students who have had a standard course in functional analysis

Group Representations ,1994-02-18 This third volume can be roughly divided into two parts The first part is devoted to the investigation of various properties of projective characters Special attention is drawn to spin representations and their character tables and to various correspondences for projective characters Among

other topics projective Schur index and projective representations of abelian groups are covered The last topic is investigated by introducing a symplectic geometry on finite abelian groups The second part is devoted to Clifford theory for graded algebras and its application to the corresponding theory for group algebras The volume ends with a detailed investigation of the Schur index for ordinary representations A prominent role is played in the discussion by Brauer groups together with cyclotomic algebras and cyclic algebras
