Current Bibliography of Epidemiology, 1970. **Finding a Path to Safety in Food Allergy** National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Food and Nutrition Board, Committee on Food Allergies: Global Burden, Causes, Treatment, Prevention, and Public Policy, 2017-05-27. Over the past 20 years public concerns have grown in response to the apparent rising prevalence of food allergy and related atopic conditions such as eczema. Although evidence on the true prevalence of food allergy is complicated by insufficient or inconsistent data and studies with variable methodologies, many health care experts who care for patients agree that a real increase in food allergy has occurred and that it is unlikely to be due simply to an increase in awareness and better tools for diagnosis.
