CONFLICTING IDEOLOGIES AND THE ARCHAEOLOGY OF EARLY MEDIEVAL ALBANIA *Vrbes Extinctae* Andrea Augenti, 2016-12-05 Core tourist sites for the classical world are the ruins of those many and scattered examples of lost and abandoned towns from Pompeii to Timgad to Ephesus and Petra Usually studied for their peaks and growth rarely are their ends explored in detail to consider the processes of loss and also to trace their afterlives when they were often robbed for materials even if still hosting remnant populations This volume breaks new ground by examining the phenomenon of urban loss and abandonment from Roman to medieval times across the former Roman Empire Through a series of case studies two main aspects are examined firstly the sequences and chronologies of loss of sites roles structures people identity and secondly the methodologies of study of these sites from early discoveries and exploitation of such sites to current archaeological and scientific approaches notably excavation urban survey georadar and geophysics to studying these crucial centres and their fates How can we determine the causes of urban failure whether economic military environmental political or even religious How drawn out was the process of urban decay and abandonment What were the natures of the afterlives of these sites which archaeology is beginning to trace How far does scrutiny of these extinct sites help in discussion of archaeological trajectories of sites that persisted The fourteen core chapters in this collection consider specific examples and case studies of such lost classical cities from across the many Roman provinces in order to address these questions Bringing together an array of archaeological and historical voices to share views on and findings from excavations and surveys of failed towns this volume offers much to scholars of Roman late antique and early medieval and medieval archaeology and history **The History of the Library in Western Civilization, Volume II** Konstantinos Sp. Nationalism and the Politicization of History in the Former Yugoslavia Gorana Ognjenovic,Jasna Jozelic,2021-03-19 This book is very timely the instrumentalization of history for political goals has become a pressing issue and worrisome feature of many polities to the point of challenging even the most consolidated democracies Focusing on Yugoslavia s fragile successor states the authors explore plurifold analytical levels including local regional transnational European and global perspectives The authors comprehensively demonstrate how politicizing history in the postwar and postcommunist societies of what was once Yugoslavia has prevented both reconciliation and democratization Sabine Rutar Leibniz Institute for East and Southeast European Studies Germany Ognjenovic and Jozelic focus here on the former Yugoslavia before and after its fragmentation to explore and evaluate the various uses of histories by nationalists both those who promoted federal nationalism and those who peddle specific local nationalisms in successor states The book deals specifically with the Western Balkans but these developments have their parallels in many other parts of the world and the book will be useful well beyond the region on which the study is based Paul Mojzes Professor Emeritus Rosemont College USA The former Yugoslavia has become a battlefield for the Memory Wars in spite of the wealth of judicially established facts and available evidences gathered about the atrocities in the region and various initiatives aimed at dealing with the past and efforts at transitional justice Focusing on three periods of Yugoslav history the Second World War socialist Yugoslavia and the Yugoslav wars of 1991 2001 the contributors show that despite these efforts to deal with the past sustainable peace and reconciliation across ethnic and religious groups remain a distant aim Marijana Toma Center for Cultural Decontamination Serbia This book analyzes how nationalists in the former Yugoslavia have politicized history to further their political agendas retaining and prolonging conflict among different cultural and religious groups and impeding the process of lasting reconciliation It explores how narratives have been mis used drawing on examples from all of the former Yugoslav republics With contributors from a range of disciplinary backgrounds it provides a vital assessment of how nationalists have attempted to re shape public collective memory and relativize facts

Byzantine Greece: Microcosm of Empire? Archibald Dunn,2023-08-28 This volume offers a structured presentation of the progress of research into the internal history of a part of the Byzantine world Greece in the centuries before the multiple changes

induced or accelerated by the Fourth Crusade Greece is a large area several Early and Middle Byzantine provinces with records archival literary archaeological architectural and art historical most of which are unequalled in terms of their density and range This creates opportunities for useful synthesis and for dialogue with those now engaged in the rewriting or writing of the inner history of Byzantium from Italy to the Caucasus who have been stimulated by or involved in the editing of archives and inscriptions including sigillographic and in the publication of monuments excavations and surveys for all of which the Greek space the *elladik kh ra* is a particular and fertile focus of activity as the conference showed Much of the material presented here can usually only be found in specialised publication and indeed much in Greek alone But properly contextualised this material about the Greek space deserves to be brought into the dialogues or debates at the heart of Byzantine Studies for instance about the Late Antique boom urban life the Dark Age economic change the nature of the Byzantine revival and of social socio economic and ethnic groups The studies here synthesise such research enabling the Greek space as a case study in the evolution of a significant region to the west of Constantinople to take its place more fully as a point of reference in such dialogues or debates Equally it provides frameworks for archaeologists dealing with Greece from Late Antiquity onwards and there are now many with which to engage and it makes available a rich source of comparative material for those studying the other regions of the Byzantine world whether historically or archaeologically in Southeastern Europe Italy or Turkey
