Peeters, Geoffrey Austin Gresham, Rodolfo Paoletti, 1983-06 This two week course on Arterial Pollution covered the field of atherosclerosis as a disease entity and includes its anatomical physiopathological epidemiologic preventive and therapeutic aspects With the cooperation of an outstanding group of international lecturers we have been able to present an overview of the disease and its accidents as it stands today Such a scope differs greatly from the narrow workshops which only consider biochemical disorders e g the lipoproteins or the risk factors We believe it was timely to study the entire physiopathological entity of arterial pollution and we included all aspects of the disease in one single sweep We are grateful to the Nato Advanced Institute Programs for accepting this topic on the list of their sponsored initiatives and especially Mr di Lullo for his personal care Whether we succeeded was proved by the audience to the Nato Advanced Study Institute at Maratea in September 1981 and will become clearer through the audience these proceedings will gain in the medical community H Peeters editor A Gresham R Paoletti co editors
