Donovan,2015-10-01 A philologist and medieval scholar J R R Tolkien never intended to write immensely popular literature that would challenge traditional ideas about the nature of great literature and that was worthy of study in colleges across the world He set out only to write a good story the kind of story he and his friends would enjoy reading In The Hobbit and in The Lord of the Rings Tolkien created an entire world informed by his vast knowledge of mythology languages and medieval literature In the 1960s his books unexpectedly gained cult status with a new generation of young countercultural readers Today the readership for Tolkien s absorbing secondary world filled with monsters magic adventure sacrifice and heroism continues to grow Part 1 of this volume Materials introduces instructors to the rich array of resources available for teaching Tolkien including editions and criticism of his fiction and scholarship historical material on his life and times audiovisual materials and film adaptations of his fiction The essays in part 2 Approaches help instructors introduce students to critical debates around Tolkien s work its sources its influence and its connection to ecology religion and science Contributors draw on interdisciplinary approaches to outline strategies for teaching Tolkien in a wide variety of classroom contexts Virtual Communities: Concepts, Methodologies, Tools and Applications Management Association, Information Resources,2010-10-31 Covers the development design and utilization of virtual organizations and communities and the resulting impact of these venues *Creative Provocations: Speculations on the Future of Creativity, Technology & Learning* Danah Henriksen,Punya Mishra,2023-01-01 This book explores the complex yet critical relationship between technology and creativity specifically in educational contexts Creativity is important for

success in today s rapidly changing radically contingent and hyperconnected world This is even more relevant in the context of teaching and learning where the psychological sociological and cultural aspects of human learning confront the challenges of a rapidly changing technologically saturated world Written by some of the foremost thinkers and researchers in the area of creativity and or technology the chapters in this volume examine the impact of recent and future technologies on creativity teaching and learning Individually and collectively they help us develop an understanding of this nexus of creativity and technology for education They offer new perspectives on this rapidly evolving future exploring issues paradoxes tensions and points of interest for creativity and technology They position these issues in ways that consider implications for thinking learning teaching and education in general **Civic Service** David P. Redlawsk,Tom Rice,2009-08-10 This book reveals how to implement effective service learning programs and contains myriad examples of successful efforts across multiple disciplines The book focuses on service learning with government partners such as city councils school districts and public agencies however the lessons are easily transferable to service learning courses with businesses and not for profit organizations Taking a unique approach the book offers comprehensive look at all of the constituencies served by service learning including teachers and students government agencies as community partners higher education administrators and community citizens Data Information Literacy Jake Carlson,Lisa R. Johnston,2015-01-15 Given the increasing attention to managing publishing and preserving research datasets as scholarly assets what competencies in working with research data will graduate students in STEM disciplines need to be successful in their fields And what role can librarians play in helping students attain these competencies In addressing these questions this book articulates a new area of opportunity for librarians and other information professionals developing educational programs that introduce graduate students to the knowledge and skills needed to work with research data The term data information literacy has been adopted with the deliberate intent of tying two emerging roles for librarians together By viewing information literacy and data services as complementary rather than separate activities the contributors seek to leverage the progress made and the lessons learned in each service area The intent of the publication is to help librarians cultivate strategies and approaches for developing data information literacy programs of their own using the work done in the multiyear IMLS supported Data Information Literacy DIL project as real world case studies The initial chapters introduce the concepts and ideas behind data information literacy such as the twelve data competencies The middle chapters describe five case studies in data information literacy conducted at different institutions Cornell Purdue Minnesota Oregon each focused on a different disciplinary area in science and engineering They detail the approaches taken how the programs were implemented and the assessment metrics used to evaluate their impact The later chapters include the DIL Toolkit a distillation of the lessons learned which is presented as a handbook for librarians interested in developing their own DIL programs The book concludes with recommendations for future directions and growth of data information literacy More information about the DIL project can be found on the project
