*The Soviet Passport* Albert Baiburin, 2021-11-03 In this remarkable book Albert Baiburin provides the first in depth study of the development and uses of the passport or state identity card in the former Soviet Union First introduced in 1932 the Soviet passport took on an exceptional range of functions extending not just to the regulation of movement and control of migrancy but also to the constitution of subjectivity and of social hierarchies based on place of residence family background and ethnic origin While the basic role of the Soviet passport was to certify a person s identity it assumed a far greater significance in Soviet life Without it a person literally disappeared from society It was impossible to find employment or carry out everyday activities like picking up a parcel from the post office a person could not marry or even officially die without a passport It was absolutely essential on virtually every occasion when an individual had contact with officialdom because it was always necessary to prove that the individual was the person whom they claimed to be And since the passport included an indication of the holder s ethnic identity individuals found themselves accorded a certain rank in a new hierarchy of nationalities where some ethnic categories were normal and others were stigmatized Passport systems were used by state officials for the deportation of entire population categories the so called former people those from the pre revolutionary elite and the relations of enemies of the people But at the same time passport ownership became the signifier of an acceptable social existence and the passport itself the information it contained the photographs and signatures became part of the life experience and self perception of those who possessed it This meticulously researched and highly original book will be of great interest to students and scholars of Russia and the Soviet Union and to anyone interested in the shaping

**Shakespeare and Fun** Donald Hedrick, 2025-02-27 In this bold original study Hedrick proposes an early modern entertainment value revolution to which Shakespeare contributed and in which he played a competitive role As London's nascent capitalist industry developed and the variety of entertainments proliferated theatre contributes to the birth of entertainment value and a commercial trajectory toward what Marxist critic Adorno theorizes as fun seen contemporaneously in Las Vegasization and the election of Donald Trump to U S Presidency In this innovative approach to Shakespeare's plays through their compulsory competitive relation to other choices from London's entertainment industry such as sex work and gaming Hedrick recovers a coherent internal dynamic of theatre's pleasure enclosure accompanying the revolutionary logic of capital's new cultural and economic extremes Applying these relations to original insightful readings of *A Midsummer Night's Dream* *The Winter's Tale* and *The Taming of the Shrew* Hedrick draws from cultural studies contemporary and personal parallels wide ranging historical materials and political theory These include the semantic shifts in keywords of pleasure the practice of betting on actors the psychology of paying admission before an entertainment and various reality shows such as contests of prose and verse Continual insights emerge both broad and specific from ten entertainment value axioms to Shakespeare's awareness of entertainment value's birth at moments in his late plays marking a logic of value crisis bubbles and the danger of too much fun
