### **Controlled Clinical Trials in Neurological Disease** Roger J. Porter,Bruce S.

Schoenberg,2012-12-06 The evaluation of the efficacy and safety of a clinical tool be it a diagnostic technique a preventive methodology or a therapeutic intervention is an im portant responsibility of physicians The history of medicine is characterized by the authoritarianisms of teachers and of organizations giving way to the clinical experience of physicians authoritarian dictum was replaced by case report and then by case series As physicians learned to substitute the analysis of data for the inconsistencies of dictums and anecdotes the problems of the case series as an investigative tool became more evident patient selection criteria measurements of outcome significance of results and extrapolation of conclusions to the

community of patients In response to these issues the methodology of the controlled clinical trial has evolved and with it the instruments of study design and of biostatistics as aids to study design and data analysis The medical surgical armamentarium has evolved from being dependent solely upon the observations and conclusions of a skilled clinician to being constructed upon the systematic collection and evaluation of data by a team of skilled clinicians and their statistical colleagues this is the controlled clinical trial During the past two decades the evaluation of clinical approaches to prevention and therapy has become particularly important to clinicians concerned with nervous system dysfunction There has been and continues to be an explosion of information from the basic neurosciences and from the application of biotechnology to the nervous system

**Epilepsy** Hans Lüders,Ronald P. Lesser,2012-12-06 Epilepsy is among the most common scourges afflicting the health of humankind and perhaps the most terrifying In one form or another it is suffered by one in everyone hundred people on earth with a disproportionate prevalence at the early and late extremes of life There is nothing sacred or sanctifying about it in spite of Hippocrates terming epilepsy The Sacred Disease in a famous treatise There is nothing ennobling about it despite its occasional designation as a noble disorder by virtue of its having affected the likes of Alexander of Macedon Julius Caesar and other persons of royal lineage From time to time epilepsy is hailed as a condition which is artistically inspirational Fyodor Dostoyevsky's dependence on his own personal experience with complex partial epilepsy as a source of imagery in the transfiguration scenes of The Brothers Karamazov and as a source of experience in The Idiot is often cited in this respect In fact for all its victims in human history epilepsy has been a sad burden which has disrupted and shortened life causing suffering and castigation for the duration of their terrestrial journey
